

SUPPLEMENTAL INFORMATION

SEMINAR: WAKE UP OKANOGAN!

LOCATION: OMAK ELK'S LODGE

DATE: NOVEMBER 4TH, 2017

TIME: NOON TO 4 PM

WEBSITE: www.myappislove.org EMAIL: walkthetalk@myappislove.org

This packet contains IMPORTANT supplemental information for the Wake Up Okanogan! Seminar related to items emphasized in the lecture that would not fit within the time constraints of the event. Enjoy the read, and 'Walk the Talk'!

Free and Infinite Source of Energy Discovered and Covered Up 80 Years Ago

Posted by [FuelReducer World news](#) Sunday, January 15th, 2012

Enough energy is coming to the Earth to light one million, one hundred ninety-three thousand, six hundred, (1,193,600) one hundred-watt lamps for every human being on the earth today. No fossil fuel of any kind will ever have to be taken as a dead load for this infinite supply of energy can be "picked-up" direct by great ocean liners, railroads, airplanes, automobiles or any form of transportation. No fossil fuel of any kind will ever be needed again to supply the energy needed to heat, light and power any buildings or to pump water on the desert lands, farmers' fields, or to our kitchens and baths. This infinite and free energy source can be harnessed with equipment of only a fraction of the weight of any steam, coal, gas, or nuclear power plant or any kind of fossil fuel combustion engine in use today and at a fraction of the cost. A wild dream? This is not a dream, nor a fairytale or falsehood. This infinite and free energy is a proven, practical reality as hundreds of people know who have witnessed the T. HENRY MORAY Radiant Energy equipment. Powered from the cosmos!

"The amount of light and heat (radiant energy) received by the earth from the sun is enormous. On the square yard exposed perpendicularly to the sun's radiant energy is received at the rate

of one and one-half horsepower. The average rate for the earth through the periods of darkness as well as of light is three-eighths of a horsepower per square yard. This means that 300 horsepower are received on a building 50×150 feet in dimensions. Our planet is receiving energy at the rate of 160,000 horsepower per inhabitant of the earth at the present time. "The earth receives but an insignificant fraction of the energy the sun radiates: only about one-two-billionth." "The Advance of Science," by Watson Davis, Director, Science Service, Washington, 1934. Cosmic Rays bombard the earth from outer space every second of the day and night. They penetrate everything including our own bodies. They carry the mightiest packet of energy yet known to science. They give rise to bursts of material particles.

Can this free and infinite radiant energy be harnessed? Yes. It was done 80 years ago (1932) and can be done today. 80 years ago Dr. Moray erected an aerial (antenna) about two hundred feet long and is about eighty feet above the ground. The aerial wire was a copper cable approximately a fourth inch in diameter, and well insulated. The ground was a water pipe in tile basement of Dr. Moray's home.

The device was assembled in a trunk. Through the sides were holes for the connections to ground and to the antenna and for observation; the said holes were about one-half inch in diameter. There were two boxes about twenty by four inches, one on top of the other; both were closed and the covers fastened with screws. On the upper box was lying an insulated panel about an inch thick by fifteen inches long and three inches wide; it is of slate or hard rubber or some material of similar appearance. On this were two binding posts that were connectible by means of a small switch; also mounted on this panel is a body about two and one-half inches square, wrapped in friction tape, front which protrude two poles about one-fourth inch in diameter, apparently of soft iron. A double receptacle for light globes (bulbs) was connected in the circuit, in one of which was a twenty watt globe (light bulb), and in the other a hundred watt globe (light bulb).

The tile trunk was examined to see if there were any connections other than the antenna and the ground, but found none. The small switch above mentioned was thrown several times, but without result; the connections to ground antenna were also removed, also without result.

Dr. Moray then took a magnet, which was a very broad, short limped U, and began to stroke one hole of it in the polls in the taped body; M. Jensen placed his fingers on the binding posts several times, and at last received a rather vigorous shock; Dr. Moray then threw the switch and the globes lighted. When the switch was opened the lights went off and came on again when the switch was closed. Removing either the ground or the antenna connection caused the lights to go out, but they came on again as soon as the connection was re-established. The time of excitation was ten minutes, and the lights came on at 7:59 a.m., October first.

