CITY OF MONTICELLO UTAH GENERAL PLAN

“The City of Monticello is dedicated to providing quality services and opportunities while being responsible stewards of community asset and aesthetics of the municipality and its present and future inhabitants and businesses, to protect the tax base, secure economy in governmental expenditures, foster the state’s agricultural and other industries, protect both urban and non-urban development, and to protect property values.”

Adopted November
14,2001, Revised April
2018

GENERAL PLAN

KEY POINTS:

1.1 Purpose

1.2 Authorization

1.3 Changing Conditions

1.4 Plan Development

CHAPTER 1 - WHY HAVE A PLAN?

1.1 Purpose of the General Plan

The general plan establishes how Monticello City will provide for the health, safety, and welfare of its citizens in the present and future. As discussed in the following chapters, this plan lays out the City's long-term goals for transportation, City services and public safety, moderate income housing, community promotion and economic development, recreation, parks, aesthetics, historic preservation, energy conservation, and land use. The plan is used by the City Council as guidance for their decisions, provides context for the City in development strategies and grant applications, and moves the City toward its vision for Monticello's future:

The town of Monticello is a welcoming community that celebrates our small-town character. We seek sustainable growth that protects our natural and historic resources, while preserving our values, qualities, and culture.

1.2 Legal Authorizations

Although Monticello City has broad discretion to make land use decisions, it must ultimately comply with Utah's Land Use, Development, and Management Act (LUDMA). This act provides municipalities such as Monticello with the legal right and responsibility to make zoning decisions, enact ordinances, and develop and implement a general plan. The Act is codified at Title 10 Utah Municipal Code, Chapter 9a Municipal Land Use, Development, and Management Act. These requirements are mirrored in Monticello City code at Title 2 Boards and Commissions, Chapter 1 Planning Commission; Title 10 Zoning Regulations; and Title 11 Subdivision Regulations.

Monticello is required by state law to have a Planning Commission and to prepare and adopt a comprehensive, long-range (10-15 years) general plan that addresses the present and

GENERAL PLAN

future needs of the city and provides for the growth and development of all, or any part of, the land within the city. The plan is prepared by the Planning Commission and adopted by the City Council through a process that includes public hearings. State law (10-9a-403) requires that the City's general plan contain sections on transportation and traffic circulation, land uses, and moderate-income housing. In addition, the City has determined additional sections were appropriate to comprehensively address topics important to the community. The following table (Table 1) indicates where in this plan these required topics and City-directed emphasis areas can be found.

Table 1 - Planning topics found in this General Plan

Planning Topics	Goals for the Future
Transportation and traffic circulation	3.1 & 3.2
Land use designations	3.11
Moderate income housing	3.4
Aesthetics & blight eradication	3.8
Community promotion	3.5
Economic development	3.6
Energy conservation	3.10 & 3.11
Historic preservation	3.9
Public safety	3.3
Public utilities	3.2
Rights-of-way & easements	3.1 & 3.2
Watershed protection	3.2

1.3 Past plans and changing conditions

Monticello has been a city for over 125 years and during that time has had several types of governing policies. Allocations for land use, otherwise known as zoning, has an equally long history in the city, but it was not until the middle 1950s that planning and land uses rose to the forefront of the City Council. Their attention was triggered by rapid population growth, inadequate infrastructure, and housing shortages all arising from the uranium mining boom on the Colorado Plateau. From that time forward, either at its own impetus or in response to State requirements, Monticello has had general plans and zoning ordinances.

GENERAL PLAN

By 2001, population projections for Monticello suggested growth of 35% by 2050, and a need for low-income housing. As a result, the City adopted a general plan on November 14, 2001 that considered these trends and needs, as well as other changed conditions. In part due to evolving needs within the city and partially to respond to changes in State law, a revision of the plan was adopted on October 11, 2006. The 2006 plan remained in effect until replaced by this general plan. The new plan recognizes lower population growth projections, adds consideration of housing for moderate income persons, and adjusts for other factors that have changed in the intervening years.

1.4 Process used to develop this plan

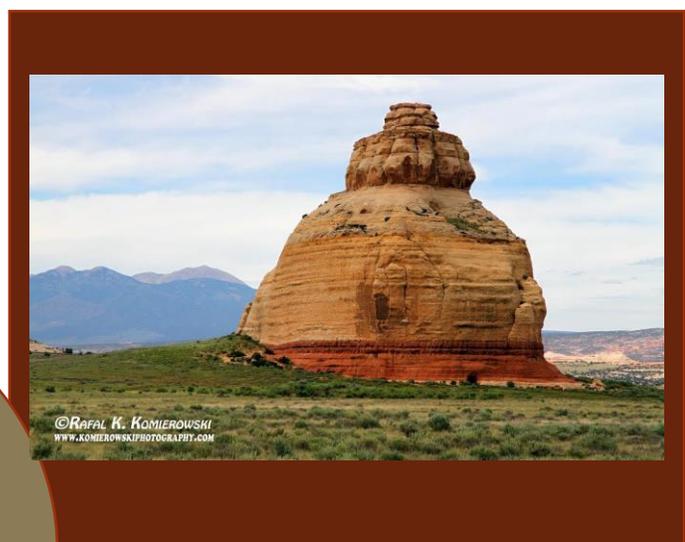

The Planning Commission began work on revising the 2006 general plan in 2015 by systematically gathering facts, projections, and other input. Although not conducted as part of general plan development, the Planning Commission held several public hearings pertaining to parking and storing recreational vehicles (RVs), changing the ordinance governing RV and mobile home parks, and to consider whether the City should regulate short term rental housing. Through these hearings, the Planning Commission gained valuable insight from residents regarding the lodging business in Monticello, uses of commercial zones, and the character of residential zones.

In addition to suggestions and comments received from residents, City Council, and City staff, the Planning Commission considered various studies and presentations during preparation of the general plan. These include, but are not limited to, the following:

- Area Sector Analysis Process, San Juan County, Utah, prepared by University of Nevada and Utah State University, 2017
- Campus Planning Study, Caldwell Richards Sorensen, 2008
- Citizen Satisfaction Survey, prepared for City of Monticello, 2015
- Custom Soil Resource Report for Monticello Planning Area, Natural Resources Conservation Service, 2017
- Landslide Maps of Utah: Blanding Quadrangle, Utah Geological Survey, 2010.
- Living Wage Calculation for San Juan County, Utah, Dr. Amy Glasmeier and the Massachusetts Institute of Technology, 2017.
- Moab Area Affordable Housing Plan, Interlocal Housing Task Force, 2016
- Montezuma Creek & Lower San Juan Four Corners Watershed Coordinated Resource Management Plan, San Juan Water Conservancy, ____
- Monticello City, Utah Community Facts, US Census Bureau, 2016
- Monticello Community Analysis, Rural Planning Group, 2016

- Monticello Radioactive Contaminated Properties Site Delisting Process Fact Sheet, US Department of Energy, 2000
- Politics, Economics, and Federal Land Designation: Assessing the Economic Impact of Land Protection [at] Grand Staircase-Escalante National Monument, R.M. Yonk, R.T. Simmons, and B.C. Steed, 2013
- Revision to Flood Hazard Boundary Map, Federal Emergency Management Agency, 2013
- San Juan County Resource Management Plan General Plan Update, San Juan County and Jones and DeMille Engineering, 2017
- State of Utah Affordable Housing Assessment, Department of Workforce Services, 2017
- Storm Drain Master Plan, Jones & DeMille Engineering, 2009
- Utah League of Cities and Towns annual seminars about LUDMA and land use issues
- Utah's Canyon Country/San Juan County Assessment, Findings, & Suggestions, Roger Brooks International, 2017
- Utah Science Technology and Research Initiative (USTAR), State of Utah, 2017
- Water Conservation Plan for the San Juan County Water Conservancy District, 2016

Work sessions with the Planning Commission and City Council were held on October 4, 2016 and January 23, 2018. A public hearing was held on March 6, 2018. The draft general plan was revised in response to suggestions, corrections, and new information, and submitted on April 6, 2018 to the City Council, then adopted on April 10, 2018.

CHAPTER 2 - COMMUNITY PROFILE

2.1 Location and Surroundings

The City of Monticello is located at 37° 52' North and -109° 20' West (or decimal degrees 37.868163194 N and -109.338498646 W), at an elevation of 7,066 feet above mean sea level. The city occupies a rounded, east sloping ridge on the flank of the Abajo Mountains in San Juan County, Utah. The present city land area is about 3.3 square miles (Figure 1). Monticello is the seat of San Juan County government.

