Law 82C – Director’s Error

The TD deems both sides as non-offending. This does not imply that both sides need to get a good score. If the TD makes a wrong ruling and one side is playing in a part score where it should be in a game, with the bidding error not being related to the original infraction, the adjusted score may involve an extra trick (or two), but not an upgrade to game. This means that the TD should try to find an assigned adjusted score and possibly a split and/or weighted score.
