

ELECTRICAL INSTALLATIONS

Datanet Colombia offers specialized services in design and implementation of electrical installations and facilities with qualified personnel, with high quality standards and according to the local electrical regulations (RETIE).

1. Electrical installations for industry, commercial and residential buildings

Our portfolio includes solutions for electrical installations for industry, commercial and residential buildings, and includes the following services:

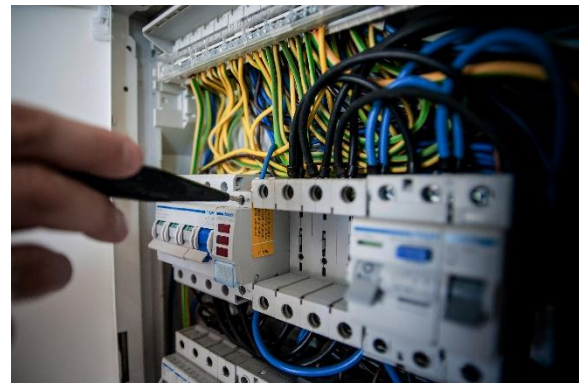

- **Low and medium voltage substations construction**

Datanet Colombia is a qualified company for construction, connection and commissioning of low and medium voltage substations, always working hand in

hand with the local energy operator company and the local certification entities (RETIE).

- **Low and medium voltage power distribution networks**

Datanet Colombia offers services for the installation of electrical networks and temporary electric service equipment, using high quality and environmental friendly products.

- **Industrial conduit systems installation (PVC, EMT, IMC pipes and cable tray systems)**

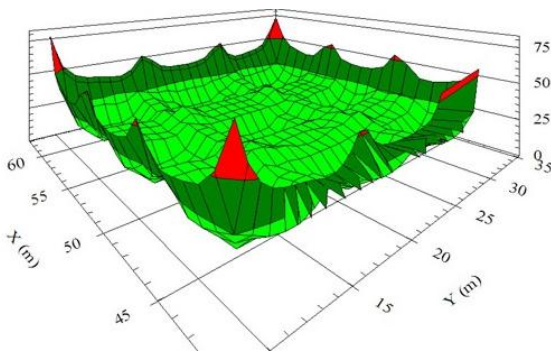

Our company has qualified technical personnel to install industrial conduit systems and cable tray systems for electrical, telecommunication, security and automation installations.

2. Installation and design of indoor – outdoor lighting systems (public, industry, commercial and residential buildings)

Datanet Colombia offers solutions in high technology lighting systems providing low power consumption and long life, according to the local regulations (Retilap).

3. Design and construction of shield and grounding systems

Always thinking about safeguarding life and equipment by applying national and international standards (IEEE 80, NTC 4552).

4. Electrical maintenance for industry, commercial and residential buildings

Datanet Colombia offers services of maintenance for electrical networks and equipment; our solution includes predictive, preventive and corrective maintenance.

5. Renewable energies

Datanet Colombia offers green solutions, providing electric energy of photovoltaic origin in a clean and affordable way thanks to the competitiveness of this technology, as well as the environmental and social protection of the environments in which we operate.

6. Consultancy

Thanks to our experience and the expertise of our personnel, Datanet Colombia offers the consultancy service for all of the solutions included in this portfolio. Thus we help our customers to identify their needs and offer them the best solutions.

7. OUR PARTNERS

Datanet Colombia works in hand with national and international well known providers for the different solutions included in this portfolio.
