Plasma Frequency Health Systems

Benefits of Plasma Therapy

Plasma is known as the 4th State of Matter or Plasma is the first state of matter from energy. It's kind of like an interface between matter and energy. We call it the Bridge between Matter and Consciousness.

Plasma is energy that has an non-polarized field created through magnetic and gravitational fields which creates a torus field which is an open source field – a field of creation.

This 9m field radius addresses the entire body in a non-invasive approach. It not only targets the pathogenic microorganisms but helps bring the entire body to a level of homeostasis – strengthening the immune system, detoxing, cleaning the organs, increasing vital force, reducing stress/inflammation and creating an ideal non-acid environment inside and outside of the body for optimal health and beneficial change.

We use a precise quantum generator to deliver frequencies safely to your entire body at the deepest cellular level.

Why Plasma Technology?

Countless case histories have proven that the right mixture of signature frequencies can effect the human body: including responses to viruses and parasites, immune deficiencies, increased metabolism, heart rate variability, reduction of inflammation, treatment of degenerative diseases, and natural pain relief.

Plasma is a Sacred Technology delivered to us from outside of this planet surface. The Plasma Technology is really a 4th State of Matter akin to love – its when we are working beyond the physical – its the non duality field. It is the love vibration that helps facilitate the big LOVE.

Plasma Technology along with the other priceless technologies offered by Energy Wellness Partners, are healing the Planet of disease, imbalance, toxins, and providing the frequency to regenerate, rebalance, and cleanse our bodies, our environment, our natural resources and our agriculture. The blueprint for healing is created now.