The trunk was then closed and sealed with railroad car seals, and the numbers on the seals were recorded by Mr. Jensen. Each morning and night up to the morning of Oct. 4, the seals were inspected and observed that the lights were burning. About 10:30 on this date the detector was jarred out of adjustment by the felling of a heavy tree next to the house.

The evening of the same day Mr. Moray removed the detector in the presence of Mr. Jensen and me and in twenty minutes had it readjusted and reassembled ready to start. As soon as Mr. Judd arrived the stroking began and the lights came on in about ten minutes. The trunk was again sealed as before. The device continued in operation until the morning of Oct. 8, and the trunk was opened in the presence of the three witnesses above mentioned after a run of eighty-four hours. The hundred watt lamp was removed and a standard 575 Hotpoint electric iron was plugged into its place; the iron was heated as quickly as though on the usual house circuit. During this test a sixty watt globe was put in the place of the twenty, so that the total wattage was 635.

The antenna and ground connections were then removed until no current was delivered when the switch was closed, and five 100 watt globes were substituted for the iron, making a total power output of 560 watts. The lamps appeared to be as bright as when on the house circuit. It required four minutes of excitation to get it in operation again. After again being disconnected until it ceased to operate it required but one minute of excitation to bring in the current.

While the test was in progress every test that could be thought of was applied to make sure that there were no hidden connections to the house circuit or to a battery; the house lights were turned on and then all main switches pulled, which turned off the house lights but did not in the least affect those in the test. After the run had terminated the trunk and table were examined for wires, but none were found except those to the antenna and to the ground.

As a further proof that the conversion of the energy was due to the mechanism in the box, Dr. Moray hit the table on which the trunk was standing, a moderate blow with a hammer whereupon the light flickered and went off, due to the detector being shaken out of adjustment.

It is to be noted that after a total run of 158 hours the device supplied 635 watts; inasmuch as a horsepower is but 746 watts this equals 0.851 of a horsepower or slightly more than 7/8 horsepower. This alone is sufficient to dispose of any suggestion of a battery.

In witness to the above I hereunto sign my name"

Signed, Murray O. Hayes

Duly verified and notarized.

Moray harnessed this free and infinite source of energy using a simple long wire antenna. A long piece of insulated wire acts as an antenna. The very cheap long wire antenna captures radiant energy. An antenna is nothing more than a transducer that converts free radiant energy into alternating current (AC electrical power) or vice-versa. There are two basic types: the receiving antenna, which intercepts free radiant energy (RF) and delivers the AC current to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates radiant energy.

The simplest antenna is a length of wire, connected at one end to a transmitter or receiver. More often, the radiating/receiving element is placed at a distance from the transmitter or receiver, and AC is delivered to or from the antenna by means of an RF transmission line, also called a feed line or feeder.

The use of longer wire in excess of 500 feet or strung higher than head height can produce lethal amounts of current. Physicists have determined that the earth has a negative charge which amounts to 400,000 coulombs, yet six feet above the ground (above head height) the air is charged with more than 200 volts positive in respect to the ground. Just how lethal is 200 volts? Your electrical outlets and home appliances are charged with 120 volts positive. Your car battery is charged with one tenth that or 12 volts positive. The CIA has used 12 volt car batteries in enhanced interrogations (torture) of hundreds of kidnapped civilians. Many have died from being electrocuted to death by the CIA using just 12 volts. Hundreds die each year from electrical mishaps at home or at work from mishandling 120 volts. The results is the same for 12 volts, 120 volts or 200 volts of free radiant energy.

So why use it as an energy source if it so dangerous? The price. It is **FREE**.

You haven't stopped using the electrical power that you pay dearly for from your public utility company. It is constantly (or for as long as you continue to pay for it) flowing in the walls throughout your home and work and is just as dangerous and deadly. You continue to use 12 volt car batteries even though they too can electrocute and kill you. You need electrical energy to function today. Imagine your life if that electrical energy was free.

