The Ultimate Natural Health & Wellness Box

Chaga Mushrooms

2

Chaga mushrooms are known for benefits of the following:

- Immunity booster
- Slowing the aging process
- Lowering cholesterol
- Preventing and fighting cancer
- Lowering blood pressure
- Supporting the immune system
- Fighting inflammation
- Lowering blood sugar

Organic and Wildharvested in Western Maine

4 Oz Bag – Reuse Chunks for 120+ Cups

Monoatomic Etherium Gold

3

Etherium Gold (Focused Brain) is the only monatomic gold product whose efficacy has been clinically researched and tested to promote brain function.

Benefits Include:

- Many people experience enhanced mental clarity, greater mind-body coordination, improved learning.
- Promote greater mind-body integration
- Well suited to individuals beginning to open to higher consciousness and a path of spiritual transformation
- Works well whenever increased mental focus is essential
- Positive enhancement of alchemy and brain function
- Etherium Gold operates electromagnetically to harmonize the two hemispheres of the brain.* This action helps the brain's beta and alpha waves. High beta waves are associated with greater stress. Alpha brain waves are associated with clearer thinking and greater tolerance for everyday stressful situations. Alpha brain waves also stimulate imagination. Increases high beta wave activity and alpha-wave activity, Etherium Gold has helped many with mild absentmindedness and nervous irritability.
- Biofeedback Analysis Shows Etherium Gold Promotes "Whole Brain" Process and EEG measurements show Frequency Band Activation and Brainwave frequency balancing.

Organic, Non-GMO

60 Capsules or 1 oz Powder

Monoatomic Etherium Black

4

Etherium Black (Re-action Neutralizer) is classified as a non-herbal adaptogen. An adaptogen is a substance that returns the body to its normal state (homeostasis) after an environmental disruption and improves the body's resistance to stress.

- Etherium Black is capable of detecting electromagnetic imbalances within any organism and neutralizing the waves and particles causing any disturbance. It is equally effective with thoughts, emotions, and physical imbalances.
- Etherium Black is quite effective in supporting general detoxification.
- Etherium Black benefits your respiratory and immune systems. The beauty of substances that work electromagnetically rather than biochemically is that their effect is immediate.
- Promotes Stress Relief and Relaxation

Organic, Non-GMO
60 Capsules or 1 oz Powder

Toxin Therapy

5

Toxin Therapy contains the highest quality ingredients and is formulated to support the body with heavy metal removal and provide broad-spectrum protection against environmental contaminants.

- Toxin Therapy is formulated to support the body in dealing with heavy metals and other neurotoxins. It may also offer protection from the increasing levels of contaminants that are occurring throughout the planet including damage caused by both acute and chronic radioactive damage.
- Toxin Therapy consists of botanicals that chelate to heavy metals, supporting their removal from the body. Taken with meals, it may help prevent heavy metals from being absorbed into the body from the food being ingested.* Taken between meals, it may chelate heavy metals.* Toxin Therapy may be one of the best dual purpose dietary supplements available today.*

Toxin Therapy contains a synergistic blend of the following:

- *Chlorella regularis* - a soft cell chlorella that may chelate heavy metals superior to broken cell chlorella. It is one of the purest chlorellas available.
- Chlorella has been touted as one of the most powerful heavy chelation agents known to man by some.* In 1973, the Pharmaceutical Society of Japan released a report that chlorella increased the elimination of cadmium threefold in feces and sevenfold in urine. Other researchers from Japan showed that chlorella helped detoxify uranium and lead (Horikoshi et al. 1979).

Organic, Non-GMO – 60 Capsules

High Octave LifeSource Supersprouts

6

LifeSource SuperSprouts were created with one thought in mind: gathering the purest, nutrient-dense foods on the planet that have phytochemicals that, according to research, help the body age better.* They have everything the body needs to enjoy optimal health.* LifeSource SuperSprouts combine the most powerful superfoods with organic sprouts. These super sprouts provide the life force energy that gives birth to the entire plant kingdom, providing the spark that bursts new life to a new plant.