GENERAL PLAN

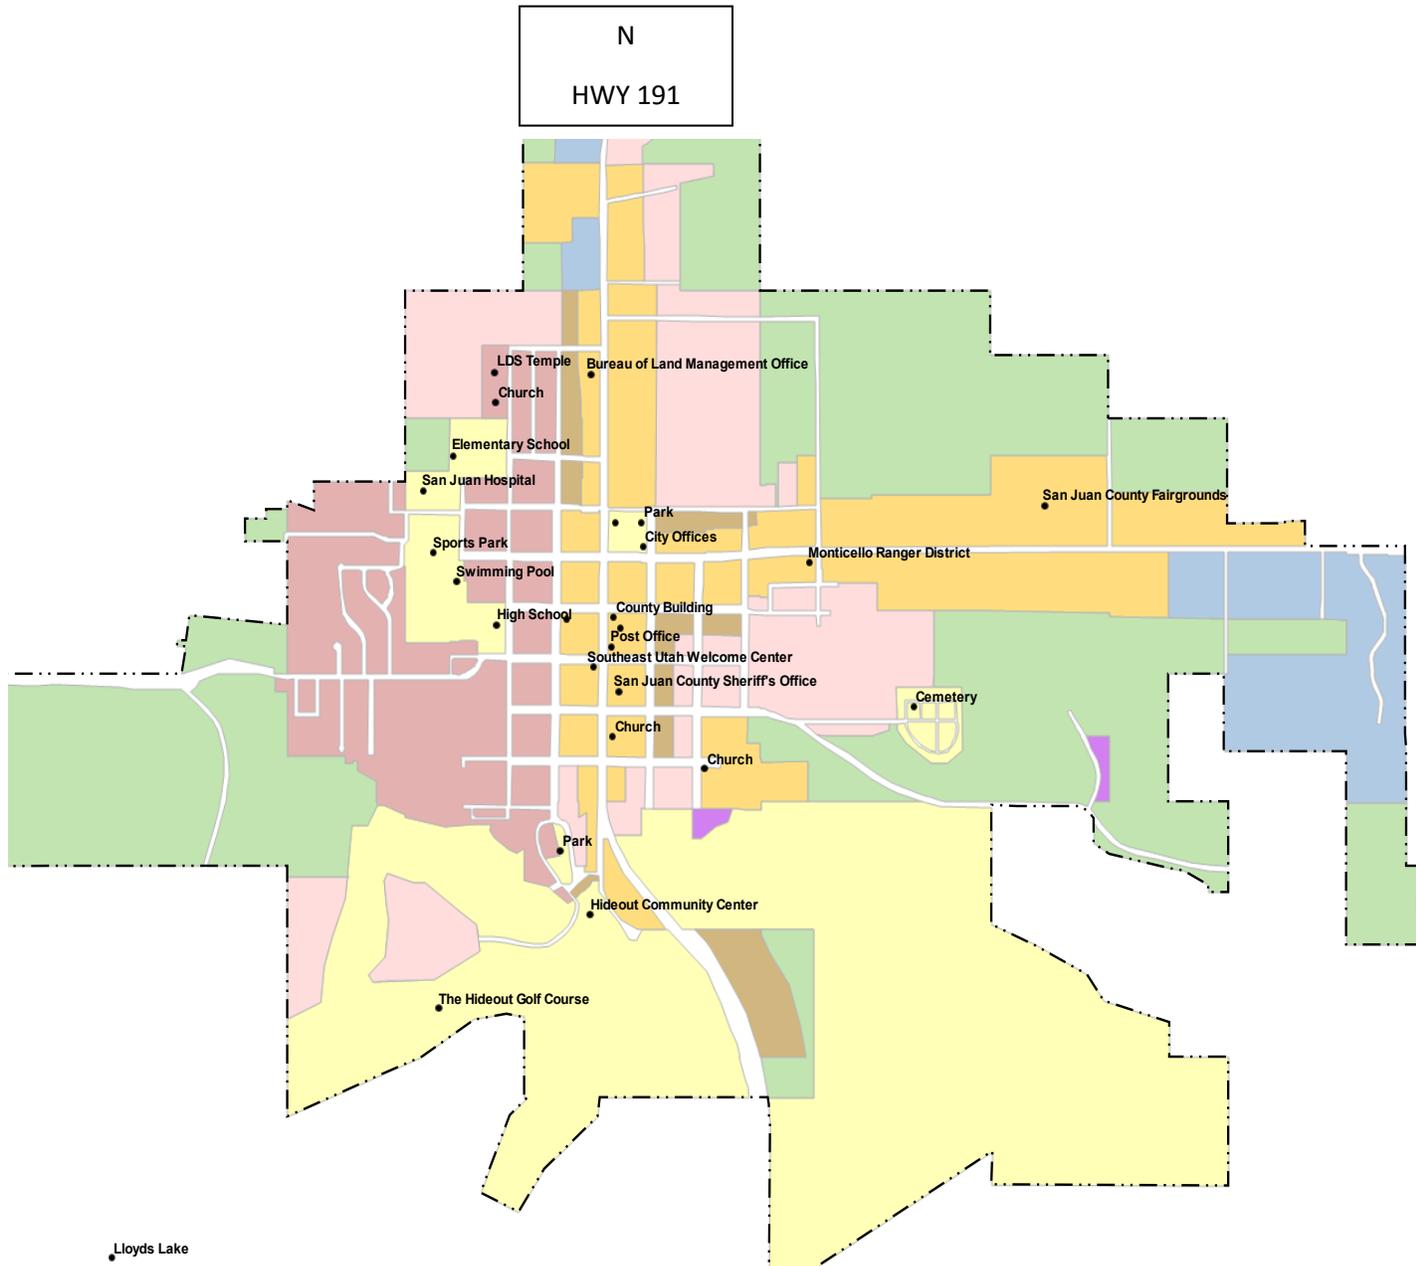

Figure 1 - Map of Monticello City, 2017

Zoning Legend

G-1 Government – yellow, C-1 Commercial- gold, C-2 Light Commercial – brown, A-1 Agriculture – green, R-1 Residential – dark pink, R-2 Residential – light pink, I-1 Industrial - blue

GENERAL PLAN

To the north, east, and south of the city are expanses of privately owned land representing the greatest concentration of non-federal land in San Juan County. The view to the west is dominated by the Abajo Mountains, one of Utah's three isolated small mountain ranges and the source of water for Monticello. The highest point, Abajo Peak, is 11,368 feet in elevation but for residents the favorite mountain feature is a horse head shaped natural vegetation feature on an east-facing slope overlooking the city. Horsehead Peak, where the feature is located, was formally

acknowledged by the US Board of Geographic Names in 1915, although locals have long embraced the horsehead in story, song, and poetry. Later the City of Monticello adopted the horsehead as its logo. In 1987 the Forest Service and Boy Scouts undertook a complex project to trim the horse's ears and blaze to help maintain the beloved landmark. As they revise their current resource management plan, the Forest Service may consider long-term management direction for the horsehead.

Monticello is located in one of the few areas of the United States that has very low levels of light pollution, a factor influenced by the city's distance from other populated areas (Table 2).

GENERAL PLAN

Table 2 - Distance from Monticello to selected populated places

Location	Mileage	Approx Drive Time
Blanding, UT	21	24 minutes
Dove Creek, CO	26	25 minutes
Bluff, UT	47	52 minutes
Moab, UT	54	55 minutes
Cortez, CO	61	1.00 hours
Farmington, NM	133	2.50 hours
Grand Junction, CO	165	2.25 hours
Window Rock, AZ	185	3.25 hours
Flagstaff, AZ	264	4.50 hours
Salt Lake City, UT	288	4.75 hours
Albuquerque, NM	313	5.25 hours
St George, UT	393	5.50 hours
Phoenix, AZ	407	6.50 hours
Denver, CO	408	6.25 hours

The city is also situated amid some of the nation's most striking scenery and outdoor adventure locations, as evidenced by several attractions (Table 3).

Table 3 - Distance from Monticello to selected area attractions

Attraction	Mileage	Approx Drive Time
Edge of the Cedars State Park & Museum	21	24 minutes
Newspaper Rock	28	35 minutes
Indian Creek Recreation Area	35	45 minutes
Canyon Rims Recreation Area	44	1.00 hours
Needles area of Canyonlands National Park	51	1.00 hours
Dark Canyon Wilderness	57	2.75 hours
Anasazi Heritage Center	59	1.00 hours
Bears Ears National Monument	60	1.00 hours
Natural Bridges National Monument	60	1.50 hours
Hovenweep National Monument	61	1.50 hours
Goosenecks State Park	64	1.50 hours
Mesa Verde National Park	86	2.00 hours
Four Corners Monument	91	1.75 hours
Monument Valley Tribal Park	100	2.00 hours
Canyon de Chelly National Monument	146	2.50 hours

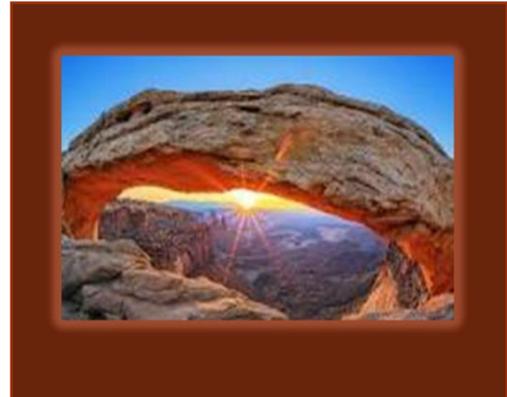

GENERAL PLAN

Surveys conducted in 2015 and 2016 found that the majority of Monticello residents were very satisfied or satisfied with the community as a place to live, raise a family, work, or retire. Specific comments applauded the small town feel and friendliness of Monticello, lack of crime, clean air, feeling of safety, and its beautiful setting.

2.2 Climate

At an elevation of 7,066 feet, Monticello is considered a high desert. Its average high temperature is 60 degrees and the average low temperature is 33 degrees Fahrenheit. These averages can be misleading, however, as the city enjoys four distinct seasons

and both high and low temperatures reflect seasonal fluctuations (Figure 2). The winter season extends from December through February; spring is March through May; the summer season is June through August; and fall runs from September through November.

Precipitation patterns are strongly seasonal in Monticello (Figure 3). Most precipitation falls as snow during the winter months and as rain during the rest of the year. Locally intense thunderstorms can bring snow and sleet at any time of the year or can cause torrential rainstorms that trigger local flooding

and brief periods of standing water in the roadways. Large scale flooding is rare, and the Federal Emergency Management Agency adjusted the flood hazard map for the City of Monticello in 2013, significantly reducing the areas of the city where landowners might be required to carry flood insurance. The flood area is now part of Overlay Zone 2 (OL-2) in the City's zoning ordinances.

