

Why booster vaccinations are needed to be done Excerpt from 781st Contact, Monday, October 18, 2021.

Billy ... But now I want to ask you what a 'booster' vaccination is supposed to mean, and what else is worth mentioning with regard to the Corona virus.

Ptaah ... But now I want to talk first about the current situation of the Corona disease, namely about what we have been able to determine so far, what is being done in terms of governance as well as medically and virologically in relation to it.

Unfortunately, after our very precise researches of the vaccines against the corona plague, which are circulated and applied worldwide, we found out, and I want to speak without consideration, that they are not as proven and good as they are constantly claimed publicly by corrupt and incompetent virologists and state leaders. First of all, however, I want to say that we do not interfere with the earthly affairs in this way, because I only mention facts and facts recognized by us and our efforts, which prove that the earthly humans - how do you say in each case - are fooled, because they are not told the truth in this and that respect, but they are lied to. Therefore I want to speak openly once and say what really is, however in such a way that every earth man must decide himself whether he wants to act according to it or not. No one is to be influenced by my words and explanations to act according to what I have to say, because every earth man should and has to decide himself what he wants to accept, how he wants to act or what he wants to leave, because as you often say, everyone is his own lord and master and he has to remain so.

According to what is publicly proclaimed, the so-called vaccines have not yet been tested in such a way that they correspond to the efficacy values that are mentioned. These statements are based on deliberate lies, firstly because the filthy profit attracts the companies and corporations that produce these alleged 'good' and 'valuable' vaccines and distribute them worldwide, with which they 'earn' billions, which must rather be called robbing at the expense of the stupid vaccine believers. That the so-called vaccines, which in reality are partly only half-valent and others actually absolutely without real effect, and that with the half-valent vaccines effectively vaccinated or 'recovered' are nevertheless again infected with the Corona plague, that results quite naturally, because half-valent remains half-valent and can never bring full-value. Since the majority of today's vaccines of various kinds are unfortunately not yet sufficiently mature and not suitable for a useful vaccination due to their unresearched, untested and half-value effectiveness, the real research and testing of an effectively effective vaccine against the Corona virus will still require years, it is not advisable to understand and accept them as a comprehensive security. For many trusting people who get vaccinated with these unproven vaccines and believe that this will give them 100% certainty that they will really become immune to the Corona virus, or that they can easily take a vaccination without any consequences or late effects, time will tell in each individual case, which may be decades. But in the end every earth human being is responsible for himself, consequently everyone must decide for himself for a for or against. Consequently, no advice can or may be given as to whether a vaccination can or could be good or wrong, recommendable or harmful for someone, because it is everyone's own responsibility.

As far as the so-called 'booster' vaccination is concerned, it should be explained that this means nothing other than a 'revaccination' or 'booster vaccination', which means that due to the half-life effect of the vaccines, which the manufacturers of the same are well aware of, they require a revaccination or a booster vaccination. This is because the antibodies that are formed after a vaccination evaporate after a certain time and thus the half-life effect of the vaccination dissolves again. This increases the risk of a new infection with this disease again.

It has to be said that the statements of the correct effectiveness of the vaccinations are based on lies, because these vaccines do not guarantee what is promised concerning them to the vaccination believers, namely that they are safe and effective to a certain percentage. This, however, corresponds to another lie, because the allegedly 'good' active substances are, on the one hand, much lower in their efficacy values, and, on the other hand, too little tested and examined, so that they would reach the alleged percentage efficiency, which is stated.

The consequences of these vaccines, which appear more often, ranging from mild and severe health problems to deaths and severe late effects of these vaccines, are considerable and are just as deliberately misrepresented to the people through lies and concealment of the truth. They are not told the full truth, but much is concealed and a security is suggested, which does not exist or exists only to a certain extent. It is also concealed from those willing to be vaccinated that in many cases the supposedly 'safe' vaccination does not protect them from being infected anyway by some mutation of the corona virus, which in turn creates a risk of infection for others, because the infection is inevitably transmitted to fellow human beings.

