Groovv mPOS

Accept payments anywhere.

Groovv mPOS is an omni-channel, mobile point of sale solution for accepting all payment types. Our handheld EMV/NFC reader has a Bluetooth connection to your smartphone for in-person payments. Plus, an online payments portal enables you to email receipts, sync inventory and manage "card not present" transactions.

Groovv mPOS is ideal if you:

- Travel to customer sites
- Accept in-person, phone and online payments
- Run an online business with pop-up stores
- Manage and track inventory

Key Benefits of Groovv mPOS:

Accept All Payment Types

Never miss a sale whether a customer wants to pay with a swipe or chip card or an NFC mobile wallet like Apple Pay.

Accept Payments Anywhere

Take payments on-site, key in phone and mail transactions, and accept payments online.

Get Paid Fast

Whether from in-person or online payments, your funds will be deposited quickly.

Mobile EMV Compliance

The Groovv handheld reader is EMV-compliant, protecting you from liability for fraudulent transactions.

Online Payments Portal

Issue credits, void transactions and manage payments from all sources through one, cloud-based interface.

Recurring Billing

Bill customers and process payments on a scheduled basis through an automated system.

Electronic Invoicing

Create purchase orders and track your invoices electronically.

Online Data Security

The Groovv Online Payments portal meets modern data security standards for card not present transactions.

Groovv mPOS

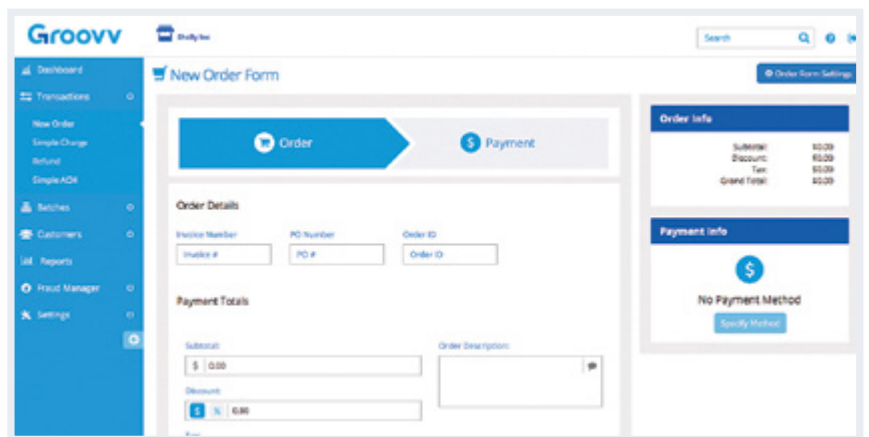

Your Fully Mobile, Omni-Channel Payment Solution

Groovv mPOS Online Payments Suite

Manage transactions from all sources through one, cloud-based interface offering:

- Virtual terminal to process mail and phone payments
- Electronic invoicing and hosted pay page to request and accept payments online
- Recurring billing and secure customer card data storage for later payments
- Inventory syncing, order history reporting, transaction voids/credits/refunds