Imagine life with no smog, no electrical, gas or oil bill, no BP or Exxon Mobil oil spills, no Alberta Tar Sands (engine killing sludge) Environmental Disaster, no global warming, no respiratory and oil causing cancer and diseases, no energy crisis, no economic crisis, no UN (Oil for Food Mass Murder Program, Libyan War of Aggression), IMF, WHO, World Bank, NWO, Federal Reserve (no \$16 trillion + banker embezzlement), no Halliburton (no war mongering vice-president Dick Cheney), no Chevron, no Kennedy Assassination (by Bush family for failed Zapata Oil/Bay of Pigs), no Guantanamo Bay (the real reason why the US government won't close it is because the US military base is being used as a front to secretly steal Cuba's oil – slant oil drilling) and no 9/11 (US government false flag attack that launched its wars of terror and aggression to steal

the oil of the Middle East and Asia and strip the American people of their inalienable rights and freedoms). That is exactly what life would be like if we had been using this free and infinite energy source for the past 80 years, instead of oil and gas.

You too can read about this free infinite energy discovery in “THE SEA OF ENERGY IN WHICH THE EARTH FLOATS” by T. HENRY MORAY, 1931

Supplemental: *Look into the suppression of the immense work of other Free Energy pioneers like Nikola Tesla, Royal Rife, Wilhelm Reich, and Eugene Mallove; by the government because of the influence of the Morgans, Warburgs, Rockefellers, Rothschilds, and other ‘Controllers’.*

Statement About ‘Weather Control’ by Former U.S. Defense Secretary William Cohen

William Cohen talked about the development of weather-related weaponry; or, more specifically, techniques to create weather events to support offensive military operations. The following Cohen quote is from a question-and-answer session at the Conference on Terrorism, Weapons of Mass Destruction, and U.S. Strategy; at the Georgia Center in Athens, Ga., in 1997.

“There are some reports, for example, that some countries have been trying to construct something like an Ebola Virus, and that would be a very dangerous phenomenon, to say the least. Alvin Toffler has written about this in terms of some scientists in their laboratories trying to devise certain types of pathogens that would be ethnic specific so that they could just eliminate certain ethnic groups and races; and others are designing some sort of engineering, some sort of insects that can destroy specific crops. Others are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves. So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations. It's real, and that's the reason why we have to intensify our efforts, and that's why this is so important.”

Supplemental: *Cohen admits that Weather Control is VERY real, so why can't people believe what they can see with their own eyes?*

The Truth About the War on Drugs

December 8, 2011 by [Jack Blood](#)

For all the evidence of how the War on Drugs has failed society, there's equally as much evidence of how it is a great success to those who continue to support it. The drug war has many advantages if you wish to control society and expand your empire. It also enriches several industries that would otherwise have a very difficult time staying solvent without it.

Here are ten ways the War on Drugs is a wild success:

Military-Industrial Profits: As the Vietnam War came to an end, it struck fear into the military-industrial machine that enjoyed great profits from that conflict. In a world where contrived enemies were needed to keep a constant funding of weapons, [Richard Nixon declared drugs “Public Enemy Number 1”](#). Thus, domestic armies were erected to combat the illegal drug trade, delivering consistent cash flow to weapons manufacturers. These companies make money, not just from the needs of the DEA, border patrol, and local police forces, but also from drug traffickers. Win-win and profits all around.

Huge Boon to Private Prisons: The private prison industry thrives off long sentences for drug offenders. At least 25% of their profits come from these nonviolent criminals. A great number more are held on “drug related” charges that may have resulted in drug violence. However, the [current trend](#) shows that three-quarters of new inmates admitted to state prisons are nonviolent offenders. Private prisons clearly depend on arresting pot smokers and addicts of more severe drugs.

Prevents Higher Unemployment Rates: Imagine if the millions of American currently jailed on drug charges were released into a job market already suffering from [real unemployment numbers over 20%](#). Additionally, if it wasn’t for drugs being illegal, countless people like DEA agents, court staff, prison guards, parole officers, drug dealers, etc would otherwise be unemployed. Thank goodness for the war on drugs, or the U.S. economy would look even worse.

