and Task Force Committee and REACH CYA...

THE SCIENCE BEHIND DRUGS AND ALCOHOL AND THE TEEN BRAIN

Presented by Dr. Stephen Dewey

Alcohol - Vaping - Caffeine - Nicotine - Marijuana - Opiates - Ecstasy -
Prescription Medications - Video Game and Cell Phone Use - and More!

Dr. Dewey has put virtually every drug (legal and illegal) to the test. His findings have led to a deep understanding of how the adolescent brain can be so easily and permanently altered by even occasional use. He will show actual PET scan images so parents and teens can learn the science behind the effects of these substances on the brain.

Dr. Dewey recently presented to students in the middle and high schools. Come see for yourself so you can speak confidently to your kids.

TUES, FEB. 11
7:00pm - 8:30pm
HHH HS East
Lecture Hall
Appropriate for kids 10+

Dr. Stephen Dewey
Ph.D., Neuroscientist and
Research Director,
NYU School of Medicine

Dr. Dewey has been studying the effects of addictive substances on the adolescent brain for decades. His research has been featured on 20/20, Dateline, GMA, the New York Times and more.