Planktons

Plankton are the genesis of all life. Life as we know it is only possible through the miracle of photosynthesis, the reaction of sunlight, water, and carbon dioxide. Plankton are considered the first link in the food chain, and they provide every nutrient the body needs to live. Nutritionists often claim that these micro-algae are the perfect food. Plankton are abundant in metabolic pigments, including chlorophyll, phycocyanin, and carotenoids, like alpha and beta carotene. Chlorophyll supports healthy blood flow, supports general body detoxification, and strengthens immune function.*

Organic Golden Flax Seed Sprouts

Golden flaxseed is one of the most nutritious seeds on the planet. It is loaded with essential fatty acids, but most people don't know that flaxseed also has a high concentration of enzyme inhibitors, making it difficult for the body to absorb. Sprouted flaxseed allows your body to absorb all the vital nutrients, enzymes, amino acids, and vitamins. In fact, the process of germination fundamentally changes the nutrient composition of the seed.

Vegetarians and other non-fish eaters are typically deficient in eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). DHA is a major structural component of the mammalian brain and the most abundant essential fatty acid in the brain. It is one of the main reasons that fish has a reputation for being brain food. The acid supports normal development in the brain, eyes, and nerves and has been shown to reduce stress and frustration.

High Octave LifeSource Supersprouts

7

Organic Amaranth Seed Sprouts

Amaranth was the staple food of the Aztec Indians and was called the “golden grain of the Gods.” It is high in protein and dietary fiber.*

Organic Broccoli Seed Sprouts

The broccoli sprout is one of the most researched natural ingredients for its powerful properties. Broccoli sprouts contain a phytochemical called glucoraphanin and an enzyme called myrosinase, both of which are precursors to sulforaphane.

Organic Quinoa Seed Sprouts

Quinoa is 18% protein and has the most balanced amino acid profile of all grains. Most grains lack lysine and, therefore, cannot biosynthesize into a complete protein. Quinoa is an excellent source of dietary fiber and is high in phosphorus, magnesium, and iron. Quinoa’s high magnesium content perfectly balances the high calcium in chia seeds.

Organic Black Chia Seed Sprouts

Chia seeds are the richest non-marine source of omega-3s and dietary fiber. As a result, they promote cardiovascular health by promoting healthy blood pressure and maintain cholesterol and triglyceride levels that are already in the normal range.* Chia seed has six times more calcium than milk, so they also contribute to strong bones and assist in joint function.*

Chia seeds contain powerful phenolic antioxidant properties.

Chlorogenic acid is an important intermediate in lignin biosynthesis. This antioxidant also slows the release of glucose into the bloodstream after a meal. Caffeic acid is also important in lignin biosynthesis and outperforms other antioxidants in immunotherapy.*

Organic, Non-GMO – 4 oz Powder

Advanced Colloidal Defense

8

Colloidal Defense is a highly effective product that combines gold, silver, and silica into a specific combination that has been shown as an effective colloidal for immune function.* Traditional colloidal silver products rely solely on the properties of silver, often incorporating significant levels of silver for effectiveness. The fact is, too much silver is toxic to the body.

Colloidal Defense uses relatively small amounts of gold and silver. We find that this specific combination is more effective than high amounts of silver alone. Gold potentiates the effects of silver, while silica stabilizes the electromagnetic frequency created by the combination. It is this frequency that supports the immune function.*

Organic, Non-GMO
2 Fluid Oz.

Advanced Colloidal Gold

9

The more we study gold, the more we become mesmerized by its potential to transform human health. Many ancient cultures consumed trace amounts of gold to achieve higher states of consciousness and spiritual awareness.

Scientists now reveal that the genesis of all life is a supernova, so there's some truth when we are told we are children of the stars. Many believe gold has a frequency that reconnects us with the stars. When we consider gold as the element to which all other physical things are valued against, is its intrinsic value born from these metaphysical or esoteric properties just as much as its physical attributes? We believe this to be true, and we believe that consuming trace amounts of gold will eventually give you higher spiritual experiences.

