

TUG - RINGWOOD

GENERAL

The tug / workboat **Ringwood** (ON 803286) is a Canadian flagged tug built in 1987 and registered at St. John's, Newfoundland. The tug has operated on the East Coast of Canada for many years mostly being involved on coastal tug and barge work on marine construction projects, towage and salvage jobs, tug assist for vessel dockings and also ideal for harbour projects as the tug can position barges as well as assist with the transfer of materials & personnel. The tug can also serve as a marine shuttle from shore to project location (s).

The tug's Hull & Machinery is Lloyd's Register classed, steel hulled with a carvel flush construction type.
