PEMF (Pulsed Electromagnetic Frequency)

ACCELERATED REPAIR OF
BONE & SOFT TISSUES

IMPROVED CIRCULATION

REDUCTION OF PAIN
& INFLAMMATION

IMPROVED BLOOD &
TISSUE OXYGENATION

MUSCLE RELAXATION

IMPROVED ENERGY

IMPROVED BALANCE OF THE
IMMUNE SYSTEMS

STIMULATION OF RNA & DNA

IMPROVED BLOOD PRESSURE &
CHOLESTEROL LEVELS

PROMOTING WELLNESS FOR
CANCER CLIENTS*

*FDA CLEARANCE FOR BRAIN CANCER, HOWEVER WE
PROMOTE WELLNESS FOR ALL CANCERS

PEMF (Pulsed Electromagnetic Frequency)

Pulsed Electromagnetic Frequency Therapy:

Pulsed Electromagnetic Field Therapy (PEMF) is a regenerative technique that is used to stimulate cellular repair. Clinical evidence shows that PEMF therapy reduces pain associated with trauma from accidents, sports injuries, surgeries and burns as well as from disease and degeneration. PEMF therapy improves these conditions in many different concurrent ways including mechanical, chemical, electrical and magnetic processes within the cells of the body.

Perhaps the easiest way to understand PEMF is to think in terms of each cell in your body as if it were a little battery. Like with any battery, sometimes your cells become tired and worn, whether due to age, stress, overuse, or damage, making it more difficult for them to fight off any type of potentially damaging force or illness.

Through PEMF therapy, your batteries (i.e. your cells) essentially become recharged. The energy supplied via PEMF waves gives them the energy they need to ward off whatever is threatening them, whether it's a trauma or disease-based threat. This makes it easier for your patient's body to restore its health naturally, simply by using the electrical currents and impulses that are already interacting within and throughout their cells. In essence, high-powered PEMF is like a "battery recharger" for your depleted cells.

PEMF (Pulsed Electromagnetic Frequency)

Pulsed Electromagnetic Frequency Therapy:

Benefits of PEMF: Reduction of pain and inflammation; improved energy; improved circulation; improved blood and tissue oxygenation; accelerated repair of bone and soft tissues; muscle relaxation; improved blood pressure and cholesterol levels; improved balance of the immune systems; stimulation of RNA and DNA; promoting wellness for Cancer Clients (*FDA has given clearance for Brain Cancer treatment, however we promote wellness for all cancers.) PEMF can be utilized for wellness and healing modalities for both humans and animals, visit our Pets and Animals page to learn more about PEMF and Animals.

PEMF/RIFE (Electromagnetic Frequency)

Who Can Use PEMF/RIFE Technology

PEMF and RIFE therapies are safe to be used by adults, children, and animals. The only limitation is for anyone with a pace-maker.

Please visit our Animals/Pets page on our website for more information on treating animals/pets with PEMF. We offer PEMF treatment services to animals and also have PEMF products available through our online healing store.

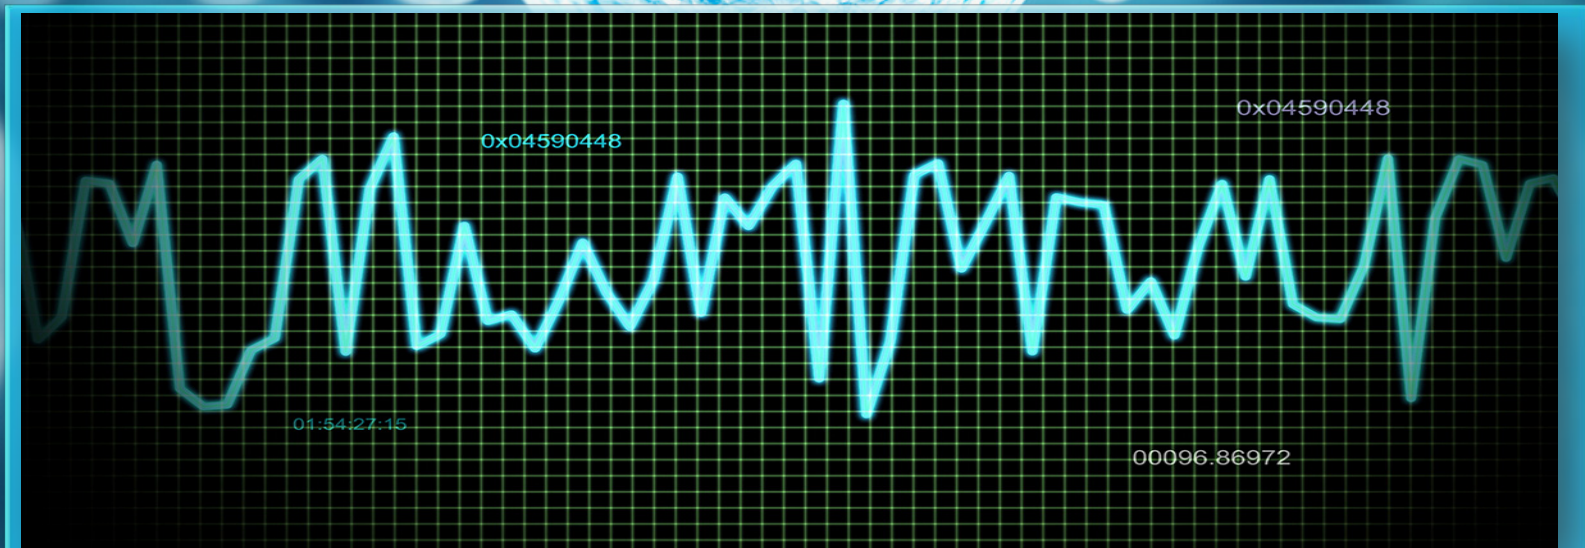

Today, in the US, the FDA has approved tool in the treatment of the following:

- ✦ 1979- FDA approved PEMF therapy for stimulating bone growth.
- ✦ 1987- FDA approved for adjunct therapy for treating post-operative edema and pain.
- ✦ 2004- PEMF is now used as an adjunct to cervical fusion surgery.
- ✦ 2008- Approved for treatment in DEPRESSION for patients unresponsive to medication.
- ✦ 2011- FDA approved PEMF Therapy for treatment of brain cancer.