Many ancient cultures pursued gold for its spiritual benefits. The Conquistadors pursued the trails of gold all though the Andes looking for El Dorado and the Fountain of Youth. El Dorado literally means "the Golden One." The people of Mesopotamia, Egypt, and Israel possessed knowledge of an alchemical process to not only make gold from lower elements (the Philosopher's Stone), but also to transform gold into a high-spun, monatomic state, which was used to attain higher sates of consciousness.

- Scientists have used colloidal gold as a cell maker as it naturally stimulates cellular growth.
- Increased IQ and Cognitive Function Benefits
- Fast Acting Joint Health Support
- Increased ability to perform activities, both physical and mental

Organic, Non-GMO
2 Fluid Oz.

Manuka Honey

10

Manuka honey is used as a natural ointment for wounds of all kinds. It has been hailed as a go-to germ fighter in an age of resistance to conventional antibiotics. Proponents also claim that Manuka honey can treat other conditions from acne to sinus issues, viruses, bacteria, infections, and more.

- When it comes to superfoods, raw honey is associated with health benefits. Manuka isn't a raw honey, but it is specialized. It's antibacterial and bacterial resistant. This means that bacteria shouldn't be able to build up a tolerance to its antibacterial effects.
- Antibacterial and Antiviral properties - All kinds of honey have been used as natural antibiotics throughout the centuries. In recent years, researchers have discovered that honey's power to kill germs comes from hydrogen peroxide produced with the help of a bee enzyme.
- Helping heal cuts, scrapes, and wounds
- Clearing infections, viruses, strep/sore throat
- Easing stomach aches
- Improving digestion – eat 1 to 2 tbsp/day
- Boosting the immune system
- Providing energy
- Skin care - Manuka honey may be able to reduce inflammation and irritation associated with acne and eczema. To do this, apply Manuka honey directly to the skin. Be sure to cover the affected area with a thin layer of honey (15 minutes to 1 hour).

New Zealand Honey Co. Raw Manuka Honey UMF 15+ | MGO 514+, 8.8oz / 250g

Black Seed Oil

11

People have used black seed oil for its therapeutic benefits for thousands of years. Studies suggest that this oil may offer many health and cosmetic benefits, such as aiding weight loss, improving skin conditions, and even treating cancer and diabetes.

Black seed oil contains thymoquinone, which is an antioxidant and anti-inflammatory compound that may also have tumor-reducing properties.

Benefits of black seed oil:

- Benefits and aiding for weight loss
- Benefits for the skin including eczema, acne, and psoriasis
- Cancer - Recent studies have shown that the thymoquinone in black seed oil can influence programmed cell death, or apoptosis, in several types of cancer cell. These include brain cancer, leukemia, and breast cancer cells.
- Liver and kidney function - According to a 2013 study on rats, black seed oil may reduce liver and kidney disease complications and improve the organ structures. Researchers do not know if these effects would also occur in humans.
- Diabetes - According to an article in the Journal of Endocrinology & Metabolism, black seed oil may have antidiabetic properties and improve blood sugar levels. Again, this study used animal models, so more research is necessary to confirm the effectiveness of the oil in humans.
- Infertility - A placebo-controlled clinical trial on men with abnormal sperm and infertility has found that black seed oil can improve sperm movement and increase sperm count and semen volume.

USDA Certified - Cold Pressed, Virgin, Unrefined, Vegan, Non-GMO, No Preservatives - Pure Nigella Sativa - 4oz Liquid

Organic Raw Apricot Seeds

12

Bitter apricot seeds, also referred to as apricot kernels, are the most potent source of B17 (amygdalin). In each Apricot Power apricot seed, there are on average 20mg of B17. B17 is known for its connection to an impressive variety of potential benefits for human health:

- Various Cancer-Fighting Benefits
- Antioxidant Properties
- Dietary Fiber and Digestive Health
- Lower Blood Pressure and Improved Heart Health
- Reduces Effects of Inflammation and Arthritis
- Supports Vision and Eye Health
- Supports Liver Health
- Boosts Immune System Defense
- Supports Mental Health
- Supports Bone Health
- Supports Skin Health and Anti-Aging
- Supports Muscle Repair and Growth
- Supports Hair Health and Growth
- Respiratory Health
- Oxygenation, and Exercise Endurance

What is Vitamin B17 (Amygdalin)?

