World '17 Architecture Excellence Awards

Recent years have witnessed rapid growth in new technologies, re-imagined business processes, innovative business models, tighter regulations, heightened customer preferences etc., etc. within the Enterprise.

Digital Transformation refers to creating business models and value creation in the digital economy by leveraging business process change and process automation using digital technologies. There are inherent challenges in converting existing business models into digital opportunities. Also, a severe limitation is being faced in reusing existing IT assets along with digital

At ICMG, our vision is to recognize and reward Digital Architecture Excellence for the good of the Enterprise.

Modeling contributes significantly towards this and within ICMG we call this approach "Inter-Connected Models for the Good of the Enterprise".

For the last 13 years, the ICMG Architecture Awards are the most prestigious global award honoring excellence in the Enterprise and IT Architecture.

The hardest thing in the world is to understand Architecture of an Enterprise.

”

I appreciate the awards. The acknowledgement of good work in the global enterprise domain and architecture work being done is significant. High quality and very practical.

---

John Zachman

# Why Participate?

In the last 13 years, ICMG Global Architecture Excellence Award Program which is driven by independent jury has become a global benchmark of excellence with the leading companies from over 30 countries participating every year.

## Global Benchmark

ICMG Architecture Excellence Awards competition provides a great opportunity for the teams and organizations to benchmark their Enterprise & IT Architecture capability.

## Industry Recognition

It provides a platform to showcase grit and guts, perseverance to continue and do more beyond tiresome and long monotonous hours of work, and share with the community about the results, success, and their accomplishments.

## Visibility and Credibility

ICMG Architecture Award competition provides a neutral, peer level, jury driven assessment and rating that provides unparalleled opportunity to market your service / product

# Evaluation Process

Four rounds of evaluation including video interaction with the jury, case study presentation at the summit, makes it most transparent and reliable process

1

Round

Screening of nominations

Screening of nominations in terms of project completion status, the category selected, documents (models) submitted.

3

Round

Video interaction and presentation

This round is the Regional Final Round evaluation which is based on video interaction with project team head and the jury members (one or more)

2

Round

Evaluation using 10 key criteria

Evaluation of nominations (project documents) using 10 key criteria. Each nomination is evaluated by 3-4 jury members.

4

Round

Case study presentation at the...

The Final Round of evaluation is based on case study presentation at the Regional Architecture World Summit

# Digital Strategy Category

There are 6 awards under Business Strategy Category

1

Acquisition and Mergers

2

Growing Business in New Territory

3

Customer Oriented Business Models

4

Customer Centricity & Excellence

5

New Product & Service Offering

6

Digital Strategy to Execution

# Digital IT

1

Cloud Technologies & Solutions

2

Best Software Architecture in Mobile App

3

Best Software Architecture in Digital Watch

4

Business Intelligence and Analytics

5

Future IT (Emerging Technologies)

6

IoT Enabled Solution

7

Artificial Intelligence Enabled Solution

8

Robotics Enabled Solution

# Enterprise IT

1

IT Landscape Rationalization

2

SOA (SaaS) Vision for Enterprise Services

3

Best Software Architecture in IT Products

4

IT Infrastructure (Datacenters, Network)

5

IT Security

6

Future IT (Emerging Technologies)

7

CRM

8

ERP

# Digital Enterprise Management

1

Digital Transformation

2

Digital Architecture

3

Digital Architecture Methodology

4

Digital Architecture Governance

# Enterprise Management

1

Business Transformation

2

Improving Business by Improving Process

3

Architecture Methodology

4

Architecture Governance

5

Enterprise Architecture

# John Zachman Award for "Enterprise Architecture" for 2018

The World's Most Prestigious Architecture Award - Open for Nominations

## Enterprise Architecture

A structured set of descriptive representations relevant for describing an Enterprise and being employed such that an instance of the Enterprise can be created and such that the descriptive representations serve as a baseline for changing the instantiated Enterprise.

## Enterprise Diagnosis

The Process of analyzing Enterprise problems to determine their "root" causes based on the Enterprise Ontology (the Zachman Framework) in order to prescribe enduring solutions as opposed to putting "band-aids" on symptomatic anomalies by trial and error or "gut feel"

## Enterprise Engineering

The process of creating the single-variable, "Primitive" representations of an Enterprise such that they can be used (re-used) in producing Enterprise implementation "Composites" to accommodate extreme complexity and extreme rates of change.

# Global Chief Architects 2017

♦♦♦♦

John Van den Hoven from @Ontario Government (Treasury Board Secretariat, Central Agencies I&IT)

Shankar Kambhampaty DXC Technology

Marcelo Menard from Vale Canada Limited

Ajith Pillai from Cisco USA

Furkan Açık from Turk Telekom

Mohamed Abdel-Aal from @KAUST Saudi Arabia

# Key Parameters for Evaluation

There are eight key parameters to identify the winners

- 
- 1. Measurable Results**  
Ability to meet the business goal and stakeholder expectations
