

Rising Star

The ' Rising Star ' treatments represent the energy of the Sun. Science has proven that everything is energy with humans and animals ; energy fields operate inside our bodies [chakra system] and outside our bodies [auric system] . When our energetic vibration decreases , disease and imbalance can occur on physical , emotional , mental and spiritual levels .

The ' Rising Star ' is an extraordinarily powerful system sourced from an ancient Tibetan lineage * . It works by directing energy through the client's chakra system , working on the five Elements ; Fire , Water , Air , Ether and Earth so that your entire being can start to balance and heal . A single treatment starts to raise the vibration of the human energy field , to hold more Life force energy , so it can rebalance the body .

" Illness is a gift , because it always comes with a message .. Many illnesses are caused by trapped emotions . Release your emotions and you will release your illness . " Derek O'Neill

The energy work continues after the session to clear the chakra and auric systems for 21 days , moving through the 7 energy points [chakras] three times : As such 3 weeks between sessions is best . For optimal results , three sessions are recommended .

Each session promotes deeper relaxation , allowing the mind to let go , so deeper issues can be addressed .

One can receive further treatments for its relaxing and supportive affects when desired after the initial three sessions.

* The Tibetan Ascended Master Hilarion is the Chohan of the 5th Ray , the Green Ray of Healing and oversees this initiation of light .

Explanation of The ' Rising Star ' quoted from Derek O'Neill of the SQ - Foundation.org

Keep in mind , medical professionals should be consulted in all situations.

As an added piece of information regarding Healing and Human Evolution I thought I would include Deepak Chopra's perspective on Awakening .

" We all understand human evolution in environmental and biological terms. But there is also a path of human evolution that is driven by the awakening of our consciousness . This spiritual evolution of the individual is a conscious choice that we either engage with or not.

We learn that as our state of consciousness evolves , we grow in wisdom , creativity , joy , empathy and love . As our awareness expands , we step into our authentic Self , free of the constraints of the past and open to the fulfillment and happiness of the present . "

from the Chopra Center Meditations/21 Day Meditation Experience
