

BETWEEN The LINES

Bee Ready

Your typical “day at the office” often puts you in contact with some of nature’s not-so-friendly animals. Spiders, snakes, fire ants, ticks, scorpions, dogs and bears are just a few critters you may encounter. Prevent injuries by:

- Being alert to the kinds of animals and insects that could harm you...and make an effort to avoid them
- Knowing how to react if you or someone else is bitten, stung or injured
- Having a first aid kit nearby to treat injuries
- Reporting the incident to your supervisor