Figure 2 - Average monthly temperatures for the period 1981-2010

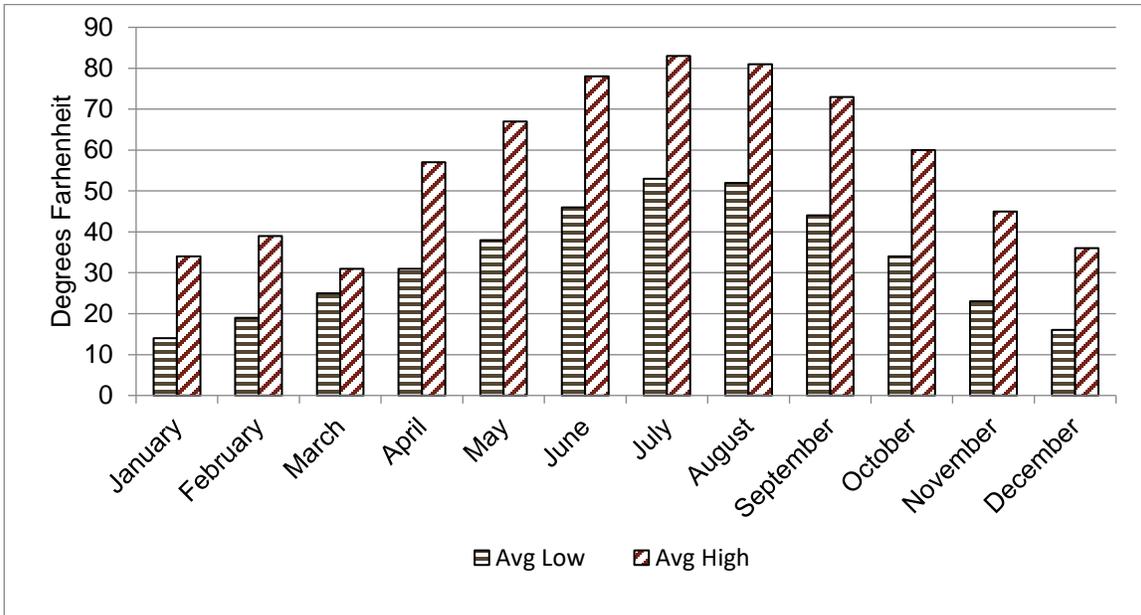

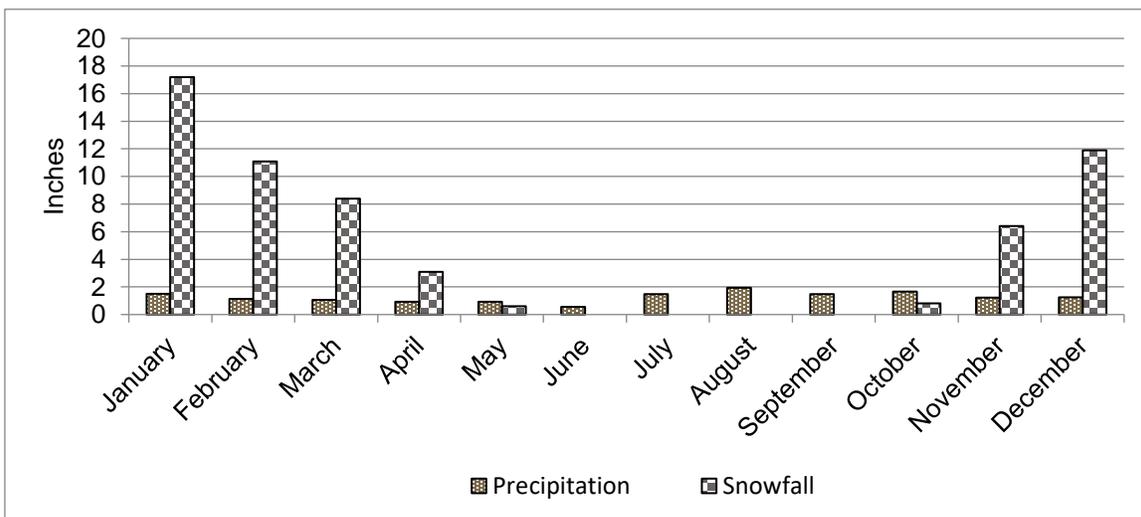

Figure 3 * - Average monthly precipitation

Cloud cover varies by season but on average the period of least cloud cover begins by May 21st and lasts until November 2nd. Statistically, the clearest day of the year is September 19th, with 80% likelihood of a clear or partly cloudy day. March 3rd is the cloudiest day of the year, with a nearly even split in the probability of overcast or partly cloudy. On the longest day of the year (Summer Solstice), Monticello enjoys 14 hours and 48 minutes of daylight. On the shortest day (Winter Solstice), there are 9 hours and 32 minutes of daylight, on average.

The typical frost-free growing season in Monticello averages 152 days and usually begins in mid-May and ends in mid October, as recorded for the years 2011 through 2016. Monticello's humidity changes very little during the course of the year, rarely topping 10%. With the exception of July and August when the air turns muggy for a few weeks, humidity levels are considered dry for most of the year.

Average wind speeds in the city vary from 7 to 10 mph and typically come from the south and west, although spring is known for higher wind speeds frequently in excess of 15 mph. Local storms, out of the north, south, and west can bring strong gusts, microbursts, and shearing winds at any time of year, and wind damage to trees, fences, sheds, patios, and house roofs has been reported but is not typical. The highest wind on record was recorded in March 1999 at 68 mph. A commercial wind farm is located northwest of the city and readily visible for miles around.

2.3 Watershed

Monticello's water supply comes from 34 springs located on the Abajo Mountains, within the Manti-La Sal National Forest. The water supply also includes storage from the City's share of water

impounded in Loyds Lake, and from nine underground wells within the city. These sources of water supply are part of the Montezuma Creek watershed, a tributary to the San Juan River and thus part of the Colorado River system. Priority dates for many of these water sources date back to the 1880s. The City pipes their water through two separate delivery systems, one that is treated for culinary use and the other carries untreated water for secondary uses between mid-April and mid-October.

2.4 History

Monticello lies within the traditional territory of the Ute, Southern Paiute, and Navajo peoples who used the general vicinity for hunting, plant collecting, and farming, as well as forage for their sheep, goats, and horses. These tribes, and their ancestors, have been in this area for thousands of years. Native American use of the area generated the trail that government surveyors noted in 1876, the same route used in 1879 by a party of explorers from the LDS Church.

As early as 1875 cattle were brought to the Monticello vicinity from Colorado and Texas, and by 1885 several ranchers claimed homesteads in and around Monticello, although the federal government later canceled the claims. Mormons founded Monticello in 1887 as a farming area to augment their settlement at Bluff. The town's north-south road, Main Street, likely used the existing Indian trail noted in 1876. Ditches brought water from mountain springs to supply the community's culinary and irrigation needs, and outhouses provided the first sanitary system. Lumber cut in nearby sawmills and lots of locally fired brick supplied the building materials for houses and commercial buildings for many years. During these early years most of San Juan County, including the Monticello vicinity, was being considered as an Indian reservation for tribes from Colorado. Ultimately, Congress failed to pass the necessary legislation and this large reservation was never established.

Utah attained statehood in 1896 and Monticello became the seat of San Juan County. A town well was dug that year, necessitated by a drought that dried up the ditches. Overgrazing by sheep

GENERAL PLAN

on the Abajo Mountains contributed to water shortages and typhoid outbreaks, and in 1903 Monticello residents submitted a request to the federal government to establish a national forest for protection of the watershed and timber resources. In 1906 the forest was established, and the watershed was closed to sheep.

On December 7, 1910 Monticello was officially incorporated as a Utah city. There were 365 residents, and about 44% of them were under the age of 17. The governing body was the Town Board, and one of their first actions was to close grazing around all the ditches inside the town boundary, in hopes of curbing the persistent typhoid problems. But typhoid outbreaks continued to plague the community and public health officials eventually recommended piping the culinary water rather than drawing it from open ditches. Unfortunately, the town's finances were inadequate for the task. Finally, the privately owned Blue Mountain Irrigation Company raised the funds and in 1916 a pipeline was constructed. The following year a water-driven electric generator was installed, providing Monticello with its first electrical service.

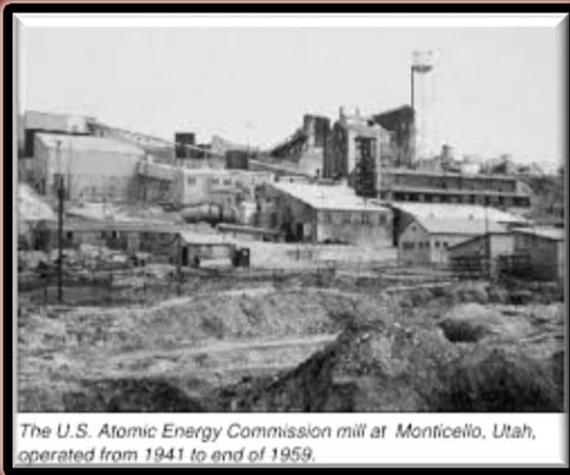

The town grew slowly but steadily until World War II when the vanadium mill went into full production and later expanded to recover uranium. By the mid-1950s, uranium mining led to rapid population growth and a notable expansion of businesses. These were the years that Monticello formalized its zoning ordinances, built new schools and hired its first certified teachers, expanded the electrical and water systems, installed water meters, put lights on Main Street, and opened a municipal dump. The telephone company supplemented its single line with new lines and better long-distance service. Local citizens raised money for a swimming pool, golf course, and hospital, and also established a ski hill. Although the uranium mill ceased operating in 1960, mineral, oil, and gas developments extended the mining boom into the 1980s.

Encouraged by the strength of the local economy during the 1980s and looking forward to future growth, in 1981 the City purchased a 32-acre residential subdivision then annexed and re-zoned it for use as an industrial park; as of 2017 three lots are still available. This acreage joined existing industrial areas on the north and east sides of town. Improvements were made to the sewer lagoons in 1986, at the same time the City cooperated with local farmers and the San Juan Water Conservancy District to construct Loyds Lake and install a new city-wide secondary water distribution system.

By 1990, Monticello's economy had undergone a major shift from mineral extraction to government and service. Locals developed a trail around Loyds Lake and built picnic areas that have become a popular part of the City's recreation assets. A local organization provides winter-season concerts, and a recycling program was initiated but later failed because it was too costly

to move the materials to a recycling center. The ski hill closed when its volunteer operators could no longer afford the insurance.

A new pump and storage tanks were added to Monticello's well in the Industrial Park to facilitate

bulk water sales for the cleanup of the old uranium mill and to other water users. Contaminated soil and materials found in many Monticello buildings and yards were removed as part of the mill cleanup, which was completed in 2000. The former mill site, stripped of its contaminants and capped with clean soil, was given to the city and is now Millsite Park. The cleanup project was also the impetus for the City's award-winning Hideout Golf Course.

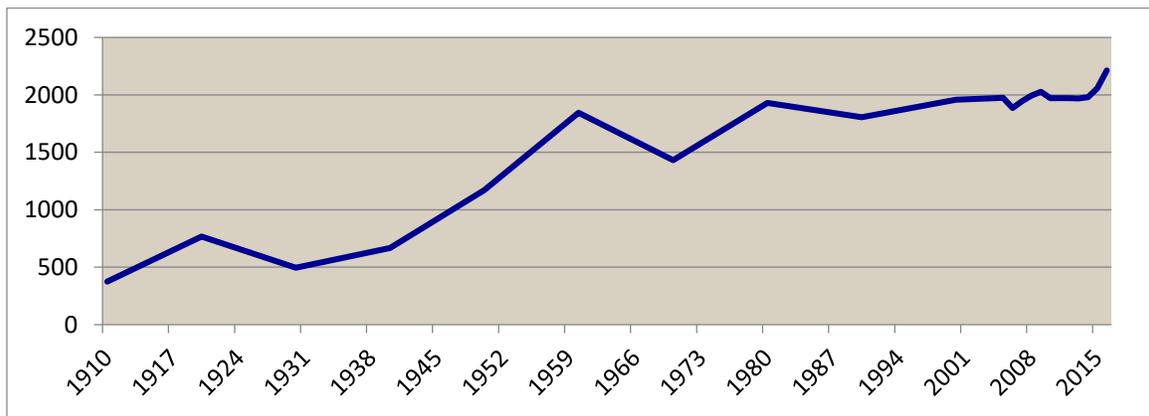

In 2015-16, the Latigo Wind Farm was constructed with 27 giant wind turbines along the foothills of the Abajo Mountains, just northwest of Monticello. The windmills are aligned in three rows along a series of undulating ridges on 3,600 acres of private land that SPower leases from a group of landowners. Armed with sensors and computers, the turbines automatically swivel up to 360 degrees to find the wind. The individual blades twist or flatten depending on wind speed. The wind farm has a capacity of 61 megawatts, enough to provide electricity for 10,000-20,000 homes for a year depending on wind production, according to the Energy Information Agency. The power generated goes directly to the national grid, and not local electric utilities. SPower has secured a 20-year purchase power agreement with PacifiCorp, a major utility based in the Northwest.