Suppresses Minority Populations: It’s often said that the drug war is a [war on minorities](#): “According to the ACLU, African Americans make up an estimated 15% of drug users, but they account for 37% of those arrested on drug charges, 59% of those convicted and 74% of all drug offenders sentenced to prison. Or consider this: The U.S. has 260,000 people in state prisons on nonviolent drug charges; 183,200 (more than 70%) of them are black or Latino.” So it is a huge success for those who wish to suppress minority populations.

Drives Up Prices: Making any substance illegal will result in much higher prices than a free market would dictate. Especially when there’s a high demand for that substance. In the case of the cannabis plant, which grows like a weed and requires very little value added, the dried flower would virtually be free if it wasn’t for the harsh restrictions and dangers involved in producing and distributing it. These high prices are terrific for drug dealers and even legal [medical marijuana growers who opposed legalization](#) in California because it threatened their profits.

Drug Violence Justifies Tough Gun Laws: The violence generated from the prohibition of drugs is reminiscent of the extreme mob violence during the prohibition of alcohol. Prohibition of anything will always create black markets which require firearms to protect banned

products. Recently, the U.S. government itself was [caught red-handed supplying guns](#) to Mexican drug cartels in their “Fast and Furious” scandal. It’s now proven that the [ATF plotted to use Fast and Furious](#) to push for new gun control regulations. Indeed, most street violence is due to turf wars over the drug trade, and tougher gun laws are proposed as the war escalates. It’s wonderful for those who blame violence on guns and wish to restrict them from law-abiding citizens.

Protects Big Pharma Monopolies: No one is happier about the war on drugs than Big Pharma. Their control over the FDA and monopoly of “controlled substances” would be threatened if all drugs were legalized. They want you addicted to their FDA-approved versions of heroin and cocaine, not something you can get on the black market. In turn, they also benefit greatly when the prices of street drugs increase, as they can then inflate the cost of their products. They love the drug war so much they’ve lobbied to [extend it to vitamins and supplements](#).

Allows Proxy Armies: If you want to create an empire by force, but it’s politically disadvantageous to base your army in certain countries, then the global war on drugs is your ticket to supplying troops or creating proxy armies. One of the most recent examples is [Costa Rica](#), a peaceful country in Central America without an army, where the U.S. bribed the government to allow the Navy and Marines to be stationed off the Caribbean coast to fight the war on drugs. In other nations where even this won’t be allowed, the CIA funds and arms one of the drug cartels who then acts as their hired enforcers, or they’re used as an excuse for governments to accept U.S. help to combat the enemy they created. In either case, the U.S. sells more arms and trains soldiers to be used upon command.

Keeps Big Banks Flush with Cash: It has long been known that big banks happily launder money for the big drug cartels. [According to](#) The United Nations Office on Drugs and Crime (UNODC) and the International Monetary Fund (IMF), “Up to 1.5 trillion dollars in drug money are laundered through legal enterprises, accounting for 5% of global GDP.” Take just this year and one bank, Wachovia; who had to pay a slap-on-the-wrist fine for [laundering more than \\$420 billion](#) for Mexican drug cartels. Imagine where the big banks would be without this money, given that they also needed a bailout of over \$23 trillion for lack of sufficient deposits to pay for their gambling habits.

Funds CIA Black Ops: Do you ever wonder where the U.S. government gets all that money for their secret “Black Ops” like underground bases, secret wars, corporate takeovers and seed money, etc? It’s been proven over and over that the [CIA \(and Pentagon\) controls a large majority](#) of the illicit drug trade either directly or indirectly through proxies mentioned above. They’ve been caught in the act of shipping in massive amounts of cocaine, while the [CIA now openly admits](#) to protecting and facilitating the opium trade in Afghanistan. If it wasn’t for this tremendous profit, the CIA would not be able to build their secret shadow government.

So, as you can see, there are great benefits to the War on Drugs depending what side of the coin you're on. If you're a poor pot smoker, well, you're out of luck. But if you're the biggest heroin and cocaine dealer in the world and desire a monopoly . . . well, you've got the world right where you want it.

