Quantum BrainTap

BRAINTAP 

Quantum BrainTap

Quantum Braintap Technology: The BrainTap is a mind-based medicine tool. The BrainTap uses specialty glasses equipped with pulsating lights that combine with rhythmic beats and creative visualization/relaxation (CVR) sessions to help you become motivated, think clearly, stay focused, and easily recall what you've learned.

Quantum BrainTap

BrainTap frames are used in clinics throughout the world for things such as weight loss, pain management, sleeping disorders, depression, anxiety, smoking cessation, post-traumatic stress disorder, and many other protocols. They are a highly effective tool that combines light therapy (visual component) and neurolinguistic programming (auditory component delivered in alpha and theta frequencies) to strengthen or create new neural pathways. Whether you want to overcome stress eating, conquer a bad habit, instill a positive mindset, retain more information in memory, advance your career, or master a sport, enhance learning, write the Great American Novel, get your body super fit or simply regain your health and vitality, the benefits are endless with BrainTap and the technology is affordable to be prescribed at home following 4-6 weeks of use at our Centers.