RIFE (Electromagnetic Frequency)

RIFE Therapy:

A Rife Machine uses the principles of Royal Rife, a brilliant scientist who lived during the last century. He discovered that micro-organisms can be destroyed using frequencies. He performed thousands of experiments, each proving that cancer has a viral cause, and that damaging this virus usually resulted in a cure. As a final test, the University of Southern California appointed a Special Medical Research Committee to bring terminal cancer patients from Pasadena County Hospital to a San Diego lab and clinic for treatment. The team included doctors and pathologists assigned to examine cadavers and any patients still alive in 90 days. After 90 days, the Committee found that 86.5% of the patients had been cured. The treatment was then adjusted and the remaining patients also responded within four weeks. The total recovery rate was 100%.

RIFE (Electromagnetic Frequency)

RIFE Therapy:

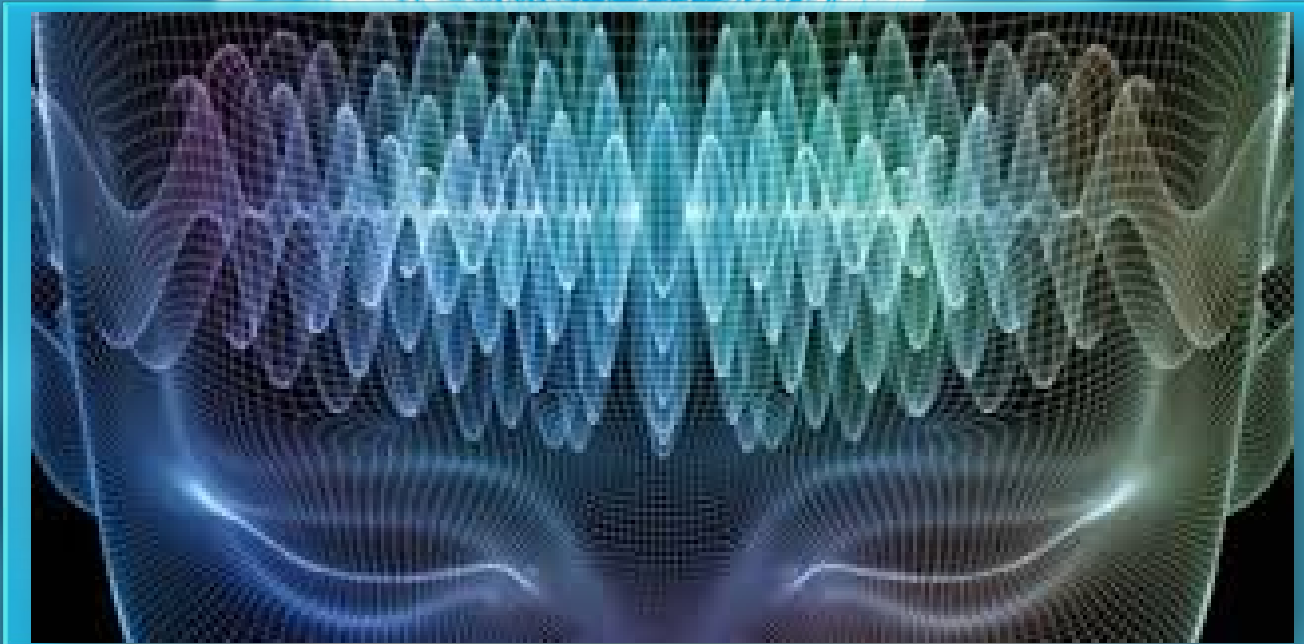

Rife machines work on the principle of sympathetic resonance, which states that if there are two similar objects and one of them is vibrating, the other will begin to vibrate as well, even if they are not touching. In the same way that a sound wave can induce resonance in a crystal glass and ultra-sound can be used to destroy gallstones, Dr. Rife's instrument uses sympathetic resonance to physically vibrate the cells of the parasite resulting in possible elimination. Vibration between two objects can be seen in everyday life, from a tuning fork to a guitar string. The destructive capabilities of resonance have been widely demonstrated, for example when an opera singer hits a particular note and breaks a glass. In this instance the musical tone sets the glass in motion, and as the motion builds the glass shatters. The pulsed wave used in the Rife system produces a mechanical vibration, whereby the low amplitude input leads to a large amplitude vibration in the target. If the induced resonant vibration is intense enough, the target cell, tissue, or molecule will be destroyed.

RIFE (Electromagnetic Frequency)

RIFE Therapy:

Remarkably, Rife machines have been around for almost 100 years. These Rife machines had astonishing successes. In 1931, 44 top doctors celebrated “The End of All Disease”. Unfortunately, “the end of disease” did not fit the business model of other companies who preferred to “manage disease” instead. It makes better business sense to have a regular income. So the early Rife machines and documentation were destroyed. Recently, there has been a revival of interest. People are rediscovering the effectiveness of Rife treatments. They are learning to take control over their own health, and end the spiral of drug dependency.
