

Free Pattern: All Kinds of Bibs

Bib A

Bib B

Bib C

Bib Styles A & B

Materials Required:

Thread, Clear Tape, Fabric 15" x 11" (w), Contrasting Fabric 4" x 11" (w), *1 Pkg. Double Fold Bias Binding 1/4" wide (makes 2 bibs), 1 Set size 14 Snaps or 1" Square or Disk of Hook & Loop Tape.

Suggested Fabric:

Oil Cloth, Flocked Vinyl (such as an old or new tablecloth), Vinyl-backed Terry

*These bibs can be serged with woolly nylon thread instead of being bound with bias tape. A three0thread serged stitch with a length of at least 2.5 is recommended.

Step 1: Cut out the pattern pieces and tape them together. The pocket pattern piece is marked on the main pattern; trace it onto a separate sheet of paper.

Step 2: Cut one bib piece out of the main fabric and one pocket piece out of the contrasting fabric.

Also cut a small facing piece for the rounded end of the bib where the fastener will be applied. The pointed end doesn't need facing unless you serge the edges instead of use bias tape.

Step 3: Apply the bias binding to the straight edge of the pocket. Using a straight stitch or medium zigzag, sew the binding onto the pocket.

Step 4: Pin the facing piece to the bib, wrong sides together. Pin the pocket in place.

HINT If using vinyl, be sure to pin in the seam allowance so the holes won't show later.

Step 5: With the right side of the bib facing upwards, and starting at the pointed end, apply the bias binding in the same manner as it was applied to the pocket. Sew all the way around the bib, leaving a 1" long tail of bias binding at the end.

Step 6: Apply snaps according to manufacturer's directions, or sew on hook and loop tape. The snap stud or hook tape is applied to the right side of the fabric on the pointed end with the 1" tail of binding folded to the wrong side for facing. The snap socket or loop tape is applied to the wrong side of the fabric on the rounded end of the bib.

Bib Style C

Materials:

Thread, Fabric 9" x 16" (w), Double Fold Bias Binding 1/4" wide, Optional Trim: Lace 5/8 yd., Ribbon 1/4 yd., Embroidery Thread

Suggested Fabric:

Any absorbent woven or knit, such as cotton flannel, interlock, jersey, terry.

Step 1: Cut two bib pieces, 24" of bias binding, and, if desired, trim. For more decorative options, see Step 6 at the end.

Two coordinating fabrics can be chosen for a reversible bib.

Step 2: If using trim, apply it to the right side of one bib piece.

About Lace: Trim lace ends as shown in the picture so the raw edges get caught in the seam. Pin lace right sides together, edges even, decorative edge inward, see picture.

Step 3: Place both bib pieces right sides together. Stitch with 1/4" seam allowance from one point around to the next point, leaving the neck open.

Clip/Notch curves, turn right side out.

Step 4: Topstitch 1/4" from the dges of a simple bib and 1/8" from the dge of a bib with lace or trim.

Or, using a decorative stitch, embroider around the edge of the bib. (See More Decoration after Step 5).

Step 5: Find the center of the bias binding and the center of the neck. Pin so the raw edge of the bib neck is in the fold of the bias binding. Starting at one end of the bias binding, zigzag near the edge of the open edge, catching the bib neck, and continuing to the other end.

More on Decoration:

Some trims and finishes could be used instead of topstitching. These include an embroidered edge or any trim that will be stitched around the bib on top. Piping can also be added in Step 2 instead of lace. Some examples are shown in the pictures below.