2.5 Demographics

Monticello's population growth matches fluctuations in regional and national economies, particularly the mineral industry. The steep growth from World War II to 1960 (Figure 4), for example, is lock step with the uranium boom and reflects miners and mill workers, as well as those who worked in supporting businesses. The decline from 1960-1970 matches the termination of government buying policies for uranium, while the growth spurt that followed is evidence of Monticello's link to the new uranium economy wherein the buyers were private and

municipal nuclear power plants. Oil and gas exploration also increased during these years. With the shift in emphasis to government and service as the basis for the local economy, subsequent population fluctuations suggest a more sporadic and slow growth trend. With changes in the technology of extraction energy (gas and oil from the ground), the western states could see more mining activity return to the area. Further wind farm development in this area is also occurring. Other international developments which have taken place during the last 5-10 years could also bring uranium mining back to the area.

Figure 4 - Monticello population trend, 2010-2016

In July 2017, the US Census Bureau reported that Monticello's population in 2010 was 1,972 people, and in 2015 the population was estimated to be 2,058. By December 2017, the Census Bureau had altered its figures for the City, reporting that in 2010 the population was 2,639 and by 2015 it was 2517. By February 2018 they had revised their projections again, returning the 2010 population to 1,972, but retaining the projections from their December 2017 update. The difference between the data obtained in July and December is sizeable: 459 people in 2015. Connections to City sewer and water do not support the December 2017 population figures, and neither do electrical hook-ups provided by Empire Electric Association. Likewise, student enrollment at local schools seems too low to match such population growth. The City has determined that the numbers provided in the July data better conform to local information, and hence Figure 4 uses the US Census Bureau data obtained in July rather than December 2017 or February 2018. Other tables in this plan showing population data are also based on the July 2017 figures. Population growth in Monticello is expected to reach 2,092 by the year 2050, which would be an increase of 6% from 2010, down from the ambitious projection of 35% growth found

GENERAL PLAN

in the City's 2006 general plan. If the current projection is accurate, demands for new public infrastructure and services are likely to be minimal. On the other hand, one or more of the following circumstances may alter the need for and mix of city services:

- Economic development strategies that Monticello and San Juan County intend to pursue
- The aging of the population (Table 4)
- Changing ethnic variety of the population (Table 5)

It will be important for City administrators to closely monitor changes in demand and inform elected officials of trends that suggest existing capacities or services may be inadequate.

Table 4 - Age-group trends in Monticello, 2010-2015

Age Group	2010	2011	2012	2013	2014	2015	Change
0-15	773	894	711	695	681	723	-6%
15-19	219	204	123	112	133	126	-42%

Monticello: The Genesis of Hispanic Communities

The first Hispanic families arrived in San Juan County in 1900. They came from New Mexico to herd sheep. Soon, they were central to the surging sheep industry in the state.

By 1920 the Hispanic population was large enough to create several distinct neighborhoods in Monticello, La Sal, Blanding, and Moab.

Cosme Chacon, his wife Filomena, and his daughters Marina and Jesusita. 1900.
Photo courtesy: Utah State Historical Society.

Las primeras familias Hispánicas llegaron al municipio de San Juan en 1900. Arribaron de Nuevo México para pastorear ovejas. Pronto se convirtieron en pilares de la economía pastoril del Estado.

En 1920, la población Hispánica era ya numerosa y crearon barrios en pueblos como Monticello, La Sal, Blanding, y Moab.

The changing ethnicity in the city is also reflected in languages spoken in homes. Approximately 84.2% of Monticello residents speak only English, but 15.8% of the citizens speak other languages on a regular basis, typically Spanish and Native American languages. The fluency in non-English languages is not due to foreign-born residents, however; about 98% of the bi- or multi-lingual speakers were born in America.

Several Monticello residents speak other languages, usually learned for a mission on behalf of the LDS Church, and these individuals sometimes assist foreign tourists with medical or legal communications.

2.6 Education

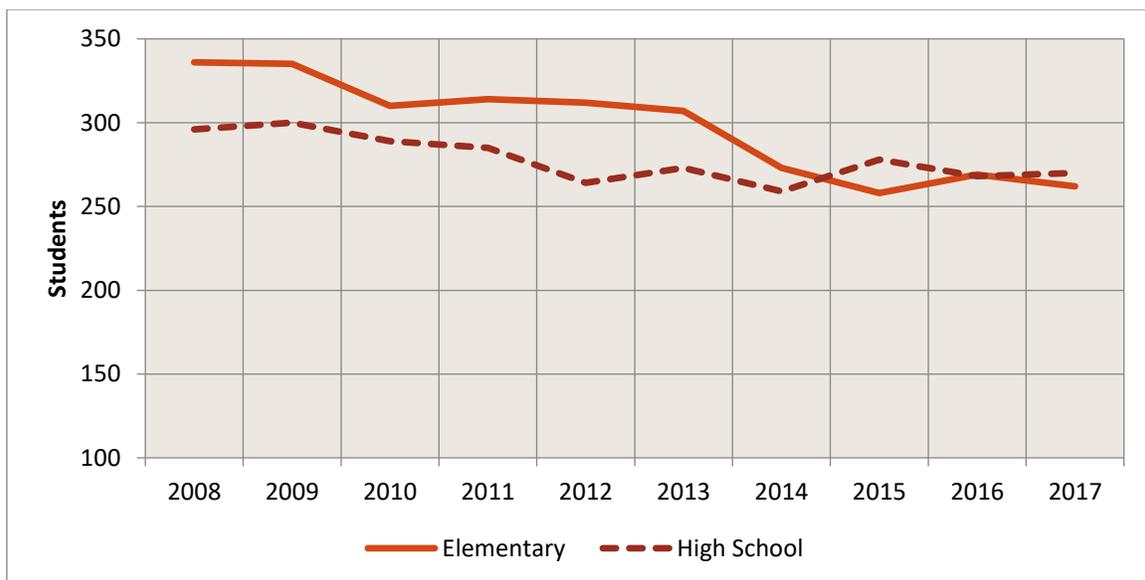

Monticello currently has two public schools, both part of the San Juan School District that

oversees all public schools in San Juan County, Utah. Local enrollment in 2017 represented about 18% of the school district's student population. Monticello schools have consistently ranked well compared to other public schools in the state and the county. During the 2015-2016 school year, for example, the School Federal Accountability report notes that Monticello High School and Monticello Elementary School

performed above state averages. Enrollments at both schools have declined since 2008 (Figure 5), a 22% decrease at the elementary school and 8% at the high school. On average, 90.6% of Monticello's students complete high school and graduate with their classmates or obtain a high school equivalency degree.

Figure 5 - Enrollment by year at Monticello schools, 2008-2017

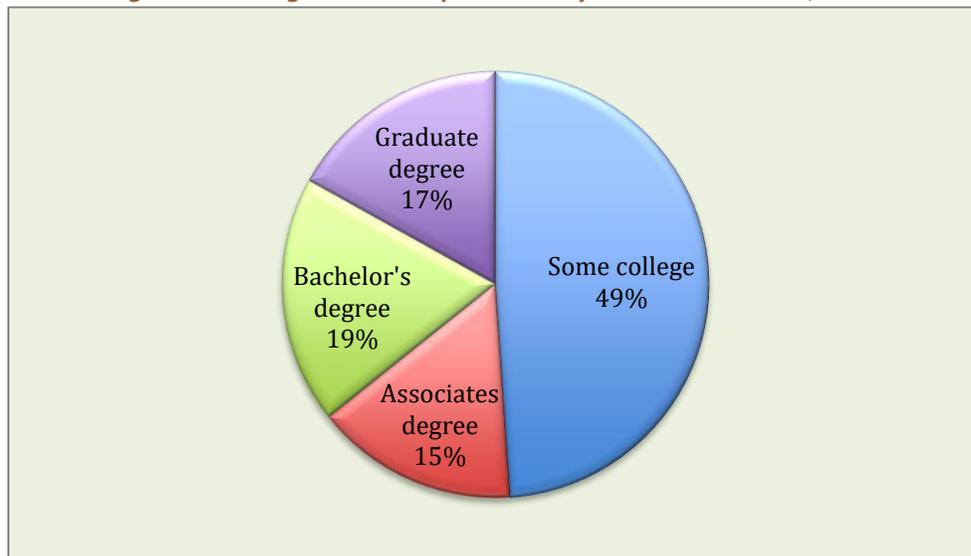

Vocational and technical training courses are available through the Utah State University (USU) campus at Blanding, only 23 miles south of Monticello. Course offerings may change by year or quarter, but the college catalog currently lists:

- | | |
|---|------------------------------|
| Automotive technology | Health professions & nursing |
| Building construction & construction management | Heavy equipment & trucking |
| Business & computer systems | Machine tool technology |
| Cosmetology | Mining |
| Diesel equipment technology | Police officer academy |
| Engineering drafting & design technology | Welding |

San Juan County's Public Health Department can provide training and certification for food handlers. Training for emergency medical responders and technicians is available through the State of Utah's Bureau of Emergency Medical Services and Preparedness.

Although there is no college campus in Monticello, residents have local access to televised courses from USU, and many residents attend classes at USU's Blanding campus. Others attend college elsewhere depending on their interests and financial situation. Based on census data, 58.6% of Monticello residents have college experience (Figure 6).

Figure 6 - College educated persons 18 years old and older, 2016

2.7 Economy

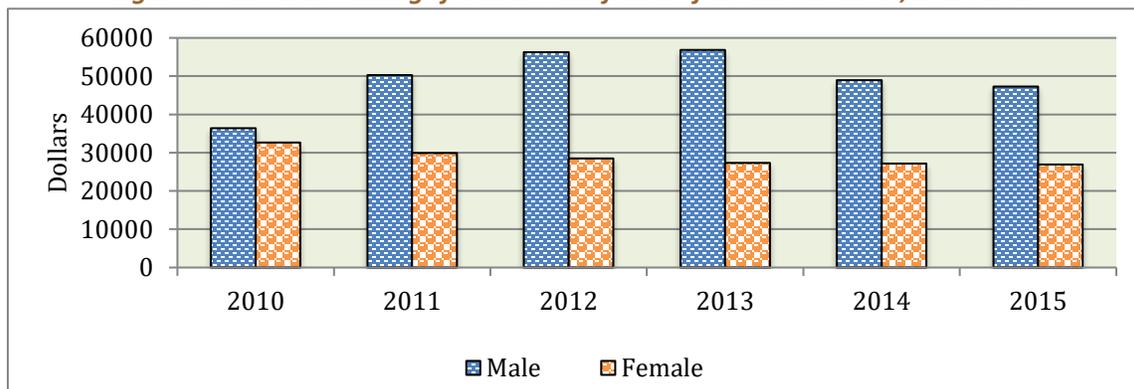

Monticello had 741 households in 2015, including 74.5% in which income was generated by earnings (wages or salaries). These households had an average annual income of \$55,010. Another 32.9% of the households relied on Social Security payments for income, which averaged \$21,869 per annum, and 20.9% of the households were dependent upon other types of retirement income that averaged \$27,636 per year. Table 6 displays the number of households in Monticello in various income brackets as provided by the US Census Bureau.