Supplemental: *The sinister government is involved in much more than drug smuggling. Weapons and Child Sex Trafficking is a huge business as well. People need to start coming forward to expose this, and we can get these vermin off our planet.*

The Truth About Hemp/Cannabis

All of the founding fathers of this nation were Masons as well as almost all of the presidents. The building of early American colonies as well as the American Revolution would not have been possible if it were not for a very special plant. The Cannabis / Hemp plant was used throughout the world since the beginning of time for just about everything that mankind needed. Paper made from hemp was used for books, bibles, maps, and money. You can produce 4 times as much paper from an acre of hemp as you can from an acre of trees at 1/4 the cost, 1/5 the pollution, it is 10 times stronger and lasts up to 1000 years instead of only 50. And it can be recycled 4 times as many times as paper from wood pulp. The Constitution was printed on hemp paper as well as the first 3 drafts of the Declaration of Independence. Even great sailing ships like the U.S.S. Constitution were made primarily out of hemp. Hemp is the STRONGEST natural fiber on the planet. Hemp is 26 times stronger than cotton and 10 times longer lasting. The first Levi jeans were made out of hemp as well as all of the soldier's clothes for the Revolutionary War. It requires no chemicals to grow, has very few natural enemies, and grows in the widest variety of climates of any weed or plant. It is also the FASTEST GROWING plant on the planet, growing 4 times faster than corn. The seeds from the hemp plant provide the highest source of complete vegetable protein of any food source on earth. Even higher than soybeans. It has also been re-realized lately that the hemp seed is the highest source of Essential Fatty Acids in the world. ESSENTIAL, meaning NECESSARY FOR LIFE, Fatty Acids are necessary for us and beneficial for cleaning the cholesterol out of the arteries naturally. All oils in the supermarket are bad since they are placed in clear plastic containers and exposed to direct sunlight. They become as bad as saturated fats, and end up CAUSING cholesterol buildup, leading to heart attacks, etc. Hemp seed oil can even be used as a machine-grade lubricant for engines and other machines replacing petroleum oil from the ground. Henry Ford built his Ford Model-T using hemp to line the side panels. The impact strength was 10 times stronger than steel alone. This would eliminate many vehicular deaths today. The Model-T was also designed to run on hemp fuel which Henry Ford grew. This was displayed in Popular Mechanics in Feb. of 1938. Concentrated extracts of Cannabis from the flowers were the 2nd most used medicines in America for 150 years for over 100 separate medical illnesses. It is probably the best natural medicine for Glaucoma, stress, and controlling nausea,

and works very well for arthritis, asthma, and epilepsy. It is estimated that Hemp would have at least 50,000 commercial uses if it were legal in America today.

The reason that Hemp is illegal in America today is because the main families in America (Masons), the Harrimans and Rockefellers (Standard Oil), the Whitneys (Eli Whitney-Cotton Gin), Dupont (Chemicals in wood pulp processing and cotton pesticides), and Hearst (Newspapers, Media) find it more profitable to sell us unnecessary chemicals, unneeded dug-up petroleum oil, immune system destroying pharmaceuticals, and axed up trees cut into real thin slices, all at over-inflated prices and at the expense of our health and living environment. For these companies, the real problem is that one cannot patent a natural plant. Almost everything produced in America by large corporations is exported for sale on the world markets. The total value of oil, petrochemicals, and pharmaceutical sales totals hundreds of billions of dollars. However, with the availability of over 50,000 new products and the necessity to manufacture them, America would be a much richer nation if the farmers and the average citizen were allowed to grow this valuable crop.

Supplemental: *The truth about Cannabis is, FINALLY, starting to come out. It has gone on for far too long. There are more reasons than profits, as to why it is demonized so much. Money is just one thing used for control. More worrisome things are at stake for 'The Controllers'. For one thing, Cannabis inhibits the effectiveness of their mind control methods; which they MUST have in order to control us. Cannabis also cures many things, including Cancer. Watch the Rick Simpson story for starters. Between the use of Free Energy and Cannabis alone, the world would be free of all monetary systems, corporations, and governments. Fear would cease to exist, and control cannot operate without Fear. You do the math. Enjoy the thought provoking quotes that follow and check out the websites below. Much Love. J*
