Experienced Cannabis Grower

Seeking position with a large indoor cannabis cultivation facility to continue my professional growth and apply my expertise to a wide variety of cannabis strains and train junior workers on techniques and preventive measures I have acquired through years of experience. Extremely motivated, passionate, productive, and a quick learner. I have a highly motivated work ethic and results-driven professionalism, recognized for commitment to excellence, with demonstrated expertise in communicating and collaborating with, peers. Extensive knowledge of soil science, plant biology and integrated pest management.

CANNABIS CULTIVATION SKILLS

- Full range of skills learned through over 15 years of hands on experience cultivating cannabis at large outdoor cultivation sites with professional expertise in indoor cultivation including sowing and transplanting, fertigation, greenhouse environment management, mechanization, sanitation, and general site management.
- Experience managing a large-scale warehouse with over 100 grow lights; scalable to over 400 grow lights. Expertise in the entire line of Gavita grow lights including the new 277 V Pulse LED product line.
- Manage integrated pest management, including preventative measures, monitoring, and treatment using organically-approved products.
- Authoritatively provide technical growing expertise, advice, and direction to team members.
- Maintain cultivation schedules; following policies and procedures; supervise co-workers to ensure the completion of daily tasks as directed.
- Maintain daily records and paperwork in an accessible, organized and compliant fashion.
- Performing opening and closing tasks; facility maintenance; keeping a clean, sanitary and positive work environment and troubleshooting as necessary.
- Perform all the tasks for an effective cultivating environment, including: cloning, transplanting, feeding plants, defoliation, super cropping, topping, flushing, foliar and preventative sprays, trimming, packaging, waste disposal and inventory management.
- Develop and/or maintain grow warehouse protocols and nutrient regiment.
- Manage cannabis plants, giving each individual plant the attention and love it needs one at a time.
- Manage plant scheduling and organization to precisely project all garden needs on a daily, weekly, and monthly basis to keep garden green and expenses low.
- Cataloging and analyzing each individual strain from clone to flower to harvest.
- Execute preventative maintenance and elimination of all types of mold, powdery mildew, spider mites, root aphids, fungus, etc.
- Mastery of various growing methods including micronutrients, beneficial bacteria and nutrient implementation.

Katherine Suter was brought in to solve a host of issues from humidity control to layout of our light placements. She implemented a CO2 immersion system for 4,000 square feet of canopy space. Our results were fantastic and the yields were outstanding. She was worth every penny we spent on her expertise and my partners were very pleased. It was a very strenuous environment before her arrival. She was able to get the entire team and the investors rowing in the same direction. I highly recommend "Kat" and feel free to me for a reference (702) 250-5608"

Dean Homayouni

"...I have known Katherine for many years and enjoy our discussions concerning Total Living Organics ("TLO"). Her expertise is the result of over a decade of hands on experience. She helped me move a significant amount of end product before it became stale. Her calm personality makes her a joy to be around ..."

Robert Fields

“...During the entire cultivation process Katherine provided me with invaluable advice and was always there to answer my phone calls. We discuss numerous issues she performed on behalf of my companies. I have no hesitation to call Katherine since I know she will always give me straight talk and not beat around the bush. It does not matter if it is a weekday, weekend or 10:00 pm, she always answers the phone and is prepared to discuss issues in detail. I consider her to not only be a trusted confidant but also a trusted friend.

Caddie Mike, Owner of Greenhouse Collective.

- Working knowledge in container systems with soil, coco, rockwool, hydro as well as understanding temperature and humidity control.
- Expert knowledge of plant diseases, insects and fungi, as well as plant treatment options.
- Comprehensive knowledge of Strains; Sativa, Indica and Hybrids and mastery of medicinal implementation and knowledge of effects of strains and types of medicinal administration.
- Ensure proper climate control is being maintained in all greenhouse and indoor facilities for growing and acclimation.
- Budgeting, ordering, and supply sourcing.