Table 6 - Number of households per income bracket for the period 2010-2015

Income Bracket	2010	2011	2012	2013	2014	2015	Change
Less than \$9,000	73	59	76	41	40	45	-38.4%
\$10,000-\$14,999	36	46	28	30	21	34	-.06%
\$15,000-\$24,999	64	38	64	81	88	89	39.1%
\$25,000-\$34,999	243	83	78	99	102	91	-62.6%
\$35,000-\$49,999	145	201	130	112	93	113	-22.1%
\$50,000-\$74,999	130	135	128	158	166	189	45.4%
\$75,000-\$99,999	116	72	95	88	84	103	-11.2%
\$100,000-\$149,999	55	67	90	64	53	68	23.6%
\$150,000-\$199,999	49	26	8	4	4	0	-100%
\$200,000 or more	14	20	12	11	11	9	-35.7%

Earnings for full-time workers in Monticello vary through the years and differ significantly between male and female workers (Figure 7). The figure shows median earnings, meaning the dollars at the middle of the range of annual earnings.

Figure 7 - Median earnings for male and female full-time workers, 2010-2015

GENERAL PLAN

Approximately 11.6% of families living in Monticello in 2015 were living at or below the poverty level. Slightly more than half of these families had children under the age of 5 years, and nearly one-half of the impoverished households were headed by a female (no husband in household). The percentage of households at or below the poverty level has remained relatively steady since 2010.

Monticello workers either drive to their place of employment (85.8%), walk or bicycle to work (9.4%), or work from their homes (4.8%). There is no public transportation or taxi service in Monticello. Approximately 80% of city residents have jobs in Monticello and the typical commute takes less than 10 minutes. According to 2016 data from the US Census Bureau, city residents were employed in a variety of fields (Table 7). The monthly wage column is an average calculated by the Utah Department of Workforce Services for San Juan County (Monticello data are not available).

Table 7 - Employment fields and workers in Monticello, 2015

Employment Field	Monticello Workers	County Monthly Wage
Mining/Oil-Gas	14	\$5,903
Professional/Technical	5	\$5,067
Art/Entertainment/Recreation	52	\$3,764
Public Administration	103	\$3,545
Health Care/Social Services	147	\$3,398
Construction	55	\$3,167
Finance/Insurance	10	\$3,055
Education	113	\$2,556
Other	68	\$2,505
Wholesale/Retail	80	\$2,419
Manufacturing	69	\$2,138
Transportation/Warehousing	5	\$1,966
Information	28	\$1,808
Accommodation/Food Service	87	\$1,736
Real Estate/Rentals	33	\$1,686
Administration/Waste Mgmt	48	\$1,682
Agriculture	32	\$1,634

In San Juan County, employment in mining, construction, manufacturing, and finance have decreased while jobs in the leisure-hospitality and government sectors have increased. The net result indicates that employment opportunities in San Juan County are static in terms of numbers

GENERAL PLAN

of jobs but have shifted among the industries. Comparable data for Monticello City are not available. It is evident however, that with this change in employment emphasis, Monticello workers have less access to higher paying jobs.

3.11 Land Use

CHAPTER 3 - GOALS FOR THE FUTURE

The town of Monticello is a welcoming community that celebrates our small-town character. We seek sustainable growth that protects our natural and historic resources, while preserving our values, qualities, and culture.

While it is possible that economic and population growth in the city could surpass projected levels, it is more likely that Monticello will experience increased demand for improvements to the quality of amenities and living conditions available to its residents. For this reason, many of the policies and goals expressed in this plan emphasize enhancing Monticello's appeal as a place to live for a population base that is approximately equal to that of the present. Each section of this chapter includes objectives and expected outcomes that, implemented over the life of this general plan, will move Monticello forward in a manner that is consistent with the expectations of residents and the ability of City government to provide for those needs and expectations.

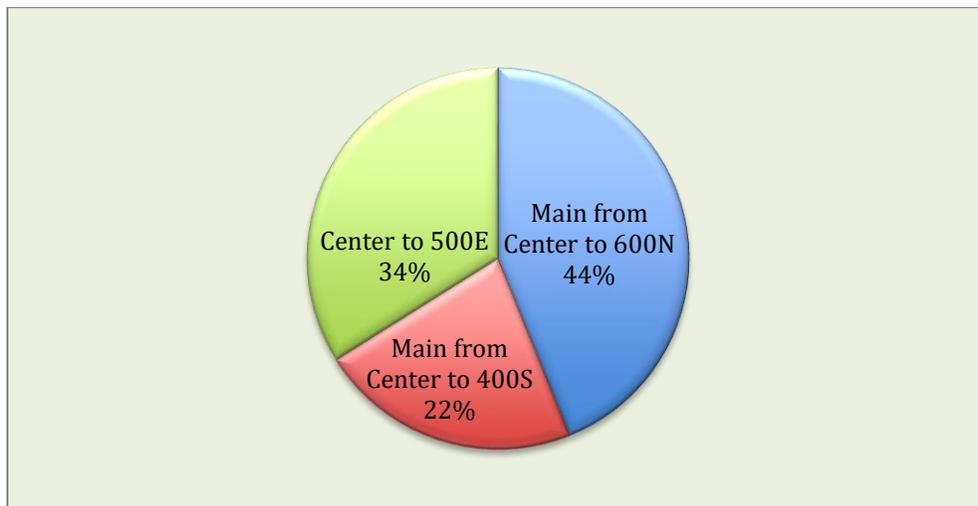

3.1 Transportation Network

The city has one traffic light, located at the intersection of Main and Center streets (US-191 and US-491, respectively). During 2009 the Utah Department of Transportation (UDOT) completed a major upgrade to this intersection due to the increased volume of traffic (up about 18% since 2010), particularly large trucks. UDOT estimates that multi-axle trucks account for about one-

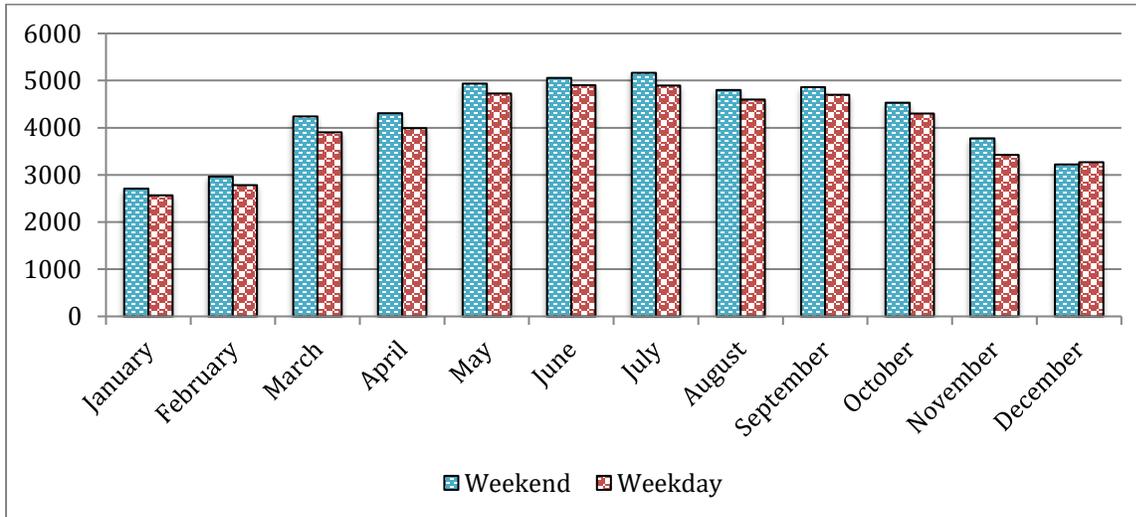

quarter of the traffic through the intersection. Traffic counts for 2015 indicate the distribution of use on Main and Center Streets within the City's central area (Figure 8).

Figure 8 - Average daily traffic volume in Monticello, 2015

Using the UDOT automated counter on north US-191 as an example, a seasonal and weekly pattern of travel is apparent on Main Street (Figure 9).

Figure 9 - Monthly traffic patterns on Main Street north of Center Street, 2016

The City operates a single runway airport, built in 2011, that is in excellent condition. It has fuel service, a pilot lounge, and a courtesy car for visiting pilots. The airport is completely self-serve and provides excellent access for visitors, although there is no public transportation between the airfield and the city. It also accommodates the fixed-wing aircraft used for emergency medical transport into and from the hospital located in Monticello. The San Juan County airplane, used for law enforcement, search and rescue, and administrative purposes, is based at the airport. A

tie-down area provides parking for visiting aircraft, but no public hangars have been constructed. Property is available for lease to private individuals to build hangars. Two private hangars have recently been constructed.

Although Monticello is a small city occupying a relatively compact area, residential neighborhoods tend to be separate from business zones. While this may be desirable as a means of maintaining the quality of residential zones, it also results in the use of automobiles to travel between commercial and residential areas. The westerly neighborhoods are seven blocks from city center, the southerly are five blocks, the easterly are five blocks, and the northerly neighborhoods are ten blocks from

GENERAL PLAN

city center. Allowance for alternative means of travel could ease parking shortfalls as well as reduce the energy footprint of residents.

TRANSPORTATION NETWORK GOAL:

Provide efficient and safe movement of people within the City

Objectives	Expected Result
Conduct study of how guest aircraft can be stored at the airport	City costs for providing tie-down spaces and/or covered storage is minimized and revenue from space rentals is maximized
Make the airport self-supporting	City does not bear the full burden of maintenance and operation expenses
Make the airport self-supporting	City does not bear the full burden of maintenance and operation expenses
Expand airport facilities	Self-serve fuel station is reliable and easy to maintain. Hangars are available for rent or lease.
Conduct cost-benefit analysis of an alternate truck route for the City	City Council makes informed decisions about a truck route and coordinates with UDOT accordingly
Coordinate with UDOT to assure that lighting on Main and Center streets is of the same design and well-maintained	The major thoroughways are attractively lighted, and lights operate reliably
Prepare a maintenance and upgrade plan for street lighting and signs	City streets are appropriate lighted and safe. Street signs are accurate and easy to read.
Continue implementation of plan to repair/replace sidewalks, curb, and gutter in on Main and Center streets.	City makes annual progress on safe pedestrian-friendly business district and eliminates broken and uneven sidewalks.
Establish & sign ATV routes within the City	Riders safely and legally move through and within the City.
Establish & sign bicycle routes connecting residential neighborhoods with schools, parks, recreation facilities, and businesses	Bicyclists have safe routes within the City.
Develop a Master Streetscape Plan for Main & Center Streets	Coordinated and planned/designed sidewalks, lighting, curb & gutter, and intersection control.

GENERAL PLAN

3.2 City Services

City services means the infrastructure needed for Monticello to deliver to its residents the services generally required of a city, including culinary water, sewer, trash collection, and storm water control. The Public Works Department manages these services and is staffed by four full-time employees, including a Director and three technicians who are cross-trained in sanitation, sewer, water, and streets. The Department also operates the only heavy equipment owned by the City. A map of future street corridors was included in the 2006 general plan and has remained unchanged.

