

This is your receipt to reserve baby rats from future litters from Penny, Tilly, Spot or Panda. In addition to future litters from other female rats to be determined. Each deposit of \$5 shall reserve exactly 1 baby rat and is non-returnable.

Baby rats shall be adopted either singly, or in same sex groups. Rats do better with friends, so we encourage you to adopt more than 1 unless you already have a rat at home. Please consider carefully before reserving just one baby: If you later decide to adopt additional babies, you may give us additional deposits of \$5 per baby, but we may not be able to give you babies from the same litters in this case.

The total adoption fee shall be \$25 for Siamese or White without markings, and \$30 for fancy markings and colors (we have examples of each type.) Top Eared rats are \$5 less than Dumbo rats, hence \$20-25.

This agreement reflects the upcoming litters at this time, but we are always having more. Your reservation is good for these litters, and any future litters in case Noodle, Penny or Tilly didn't have the right baby for you. Please keep in mind that we cannot know the exact number of males and females in litters until the babies are old enough to sex, and markings will also not fully show until 2 weeks after birth. So, if you have a specific preference for sex, color or markings, we may need to accommodate you in a later litter than previously anticipated.

Note: if you received this form electronically, you must print it, fill it out, scan or photograph it, then email or text it to us: ocdumbos@gmail.com or 949-232-9407. We will let you know the next steps.
