Conference Objectives

Learn to protect frail elderly patients from exposure to COVID19 based on emerging best practice. Increase knowledge in wound care, oral hygiene, and geriatric ophthalmology. Understand the differences between hospice and palliative care. Be competent in the medical management of dementia at the end of life. Identify recent advances in the care of elderly that may result in practice change.

Be knowledgeable about the risks of polypharmacy in frail elders, and the role of deprescribing. Learn emerging recommendations and new research in geriatric pharmacotherapy including medical marijuana and opioid alternatives.

Recognize the most common causes of Medicare fraud, error, and abuse in the state of Texas. Identify gaps in the identification of elder mistreatment and how to resolve those gaps. Evaluate and counsel patients at risk for driving safety. Learn how to be a medical expert witness.