The City maintains a dump located about three miles east of town and utilizes the San Juan County landfill located north of Bluff. The County also provides snow removal from City streets, ambulance service, and animal control within Monticello. The Utah Department of Transportation removes snow from East Center Street and Main Street within the City as part of their maintenance of US-491 and US-191.

Most of Monticello’s two water delivery systems are in good working order and can handle the current and projected future demands. The culinary water system is considered adequate for at least the next 10 years, and the secondary water system was upgraded in the recent past and meters were installed. Average water usage in Monticello is approximately 750 acre-feet per year (Table 8).

Table 8 - Culinary water system input and usage, 2016

Culinary Water	Gallons (thousands)
Water available to culinary system	292,759
Residential delivery	36,414
Commercial delivery	15,151
Industrial delivery	1,396
Institutional delivery	9,856
Total culinary water delivered	62,817
Balance available	229,942

The City has the capacity to store approximately 1,250 acre-feet of water per year, easily enough to accommodate current and anticipated future demand. However, much of this storage capacity is found at Loyds Lake, which has completely filled only 3 or 4 times since its construction. A new well with on-site treatment provides an additional 100 gallons per minute during times of low water collection. The water treatment plant is 20 years old and can treat up

GENERAL PLAN

to 1.5 million gallons of water per day. At present, average delivery is around 300,000 gallons during the winter, and 1 million gallons during the summer.

Wastewater treatment in Monticello is handled at a sewer lagoon facility built during the early 1980s, and which was designed to serve a population of 3,000 residents. Most of the treated wastewater is reused by irrigators, although the City has a permit to direct the treated water to South Creek if necessary. The sewer lagoon facility should be adequate to serve the city's projected needs. However, many of the sewer lines are clay tile and buried under paved roads. Replacing pipe includes the cost of replacing the street, a factor that makes large-scale replacement costs prohibitive. The entire system, like the water system, is gravity fed making it difficult to provide sewer in low lying areas of the city.

Storm water run-off through Monticello comes from 43 drainage basins, with the major drainages being North Creek and South Creek. Across 85% of the city, curb and gutter carries most of this run-off to discharge points at the edges of town; it is illegal to pipe storm water into the sewer system. In parts of Monticello, however, curb and gutter are lacking, and storm water can cause local flooding. A study of storm water was completed in 2009 and the City has been and will continue to implement corrections and improvements to its system in response to findings from that study. Any new subdivisions within the city require developers to address storm water as part of the subdivision approval process.

Empire Electric Association of Cortez, CO has an agreement to provide Monticello with electrical service via power lines that essentially parallel US-491. Empire Electric maintains a small substation about 2 miles east of Monticello as part of the service. The agreement with Monticello will expire in 2025 and the City is currently exploring the option of acquiring Empire Electric's distribution system within the City.

GENERAL PLAN

CITY SERVICES GOAL:

Provide reliable and safe services that keep pace with City growth

Objectives - Water System	Expected Result
City coordinates with the Forest Service to assure water quality does not diminish	City is consulted, and input considered in Forest resource plans and project implementation
City coordinates with the San Juan Water Conservancy District to add water to Loyds Lake	Expand the City's water resources
Develop a plan with budget for the repair, replacement, and improvement of the water system within the City	City has a basis for loan and grant applications and setting budget priorities for this system. Progress is made annually to reduce the miles of outdated pipe.
Provide a consistent source of water	Snowpack variations do not impact the availability of City water
Objectives - Electrical System	Expected Result
Determine cost-benefit of acquiring Empire Electric system	City makes informed decision about renewing agreement or buying the electrical system and provides competitive pricing for electricity
Objectives - Sewer System	Expected Result
Develop a plan with budget for the repair, replacement, and improvement of the sewer systems within the City	City has a basis for loan and grant applications and setting budget priorities for this system. Progress is made annually to reduce the miles of outdated pipe.
Objectives - Storm Water Control	Expected Result
Complete implementation of Storm Water Drain Master Plan	Storm water is efficiently controlled and directed away from the city
Objectives - Streets, Curb, Gutter, and Sidewalks	Expected Result
Acquire land owner agreements to help fund paving city streets where development outpaces the City's ability to provide pavement	Cost for pavement is shared with property owners and City
Continue implementation of plan to install/repair sidewalks, curb, and gutter in areas not fronting Main and Center streets.	City makes annual progress on safe pedestrian-friendly connections between schools, business district, and residential neighborhoods.
Establish a fund to secure rights-of-way for future city streets	All lots within the City will have access to highways or City streets

3.3 Public Safety

Monticello's public safety includes police, fire, public works (see section 3.2 City Services), and emergency management. Dispatching is handled by the San Juan County Sheriff's office for all police and fire calls, as well as public works emergencies. It will be important for the City to

continue to coordinate with other agencies in order to provide for public safety because of the City's limited resources.

Police service is provided by the Monticello Police Department. There are currently two full-time officers and a Police Chief, and the department also relies on part-time support from off-duty Highway Patrol and County Sheriff officers.

Over the next several years changes will be needed to keep pace with evolving standards in the law enforcement profession and the needs of Monticello City.

Fire protection is provided by the Monticello Fire Department, which maintains a large mainline pumper, 4WD pumper-brush truck, brush truck, and a brush-rescue truck. Additional equipment and a tanker truck are borrowed from San Juan County when needed. The Department is staffed by 20 volunteer firefighters, including its chief, and carries a fire protection rating of ISO Class 6. To maintain its equipment, training and staffing levels, and an appropriate fire protection rating, the Fire Department will need to address several items through the life of this general plan.

Monticello has a one-quarter time Emergency Manager, who is responsible for preparing and implementing the City Emergency Response Plan. This position is new as of 2016 and is funded by the Emergency Management Performance Grant managed by the Utah Division of Emergency Management. The Emergency Manager coordinates directly with San Juan County and the State of Utah Division of Emergency Management for additional support, because the City has only limited capabilities to respond to a disaster.

GENERAL PLAN

PUBLIC SAFETY GOAL: Monticello is a safe place to live

Objectives - Police Dept.	Expected Result
Hire a fourth full-time police officer	Police Department includes one chief and 4 full-time officers
Install and maintain a camera system on Main and Center streets	Police officers spend more time in public contact and patrol, and traffic violations can still be addressed
Revise or update policies for the Police Department	Procedures are professional current, consistent, and applied without prejudice
Schedule & participate in public safety programs at local schools	Police officers are known to students and there is more mutual respect.
Objectives - Fire Dept.	Expected Result
Create cost-recovery ordinances for fire suppression and recuse truck call-outs	City is authorized to recover expenses for firefighting and rescue operations outside of City limits
Establish an incentive plan for the Fire Department	Firefighters will have benefits based on years with the Fire Department
Recruit & train more firefighters	City has a larger firefighting force and is not impeded by loss or absence of present personnel
Revise or replace the current pay structure for fire fighters	Firefighters are paid for hours away from their full-time employment
Schedule & participate in public safety programs at local schools	Firefighters are known to students and there is more mutual respect.
Objectives - Emergency Response	Expected Result
Complete the Emergency Response Plan	City will have clear policies and procedures in the event of an emergency

3.4 Moderate Income Housing

There were 957 housing units in Monticello in 2015, according to data from the US Census Bureau (Table 9), 741 of which were occupied. Nine of the occupied housing units lacked complete plumbing facilities. The average household size of owner-occupied units was 3.03 persons while the average household size of rental units was 3.37 persons. The median monthly housing cost for owner-occupied units was \$750 and for renters the median monthly cost was \$698. For the occupied rental units, 15 households paid rents greater than 30% of their income.

GENERAL PLAN

Table 9 - Selected characteristics of Monticello housing units in 2015

Year Built	Units	Percent of Units	Bedrooms	Units	Percent	Monthly Cost	Owner Costs	Renter Costs
2010 or later	18	1.9%	1	56	5.9%	Less than \$300	12.6%	0%
2000 to 2009	150	15.7%	2	223	23.3%	\$300 to \$499	24.2%	9.3%
1990 to 1999	103	10.8%	3	358	37.4%	\$500 to \$799	15.8%	49.1%
1980 to 1989	83	8.7%	4	231	24.1%	\$800 to \$999	17.1%	13.4%
1970 to 1979	196	20.5%	5 or more	89	9.3%	\$1000 to \$1499	28.8%	0%
1960 to 1969	70	7.3%				\$1500 to \$1999	1.5%	0%
1950 to 1959	131	13.7%	Occupancy	Units	Percent	\$2000 to \$2499	0%	0%
1940 to 1949	26	2.7%	Owners	525	54.9%	\$2500 or more	0%	0%
1939 or earlier	180	18.8%	Renters	216	22.6%	No cash rent	0%	28.2%

There are six apartment buildings and two dwelling complexes in Monticello that are rental units. At least three of the apartment buildings and one dwelling complex are not currently functional and would require major work to bring them into compliance with building, safety, and health codes. One apartment building is designated for income-restricted occupants, as noted below. There are no condominiums or townhouses in the city. All but one of the multi-family units are located in the C-1 Commercial Zone; the other is a non-conforming use in the R-1 Residential Zone. An undetermined number of single-family homes are rental units, including long-term and short-term rentals. Some rental homes switch between long- and short-term rental, or are sold as owner-occupied housing, depending on local market demands. The City does not currently regulate short-term rentals (rented for less than 30 days).

Utah State Code defines moderate income housing as "housing occupied or reserved for occupancy by households with a gross household income equal to or less than 80% of the median gross income for households of the same size in the county in which the city is located" (10-9a-103(34)). Applying the 80% guideline, a Monticello household with a median gross income of \$33,187 (\$2,765.58 per month or about \$15.96 per hour) or less would probably meet the

GENERAL PLAN

criterion for moderate income housing based on the US Census Bureau's median gross income for San Juan County of \$41,484 in 2015. Monticello has 31 housing units (4.2% of all housing) that are designated as affordable housing: pay-to-own CROWN homes and a rent-subsidized apartment complex. Goals for addressing moderate income housing needs are found later in the chapter.

The four CROWN (Credits-to-Own) homes in Monticello were constructed in 2006 under the auspices of the Housing Authority of Southeastern Utah. Low-income Housing Tax Credits were used for the project. This program limits the occupants to households earning less than 60% of the area median income, and over a 15-year period the rent payments are applied toward the purchase of the house thus allowing the tenant to buy the house at a lower cost than the prevailing market.

The Abajo View Apartments in Monticello is the only designated low-income apartment complex in the city. It was constructed in the 1980s and has been recently remodeled. The complex was built, at least in part, with funds authorized by section 515 of the Rural Rental Housing program. Applicants for the 27-unit complex qualify if their income is very low, low, or moderate, if they are elderly, or if they have disabilities. Priority for placement is given to those living in substandard housing.

A. Home Ownership Assistance

The US Department of Agriculture maintains a Rural Development office in Monticello to make housing grants and loans to persons with very low, low, and moderate incomes. Limits are set on the maximum amount an applicant's household can earn in order to qualify (Table 10). These limits are adjusted periodically, and applications are considered on a case-by-case basis.