Vitamin B17, also referred to as amygdalin, is a naturally occurring nutrient found in many nuts, seeds, and plants. B17 is most potently found in apricot seeds, but it also exists in apple seeds, lima beans, clover, sprouts, some berries, and eucalyptus leaves. Apricot kernels contain the chemical compound amygdalin. Amygdalin has been linked to highly successful cancer-fighting benefits. Under its various names, amygdalin has been claimed to hold various cancer-fighting benefits and suggests that because amygdalin is converted into cyanide in the body, the cyanide works to destroy cancer cells within the body. This is also said to prevent the growth of tumors.

Organic Raw Apricot Seeds

13

1. Apricot Seeds are Rich in Fiber, which Supports Digestive Health

Dietary fiber, or fiber consumed by eating vegetables, fruits, nuts, and seeds, plays a major role in the function and health of digestive system organs. Fiber keeps your colon healthy, while regulating the digestive tract and processes. Eating a diet high in fiber may improve regularity of bowel movements and help control excess gas and bloating. Fiber is often used to treat gas, diarrhea, and constipation, and it may be consumed regularly to help prevent digestive irregularities.

2. Apricot Seeds Contain Thiamine and Omega-3 Fatty Acids, which May Lower Blood Pressure and Improve Heart Health

Apricot Seeds contain high levels of Thiamine, also known as Vitamin B1, which some research shows may help lower blood pressure and maintain heart health.

Thiamine may encourage pump (systolic) and fill (diastolic) pressure to and from the heart, possibly aiding in the prevention of congestive heart failure.

Furthermore, in a study conducted in New Zealand, results showed that Thiamine may have beneficial effects on lowering the blood pressure levels in individuals with early stage hypoglycemia.

Apricot Seeds also contain Omega 3, an essential fatty acid that the body cannot produce on its own. According to Harvard University, Omega 3 may improve circulation and lower heart rate.

Organic Raw Apricot Seeds

14

3. Apricot Seeds May Reduce the Effects of Inflammation and Arthritis

Apricot seeds are also known for their potential to reduce inflammation. Research shows that the fiber content within the seeds may trap acid and other toxins in the body and assist in their removal.

Studies display that apricot seeds may even support extreme cases of inflammation like arthritis. In a South Korean study conducted on rats with arthritis, apricot kernels were successful in reducing pain associated with arthritis.

4. Zinc in Apricot Seeds May Support Vision and Eye Health

Apricot seeds contain a considerable amount of the essential trace mineral Zinc. Zinc is found in high traces in healthy human eyes.

Zinc plays a vital role in transporting Vitamin A to the retina in order to create melanin. Lack of Zinc has been linked to poor night vision, cloudy cataracts, and age-related macular degeneration. Studies show that consuming 40 to 80mg of Zinc per day may slow the progression of age-related macular degeneration.

5. Vitamin B17 May Support Liver Health

B17 may promote liver health and may help reverse some of the effects of autoimmune hepatitis, a disease characterized by inflammation of the liver. In a study where adult mice were injected with the virus, the group treated with B17 saw significant changes in healthy T-cell growth and a decline in disease.

Organic Raw Apricot Seeds

15

6. Vitamin B17 May Boost Immune System Defense

Vitamin B17 is best known for its immune defense properties. Studies have shown that B17 may help boost immunity by slowing down the spread of illness throughout the body by killing harmful cells.

7. Omega-3 Fatty Acids Found in Apricot Seeds May Support Mental Health

Omega-3 fatty acids found in apricot seeds may improve mental health in adults. Studies have shown that omega-3 may reduce mood swings, bipolar episodes, schizophrenia relapses, and violent behavior in individuals with psychiatric disorders.

Further, research has also linked regular intake of omega-3 with an increased resistance to age-related mental decline and diseases such as Alzheimer's Disease.