The state responsible persons resp. the state leaders of all states act completely confused and lead their peoples to the resistance against their state illogical instructions, decrees and regulations. This because everything which they instruct and prescribe is contrary to what would be really necessary, consequently unrest and demonstrations are the inevitable consequence. A coercive legislation, which is considered misgoverning, will have unpleasant consequences and will prove how unfit, incapable and misguided in their office the respective misgovernors are, who enact such anti-opinion requests. They are guilty of creating enmity between the vaccinated and the unvaccinated and thereby unthinkingly dividing the peoples into two hostile communities. This they are not able to consider in their non-thinking resp. in their stupidity, as also not that instead of their stupid instructions and decrees a general wearing of a valid respiratory protection mask should take place in personal responsibility of each person, which guarantees a certain security and prevents the danger of an infection. Instead of doing the right thing in this regard, respectively prescribing it to the peoples, the free handling without protective masks and keeping distance is propagated, as well as stupid G-rules are invented, by which this and that is allowed, whereby the peoples do not notice that it is already a dictatorial measure, which will be followed by others. Once introduced and tolerated without contradiction by those who believe in it, the whole thing leads on to the final dictatorship, which is finally found to be right and confirmed by those of the peoples who, in their stupidity, do not realize that they are falling into a servility through the fallible authors of the dictatorially lawfully decided measures, which is equally unworthy and hostile to freedom as a real dictatorship.

In order to protect oneself against infection of a person infected with the Corona virus, the only sure way is to stay away from other people as much as possible. Where it is not possible otherwise, the wearing of a respirator mask should be strictly recommended, because this is necessary, contrary to any erroneous and stupid governmental decree or mis-advice that this is just as unnecessary as not keeping a distance from one person to another. In fact, as long as the Corona epidemic is rampant, keeping an appropriate distance is as urgently necessary as wearing masks to persons of whom one cannot be sure whether they carry the Corona virus and can spread it further. Even with regard to persons vaccinated against the epidemic, there is no certainty, because first of all the vaccines are only halfway useful or

not at all, consequently they protect only halfway or not at all against an infection of any mutation of the Corona virus, which is why revaccinations - if possible in multiple succession - are recommended, with a good vaccine that has been sufficiently tested for its efficacy must be worth several years, consequently there will be no fear of infection for a long time.

What I want to recommend, which every person can follow voluntarily or not, is that as long as the Corona epidemic has not become so void that there will no longer be any danger of infection which will still take some time, as you have told me, but about which you should not speak openly a respiratory protection mask of the quality FFP2 is worn and a proper distance, measured according to necessity, is kept to the fellow human being, and really always as long as it is necessary. And as I see everything, this will be longer than the state officials and the so-called 'experts' will proclaim.

A state prohibition of pleasurable travel movements would be absolutely necessary as long as the Corona epidemic is rampant and uncontrolled, which from now on will be the case again to a greater extent, as you also know from the time with my father. Consequently, for the containment of the Corona epidemic, air traffic and any other unnecessary and only for vacation and the like travel, as well as air traffic, would have to be stopped, as well as any public event for pure pleasure purposes and public sports events would also belong to it. Professional traffic could be permitted if the necessary safety measures were strictly observed, such as wearing masks and keeping a proper distance, which would also have to be taken into consideration during work. But whether this would be understood by the responsible people of all species is very questionable, because such advice needs reason and rationality to be recognized and followed, and exactly these factors are lacking in those earthly humans who are responsible for the welfare of the peoples. To say more is probably superfluous, because only few will hear what is said and do the right thing, because too many are in the rampant mass of the overpopulation, who on the one hand are believers in their state leaders, as they are also believers of any religion and assume in their faith delusion that their God, who exists truthfully only in their imagination, will help them and protect them from all evil.

Billy Exactly, that should still be the case, but one talks out into the desert, because 1. Nobody wants to hear it, because the majority of humanity is going against its own will and its own stupid thinking, consequently not thinking and just being stupid wins and is in the foreground. 2. Belief in a 'dear God' and in 'infallible' rulers plays such an important role that hops and malt are lost to want to explain the real truth to someone who believes in God or who believes in government.