Table 10 - Household income limits for Rural Development programs as of June 2017

USDA Program	1-4 persons	5-8 persons
Very Low Income	\$33,850	\$44,700
Low Income	\$54,150	\$71,500
Moderate Income (Direct)	\$59,650	\$77,000
Moderate Income (Guaranteed)	\$40,600	\$53,600

The local Rural Development staff currently believes that there are sufficient vacant houses, houses on the market, and vacant lots in Monticello to supply the housing needs of people whose income levels would qualify them for one of the USDA programs. Currently, Rural Development

GENERAL PLAN

will not approve loans for houses that are less than 1,000 square feet or over 2,000 square feet in size, or for houses on lots larger than one acre, and they do not provide funds for mobile homes. They generally deny loans for houses that are priced higher than \$220,532, and houses located in non-residential zones. In addition to these policies, some personal situations can disqualify an applicant, and these are seen recurrently in Monticello:

- Applicant has no or poor credit history. At least two years of good credit is generally required.
- Applicant has existing loans that aggregate to a significant amount of their annual income. Such loans could be, for example, college loans, automobile loans, loans for other real estate, business purchase contracts, or debt repayment agreements.
- Applicant is not currently employed or has an employment history of less than two years
- Applicant is not a US citizen or legal permanent resident.

In addition to loans for purchase of a house or to buy a lot and construct a home, Rural Development also has programs that assist existing homeowners to remodel and repair their homes. Some of these programs are designed specifically for senior citizens. Income is again the qualifying factor, and applications are considered on a case-by-case basis. Rural Development also cooperates with other lenders and can help direct an applicant to other appropriate funding sources.

Monticello has two banks and a credit union. The credit union does not make loans for housing, but the banks may issue loans to qualified persons for the construction, purchase, or remodeling of a house. At the present time it is common for the banks to expect the homebuyer to cover a down payment equal to 20% of the purchase price. Policies may limit the type or size of houses that can be financed, and applications are considered on a case-by-case basis.

B. Rental Housing Assistance

The US Department of Housing and Urban Development (HUD) offers several programs that can assist qualified applicants with rent payments:

- Privately owned subsidized housing
- Public housing
- Housing Choice Voucher Program (Section 8)
- Low Income Housing Tax Credits

GENERAL PLAN

Applications are reviewed on a case-by-case basis, and program standards periodically change. There are no privately owned housing units in Monticello subsidized through HUD programs.

Although there is no housing authority office in Monticello, the city is within the area served by the Housing Authority of Southeastern Utah, located in Moab, Utah. The Housing Authority develops, constructs, and administers affordable housing, including public housing, the Housing Choice Voucher Program, CROWN homes, and the Low Income Housing Tax Credit program. It is this agency that oversees the four CROWN homes in Monticello. At the present time, they have no affordable housing construction projects scheduled in Monticello and do not have plans to conduct a market survey to determine the need for such housing.

MODERATE INCOME HOUSING GOAL:

Improve availability of low and moderate income housing

Objectives	Expected Result
Develop and keep current a page on the City web site that provides information about programs that help low to moderate income persons	Citizens and potential residents have the information they need to find or build low/moderate income housing in the City
Consider a zoning classification for low and moderate income housing	City provides a cost effective opportunity with smaller lots for smaller homes
Expand areas zoned as R-1 and R-2	Developers have more land area for single-family and multi-unit housing
Obtain & retain a place on the board of the Housing Authority of Southeastern Utah	City interests are represented and City Council makes informed decisions affecting housing needs
Offer incentives for development of multiple-family rental units	City waives or reduces fees for construction of multiple-family rental units (apartments)
Review & revise as needed, City codes to facilitate construction of moderate income housing	City codes are not barriers to development of moderate income and affordable housing, and sufficient area is available for new construction

3.5 Community Promotion

Community promotion refers to how the city presents itself as a place to live and support a family. In many respects, the perception of Monticello as a place to live is closely related to the city's economy. To the extent practicable, the "feeling" of the city is discussed in this section, while the business climate is discussed in section 3.6 Economic Development.

According to the Monticello Community Analysis completed by the Rural Planning Group in July 2016, 67% of the respondents are proud of Monticello, and appreciate its key characteristics:

GENERAL PLAN

- | | |
|--------------------|-------------------|
| Small-town feel | Friendly and safe |
| Lack of crime | Clean air |
| Quiet and peaceful | Beautiful setting |

About 41% of the respondents expressed a desire for some growth, while 23% said they don't want any growth and 20% said they would like to see significant growth. Asked what they expected Monticello to be in ten years (by 2036), participants envisioned a city that has:

- A population large enough to support a stable economy
- A stronger economy with a diversity of businesses and industry
- A clean and prosperous appearance
- An atmosphere of acceptance and welcome for new and different people
- Tourism based on outdoor adventure
- Year-round employment opportunities with higher paying jobs

The attributes currently enjoyed and visions for the city's future are not mutually exclusive. The prospects for the city, therefore, lie in how it encourages a reasonable amount of growth while preserving the quality of life that locals currently enjoy (Table 11).

Table 11 - Survey responses pertaining to a sense of community, 2016

Issue or Concern	Agreement on importance
City reputation	92%
Capability of City leadership	84%
Look and feel of the city	83%
Limited local amenities	83%
Economic uncertainty	83%
Community identity	83%
Condition of City's capital assets	75%
Aging of population	75%
Population decline	66%
Land-use questions	41%
Desire some growth	41%
Need more jobs	29%
Affordable housing	26%
Don't want any growth	23%
Want significant growth	20%
Unchecked growth	11%
Crime	11%

GENERAL PLAN

There are many reasons to live in Monticello, including excellent schools with small class sizes, near-by outdoor and family recreation opportunities year-round, and an award-winning golf course. A quilting club, Boy Scout troops, Rotary Club, Lions Club, church groups, and Daughters of Utah Pioneers all foster social connections. Other clubs exist at the high school, and school teams enjoy enthusiastic support from families, friends, and local businesses. Senior citizens enjoy easy access to medical facilities. Churches for the Baptist, Catholic, Evangelical, and LDS faiths are found in Monticello, and services for other denominations are located in Dove Creek, CO, and Moab and Blanding, UT.

San Juan County operates the public library in Monticello, where regular programs for children and young readers are offered, speakers discuss a variety of subjects, and various art displays and seminars are held. The building has a meeting room with kitchen, free Wi-Fi, and an outdoor seating area. The County sponsors the Senior Center, located in the community center at the Hideout Golf Course, operates a van for seniors, and provides home delivery of meals. A meal is also prepared twice per week for seniors to gather. Other activities and programs are scheduled

which are well attended. City-provided amenities are discussed in sections 3.7 Parks and Recreation, and 3.9 Historic Preservation.

Monticello needs to continue to foster a welcoming environment where families relocate to the community. About one-half of the BLM and Forest Service full-time employees who work in Monticello live outside the city limits. Many seasonal employees of government agencies and local tourism-focused businesses also live outside the city because they cannot find affordable housing for the summer

season. While reasons for choosing to live elsewhere are individual, there are common factors that are considered when making those decisions:

- Availability of suitable houses (cost, place for livestock, move-in ready, etc)
- Availability of suitable rental units (cost, size, condition, allow pets, etc)
- Employment opportunities for family members
- Preference for more shopping, services, and evening entertainment
- Religious affiliation
- Availability of rentals units for short-term use (seasonal job, or waiting for financing to buy a house)
- Separation between work and home life

The city benefits from the many talented artists and civic-minded people who contribute to the aesthetics of the community. Most community events are organized by non-profit and volunteer groups that are passionate about the quality of life in our city. Blue Mountain Entertainment, for example, is a community organization that brings world-class performers to Monticello at a very affordable price. Working with these and other volunteer groups to enhance arts and entertainment will be an important part of Monticello's ability to grow, diversify, and maintain a sense of community.

GENERAL PLAN

COMMUNITY PROMOTION GOAL:

Monticello welcomes and includes residents with a variety of backgrounds

Objectives	Expected Result
Analyze A-1, R-1 and R-2 zones, revise as needed to assure adequate room for housing growth	Conflicts between business and residential uses are minimal and areas are properly zoned for residential expansion
Create a way-finding system for the City	Signs clearly indicate how to reach specific places in the city.
Maintain and keep current a web site about City activities and events	Residents and visitors can find things to do and read minutes of committee and City Council meetings
Organize & host an inter-faith committee to improve inclusion in City events	All religions feel welcome and respected at City events
Revise animal keeping ordinances and residential zoning to be consistent with the City's rural setting	Under specified circumstances some farm animals are allowed within the city.

GENERAL PLAN

3.6 Economic Development

For economic development in Monticello to be successful, the city needs a mix of businesses that export products and services, bring new money to the city, and those that serve the local populace. It is also important for the business mix to include some that are not dependent on the seasonal variability of the tourism industry or the fluctuations of extractive industries. The idea is to avoid tying Monticello's economic base to any one sector; a mix helps the business community survive downturns and adapt to upticks in local, regional, and national markets (Table 12). It also helps support a shop-at-home strategy and will boost the number of jobs that provide a living wage (Table 13) for a full-time worker (data for Monticello are not available).

Table 12 - Typical Salaries for jobs in San Juan County, 2016

Occupational Group	Annual Salary	Hourly Wage
Management	\$79,740	\$38.34
Computers & Mathematical	\$70,760	\$34.02
Architecture & Engineering	\$70,180	\$33.74
Legal	\$61,960	\$29.79
Healthcare Practitioners & Technical	\$57,660	\$27.72
Business & Financial Operations	\$57,470	\$27.63
Life, Physical & Social Science	\$53,090	\$25.52
Installation, Maintenance & Repair	\$43,000	\$20.67
Education, Training & Library	\$42,620	\$20.49
Construction & Extraction	\$38,250	\$18.39
Arts, Entertainment, Sports, Media	\$38,160	\$18.35
Community & Social Service	\$37,170	\$17.87
Protective Service	\$35,570	\$17.10
Transportation & Material Moving	\$31,710	\$15.25
Production	\$31,680	\$15.23
Office & Administrative Support	\$30,130	\$14.49
Healthcare Support	\$26,290	\$12.64
Sales & Related	\$25,580	\$12.30
Farming, Fishing & Forestry	\$24,410	\$11.74
Personal Care & Service	\$21,590	\$10.38
Building-Grounds Cleaning & Maintenance	\$21,340	\$10.26
Food Preparation & Serving	\$19,220	\$9.24

GENERAL PLAN

Table 13 - Wage categories in Monticello, 2016

Householder	Living Wage	Poverty Wage
1 Adult	\$9.97	\$5.00
1 Adult, 1 Child	\$21.13	\$7.00
1 Adult, 2 Children	\$27.38	\$9.00
1 Adult, 3 Children	\$35.42	\$11.00
2 Adults	\$8.33	\$3.00
2 Adults, 1 Child	\$12.19	\$15.10
2 Adults, 1 Working	\$16.65	\$7.00
2 Adults, 1 Working part-time, 1 Child	\$12.19	n/a
2 Adults, 1 Working, 1 Child	\$21.05	\$9.00
2 Adults, 1 Working, 2 Children	\$23.74	\$11.00
2 Adults, 1 Working, 3 Children	\$26.71	\$13.00
2 Adults, 2 Children	\$15.10	\$5.00
2 Adults, 3 Children	\$18.16	\$6.00

Businesses need incentives to invest and re-invest in their own buildings. Monticello was designated an Enterprise Zone by the State of Utah in 2002, and the designation was renewed in 2017. An Enterprise Zone gives businesses a tax advantage for investing in our community. The City also has a business development program that targets capital improvements and job creation. This program gives businesses a break on building permits, connection fees, and property tax rebates for investing in Monticello. This is intended to spur initial growth and enhance or replace some of the buildings (redevelopment) in the commercial zones.

