

**DAMAGE RELEASE WAIVER FOR TILE AND/OR METAL ROOFING, PLANT DAMAGE,
NEIGHBORS RELEASE, CAT DISCLOSURE, AND GAS RESTORATION**

EMERGENCY PHONE NUMBER (866) 891-3863 FAX NUMBER (866) 837-3863

ROOFS

We will be fumigating your structure for the control of drywood termites. In order to put the tarps on the structure we must walk upon your tile and/or metal roof surface. Due to the fragile nature of these roof surfaces and the weight of the tarps, DAMAGE WILL OCCUR to your roofing system. We will do our utmost to ensure damage is kept to a minimum. Keep in mind the roof must be walked upon when it is covered with the tarp preventing us to see where we are stepping, DAMAGE WILL OCCUR. Mega Fume, Inc. and/or your licensed termite company assume no responsibility or liability for damage roofing during the fumigation process. By signing below, you certify that you have read and understand the above text and will assume all responsibility and liability for damaged roofing.

PLANTS

We will be fumigating your structure for the control of drywood termites. In order to put the tarps on the structure we will damage your plants. Due to the fragile nature of plants and the weight of the tarps, DAMAGE WILL OCCUR to your plants. We will do our utmost to ensure damage is kept to a minimum. Keep in mind when the structure is covered with tarps, plants under or adjacent to the tarps will have damage. Mega Fume, Inc. and/or your licensed termite company assume no responsibility or liability for damage to your plants during the fumigation process. By signing below, you certify that you have read and understand the above text and will assume all responsibility and liability for damaged plants. Also, you are aware that our tarps will be on your property during the fumigation.

NEIGHBORS RELEASE

We will be fumigating your neighbor's structure for the control of drywood termites. In order to put the tarps on the structure we will need to place tarps and sand bags on your property. If plants are within 4-6" of this area DAMAGE WILL OCCUR to your plants. We will do our utmost to ensure damage is kept to a minimum. Keep in mind when the structure is covered with tarps, plants under or adjacent to the tarps will have damage. Mega Fume, Inc. and/or your licensed termite company assume no responsibility or liability for damage to your plants during the fumigation process. By signing below, you certify that you have read and understand the above text and will assume all responsibility and liability for damaged plants. Please keep gates unlocked during these dates and keep all pets and children out of the yard and away from tarps during this process.

CATS

As you prepare your home for its upcoming fumigation, we wanted to remind you of a sometimes-overlooked family member- your cat. Cats are unique pets as they have a propensity to come and go as they please. Unlike a dog, cats prefer to be left with little to no attention to them. Having this freedom causes a variety of reactions when your pet becomes stressed. You may have noticed that as their environment changes or as a stranger enters their environment your cat may act odd or run and hide in a familiar place and sometimes will find a new hiding place. They entire fumigation process beginning when you start to prepare your home may cause your pet to hide more, sometimes making them impossible to find prior to the home being fumigated. Sometimes the homeowner is so distracted in completing their preparations that they forget to remove their pet. The unfortunate ending is the loss of a love one. Our fumigation company hopes to prevent this from happening to your family and hope to remind you to remove your pet from the property during the entire fumigation process.

* Even if you do not own a cat, you may have a neighbor whose pet roams the neighborhood. To help reduce the chances of their pet entering the structure during the fumigation process, we strongly recommend that you communicate you fumigation dates with your neighbors and close off any openings to spaces that would allow domestic animal access, such as exterior sub area vents, access openings or additional vents.

Our fumigation company utilizes chloropicrin (tear gas) as a warning agent and Sulfuryl Floride gas during every fumigation. The Sulfuryl Floride label states: "Remove from the structure to be fumigated all persons domestic animals, pets (including fish) and desirable growing plants." Cats are capable of ignoring the extreme physical distress of chloropicrin exposure and will not leave their hiding place to alert a fumigator of their presence before the Sulfuryl Floride gas is introduced. Fumigators depend on you to help prevent a tragedy from occurring.

Please keep gates unlocked during these dates and keep all pets and children away from tarps during this process.

GAS RESTORATION

"The Gas Company" prior to any fumigation must shut off the natural gas service. It is the owner or tenant of the property responsibility to restore the natural gas service to the structure. There must be an adult at the property for this appointment.
