

Societal Influences by Corona Measures

Excerpt from the 783rd Contact of Sunday, November 7, 2021.

Billy ... But tell me, what do you think of the whole matter arising from the Corona plague?

Menara: I can't tell you much more about it than what Ptaah has explained to us, because I myself have no experience and knowledge about the Corona infection, which is currently spreading on Earth as an epidemic-pandemic. His speech to us was only to inform us in an explanatory way what is happening on the Earth and with its population. He explained everything as follows:

Explanation from Ptaah, stated by Menara: Now it has reached all around the earth with the state leaders and with the epidemiologists, virologists, the health commanders, the doctors, the WHO as well as with the vaccinated ones by their own anxiety and by the pharmaceutical companies steered and profit-greedy pretending to the fact that a two-class society comes about. This by the stubbornness of the unvaccinated, who continue to refuse to be vaccinated with the still insufficiently tested and partly life-threatening vaccines. Partly less steadfast ones will let themselves be forced by persuasion, which will be called simply persuasion, which corresponds however really to a persuasion by influencing to a vaccination, evenly by persuasion. Ptaah summarized this in the following, which I will try to put into words corresponding to what he said. Thereby I will try to summarize the corresponding statements into single points, which I will number.

1. The leaders of the state will hold responsible for their own wrong decisions and their wrong actions regarding the populations those earthlings who steadfastly refuse to be vaccinated with half-value and insufficiently tested vaccines.
2. The leaders of the state will impose strict restrictions, various limitations, restrictions, various possibilities of hindering action, as well as limited powers and rights, etc. on those who refuse to be vaccinated with insufficiently or untested, possibly life-threatening vaccines, or who refuse to be vaccinated with them at all.
3. The all-around wrongly made decisions by all state leaders themselves, which are ordered and left to the people, namely to work without very urgently needed respiratory masks and without keeping the proper and largely health-preserving safety distance of 2 meters from one person to another, is irresponsible in every form and consequently to be disregarded.
4. The less steadfast will submit to the persuasions of those who are willing and fearful and to the profiteers and persuasions of those who are obedient to the propaganda and persuasions of the vaccine manufacturers and their representatives and followers and who are unable to muster any initiative for their intellect and reason.
5. The unvaccinated are now brought in and assigned the blame, which basically, however, falls to the leaders of the state, who in their lack of understanding of the situation and the Corona situation did not

order the right thing, but the wrong thing for the population, whereby the next wave of the Corona virus infected will rise in high numbers and in total will again claim thousands of lives.

6. From now on, the unvaccinated will be falsely found guilty and sanctioned by the leaders of the state for the further and resurgence of the infected in the very high thousands and the deaths in the hundreds and thousands, because they will make the unvaccinated unlawfully responsible for the wrong decisions, decrees and decrees, etc. of the leaders of the state and their sole and full culpability. This will happen in such a way that the unvaccinated will lose their rights as free citizens and become, so to speak, ex officio recessive unfree and slaves of their own government and those who agree to it.

These are all around the declarations that Ptaah has given us and that are to be realized soon on Earth, at least in states where the citizens are uncertain as a result of the wrong decisions and actions of the state leaders regarding the Corona plague and the half-value vaccines.

Billy: That's actually enough of what we discussed in that regard.
