Veteran's Shop Celebrates National Car Care Month!
Veteran Offers Car Care Council's 10-Point Maintenance Program

ADDISON, IL: Veteran owner John Hickey and his Hi-Tech Automotive Specialists are celebrating National Car Care Month in April. "My experience as a Machinist Mate on the USS Constellation (aircraft carrier) and USS Frank Knox (destroyer) helped me understand that the number one thing all customers appreciate, with or without stripes on their arms, is an education on their vehicle problems and the top two recommended repair choices," said owner John Hickey. "That's why we offer a discount in April on the National Car Care Council's 10-point maintenance program."

John's passion for mechanics developed during his childhood. By age 14, he had the fully developed skills of an automotive mechanic and built his first engine. By the time he volunteered to serve our country, John was the youngest to stand Top Watch in the engine room of an aircraft carrier. "I was honored to serve with men who respected my abilities," said John. "In heated situations overseas, we felt less stress knowing our team was made up of master craftsmen. And, I was glad to be one of them."

John is just as proud of the master team he's put together at Hi-Tech Automotive Specialists. His team repairs and maintains corporate fleets, family vehicles and RVs. They also have diagnostic and electrical experts that trouble

shoot quickly and accurately. But the three things their customers return for is the honest diagnosis, excellent work and a fair price.

“If you want an honest, reliable and decent mechanic, you’ll have one with John and his staff at Hi-Tech,” said customer Elizabeth B. “He provides a thorough inspection, details what needs to be done, explains why, will patiently answer any questions you have and give you a fair price.”

“We’re thankful for the numerous 5-star Yelp ratings we’ve received for educating our customers so they can make great decisions,” says John Hickey.

April is National Car Care Month and Hi-Tech Automotive Specialists are offering the Car Care Council’s 10-point maintenance program for \$49.98 (regularly \$89.95) to get customer cars ready for the summer driving season. The list of services can be found at <http://HiTechAddison.com>.

Hi-Tech Automotive Specialists are located at:

739 W. Fullerton Ave.
Addison, IL 60101