8. Calcium Found in Apricot Seeds are Essential to Bone Health

Apricot seeds contain the bone-building mineral calcium. Calcium is an essential nutrient that your body cannot produce; it is thus vital to your health to consume enough calcium daily.

Calcium contributes to bone health by helping to regenerate bone cells and increasing bone density. A deficiency of calcium can lead to brittle bones that are prone to injury.

Organic Raw Apricot Seeds

16

9. B17 and Zinc Found in Apricot Seeds May Ease Ear Pain

As discussed, B17 has inflammation-suppressing qualities that may dull the effect of ear pain by trapping acid and toxins in the body and assisting with their removal.

Additionally, the Zinc present in apricot seeds may help fight ear infections and disease. This micronutrient helps activate and produce T-cells, which are our bodies' defender cells that recognize and destroy bacteria, viruses, and other harmful diseases.

10. Apricot Seed Oil is Widely Used to Support Skin Health

Apricot seed oil is rich in essential fatty acids (oleic and linoleic), vitamins A and E, and can moisturize and nourish skin; especially for dry and mature skin. It is widely used in cosmetics; especially in creams, soaps, and skin lotions.

The oil is easily absorbed by the skin and will not leave an oily residue. It is, therefore, popular as a massage oil and as sunbathing oil.

11. B17 is Considered an Anti-Aging Agent for Skin

Akin to its immunity boosting and anti-inflammatory properties, B17 is thought to protect against and assist in the removal of free radicals that cause damage and age the skin. Consuming B17 or using B17-infused skincare products may help promote healthy, youthful skin and skin cell regeneration.

Organic Raw Apricot Seeds

17

12. Protein in Apricot Seed May Support Muscle Repair and Growth

Apricot seeds are composed of a significant amount of protein and amino acids, which are essential for muscle repair and growth. Daily consumption of 10 apricot seeds spread throughout the day can contribute up to 20-25% of the daily recommended amount of protein for men and women.

13. Apricot Kernel Oil Uses for Hair Health

Apricot kernel oil is often used in hair care routines to promote moisture and stop rapid hair loss.

The essential fatty acids and vitamin A and E may help heal dry scalp and promote shine and moisture in hair follicles. Additionally, some people attest that rubbing the oil into their scalp helps prevent hair loss and fosters hair regrowth in cases of balding.

14. Iron and Phosphorus in Apricot Seeds May Decrease Tiredness and Fatigue

Apricot seeds contain considerable amounts of the minerals iron and phosphorus which both assist in the maintenance of energy and reduction of tiredness and fatigue.

Iron helps promote blood volume and oxygen levels, leaving our bodies healthy, strong, and energetic. Phosphorus has a direct relationship to energy production in the body. A deficiency of either of these nutrients may lead to fatigue, muscle weakness, and may cause slow downs in the normal functioning of your body systems.

Organic Raw Apricot Seeds

18

15. Apricot Kernels Used to Support Respiratory Health

Apricot kernels have been used in Traditional Chinese Medicine to support respiratory health for centuries.

Studies show that active ingredients in apricot seeds may act as expectorants, or substances that increase airway secretions, by increasing water content. Increased water content allows the body to expel disease that can cause inflammation, infection, asthma attacks, allergic reactions, and other respiratory issues.

16. Apricot Seeds Antioxidant Properties

Apricot seeds contain a high content of phenols and alpha tocopherol - a fat-soluble form of vitamin E, which studies show may have antioxidant effects.

In a study published by the Journal of Agricultural and Food Study, when these compounds came into contact with free radicals, phenols and alpha tocopherol was shown to lower the presence of these toxic substances.

17. Vitamin B-15, or Pangamic Acid, and Exercise Endurance

In addition to its high content of B-17, apricot seeds are also a great source of vitamin B-15, also known as Pangamic Acid. B-15 may increase oxygenation of the heart, brain, and other vital organs. For this reason, it is often used to increase athletic performance and endurance.

Bitter Apricot Seeds - Pesticide and Herbicide-Free, Non GMO, Vegan - Harvested in Turkey - 16 oz.