Promoting tourism is also important to Monticello, which has several attractive assets:

- The city is close to National Forest and Bureau of Land Management land where hiking, mountain biking, ATV, and horseback riding trails are available.
- Monticello is less crowded and cooler during summer months than nearby communities.
- The city is located only a few miles from the Indian Creek Unit of Bear's Ears National Monument

GENERAL PLAN

Combined, these elements provide local businesses the opportunity to foster outdoor recreation in an expanded season from April to October. A marketing survey conducted in 2017 identified key factors for tourism promotion:

- Tourists will spend about 80% of their time shopping
- Preferred shopping areas are pedestrian friendly, compact, welcoming, and well maintained.
- Most tourists are out for dining, shopping, and walking the town between 6 pm and 10 pm.

Promotion of winter recreation would help round out the tourism cycle, so motels, RV Parks, and restaurants can have more consistent sales. Monticello should encourage destination type accommodations for entire families and emphasize activities over assets. More residents and tourists year-round could also support a variety of restaurants that are open late and serve adult beverages. Monticello has an opportunity to attract a family style restaurant with a bar to cater to a greater variety of customers.

Diversifying the local economy will also be important in the future. Currently many of the jobs are in the governmental and healthcare sectors. Service related jobs will increase with tourism and population growth, but City government can contribute to economic diversity through land use and policies that encourage business recruitment, expansion, and retention. Areas where the City may make a difference can be drawn from the Area Sector Analysis completed in 2017 for San Juan County. This study examined the importance of 47 infrastructure and quality of life factors within 14 industries identified for their development potential in the county. Table 14 reflects only those factors that the City can directly manage or control.

Table 14 - Factors important to business recruitment, expansion, and retention

GENERAL PLAN

City Managed or Controlled Factor	Apparel Mfg	Hardware Mfg	Agri-Mining Machinery Mfg	Industrial Machinery Mfg	Communications Equip Mfg	Electrical Equip Mfg	Aerospace Parts, Products Mfg	Medical Equip, Supplies Mfg	Food Product Wholesalers	Other Telecom	Research and Development	Outpatient Care Centers	Economic Programs Admin
High volume water supply	20%	11%	38%	29%	0%	10%	55%	13%	0%	0%	24%	25%	50%
High volume wastewater disposal	20%	11%	15%	14%	0%	10%	55%	13%	17%	0%	12%	19%	50%
Solid waste disposal	0%	22%	16%	29%	0%	10%	22%	13%	33%	0%	20%	27%	0%
Future expansion at site	20%	33%	76%	57%	17%	40%	55%	38%	83%	50%	46%	51%	0%
Favorable business tax rates	100%	44%	76%	86%	84%	80%	100%	75%	100%	50%	58%	60%	100%
Local government incentives	0%	0%	0%	0%	0%	0%	0%	0%	0%	0%	0%	0%	0%
Lenient environmental regulations	60%	0%	16%	29%	0%	10%	55%	38%	0%	0%	2%	0%	50%
Low crime rate	100%	100%	69%	100%	17%	60%	66%	76%	50%	50%	73%	81%	0%
Affordable housing	60%	55%	69%	71%	17%	60%	55%	63%	83%	50%	78%	67%	50%
Clean air and water	60%	66%	54%	100%	50%	70%	89%	88%	33%	0%	68%	65%	0%
Public safety services	40%	89%	62%	85%	34%	90%	100%	51%	100%	0%	83%	87%	50%

The same study also identified high-speed internet connections as a need in all of the industries listed in Table 14, and access within 30 minutes to a package freight service was important to many. Although these two factors are not within the City's control, City officials may be able to exert influence through various development plans and contacts.

The City needs a new industrial space that would help expand the diversity of businesses situated locally. One possible location is the City's land at the airport north of town; it has highway access,

GENERAL PLAN

is close to electrical and telephone service, and is away from residential developments. Water and sanitation development would need to be addressed as the location is far enough from existing City infrastructure that connections may be infeasible. Other areas may be found in the northeast part of the city, and on privately owned land within the City's expansion area.

ECONOMIC DEVELOPMENT GOAL:

Monticello supports a viable and diverse economy

Objectives	Expected Result
Analyze existing A-1, C-1, C-2, and I-1 zones, revise as needed to foster business growth	Commercial, industrial, and residential uses are separated and have room for growth
Develop & implement a business recruitment plan	City has planned growth and an expanded tax base
Develop & implement a downtown master plan	City retains a business district that is inviting and viable
Develop & implement a marketing plan for Monticello as a year-round destination for tourists	City is consistent in promotions and new businesses come to provide year-round service
Coordinate with the Manti-La Sal National Forest to maintain the vegetation feature called Horsehead	Outline of the Horsehead is maintained and remains recognizable
Prepare & implement an economic development plan	City helps business owners to connect with funding sources
Recruit a variety of new businesses and install the infrastructure to suit in a new industrial park	City has a suitable development for new industry or relocation of existing industries.
Retain the services of a building inspector for residential and commercial construction	Builders have prompt inspections and City is assured that buildings are constructed to standards
Review & revise as needed, City codes to favor business growth and retention	City codes are business friendly to the extent compatible with other goals in this plan
Review & revise as needed, City sign ordinance to maximize a business owner's options for making the business easily seen	City sign ordinance supports the way-finding system and visitors and residents can quickly find the business they seek
Waive sign and fence permit fees for new businesses and expansion of existing businesses	City demonstrates support for business development while still upholding standards

3.7 Parks and Recreation

GENERAL PLAN

Public parks and recreation areas are essential to the quality of life enjoyed by Monticello's residents. These facilities (Table 15) are also important for economic development. The general location of the areas is described in the table using Main and Center Streets as the reference point. For example, a park located in the NE quadrant would be north of Center Street and east of Main Street.

Table 15 - City parks and recreation areas

Facility	Year built/ remodeled	Approx Acres	Location	Amenities
Ballfield Park		9.55	West central	Covered pavilion-basketball court, indoor restrooms, City water, concessions, picnic tables, playground, 2 baseball diamond with field lights, 1 baseball diamond without lights, batting cage
Veterans Memorial Park		3.2	NE	Covered pavilion, indoor restrooms, City water, playground, picnic tables, skate park, commemorative display
Circle Park	1960s	1.7	SW	Covered pavilion, picnic tables, playground, single basketball hoop
Loyd's Lake Recreation Area	1986/ 2000	161	SW	Gravel walking path with benches, vault toilets, picnic area with grills, picnic tables, sand volleyball pit
Millsite Park	2001	350	SE	Gravel walking path, single track trail, picnic table, interpretive display
Swimming Pool (summer only)	1980s/ 2010	n/a	SW	Indoor pool, indoor restrooms, changing areas, lockers, pickleball court, climbing wall, diving board, water basketball hoop, water volleyball net, water slide, water toy, accessibility chair
Hideout Golf Course	2002		SW	18-holes and driving range; club house, pro shop, and community center with conference room, indoor restrooms, outside deck, and commercial kitchen
Pioneer Park		0.4	SW	Gazebo, outdoor electrical plug-ins, bench, restored pioneer buildings, replica pioneer church, interpretive display

The City offers several sports programs for residents, including softball, soccer, golf tournaments, and endurance races. They also organize the Pioneer Day festivities each July. The swimming pool is open from May through September but closed winters because the building is not insulated. In addition, San Juan County hosts the annual County Fair at the fairgrounds in Monticello, and stages portions of their ATV Safari from trailheads located just outside of town.

GENERAL PLAN

PARKS & RECREATION GOAL:

City parks and recreation areas are safe, appealing, and suited to year-round use

Objectives	Expected Result
Complete & implement a master plan for parks and recreation assets	City makes informed decisions about maintenance, improvements, and upgrades
Complete a feasibility study for year-round operation of the swimming pool	City makes most effective use of asset
Develop & implement a plan to connect parks and facilities by trail	Residents and visitors can move safely among the City facilities
Develop & implement an events plan to expand recreation to year-round activities and events	City actively drives more business to the town and makes effective use of recreational assets
Keep events calendar up to date on City website	Participants, families, and visitors find complete and current information about events
Maintain an event registration page on the City web site	Participants can register and pay for events on-line

3.8 Community Aesthetics

Monticello's tree-lined streets earned the city designation as a Tree City USA, by the National Arbor Day Foundation in 2008, a distinction the city still enjoys. In 2015, the Main and Center Street Revitalization/Curb Appeal Incentive was instituted, allowing business owners and private residents the opportunity to spruce up the exterior of their buildings. The City's Parks and Beautification Committee, an all-volunteer group, does a great job creating banners and maintaining flower arrangements on Center and Main Streets.

In 2017, an assessment of Monticello was conducted along Main Street and a short segment of Center Street east of Main. The entries to the city are its gateways and they define the arrival and departure points to Monticello. The core area is the heart of the city, a place that encourages people to get out of their vehicles and explore what the city has to offer. In between these two areas are transitions, the stretches of the principal streets where traffic slows when entering town or speeds up when leaving, and where signs help drivers with directions to important destinations. However, the location, size, and number of directional and information signs placed on Main and Center streets is regulated by UDOT and not the City. Transition areas also help generate impressions of the town. Scores run from low (0) to high (10) and the higher the score the better (Table 16).

GENERAL PLAN

Table 16 - Summary of Main Street survey, 2017

Assessment criteria	Score
MAIN STREET GATEWAYS	
Defined sense of arrival	6
Reduction in speed upon arrival	8
Attractive/inviting upon arrival	3
First impression of community	3
Defined sense of departure	5
Increase in speed at departure	10
Visual quality upon leaving	2
Last impression of community	5
MAIN & CENTER TRANSITION AREAS	
North transition to core area	5.5
South transition from core area	8
Vacant or abandoned buildings or empty lots north of Center	3.5
Vacant or abandoned buildings or empty lots south of Center	5.5
Development concentrated toward core area	6
Clear directions to important destinations	6
Actual traffic speed transitions to posted speed	6
MAIN STREET CORE AREA	
Defined sense of arrival	5
Cohesive look and feel	3
Inviting building height to road width ratio	4
Sidewalk width	4
Buildings set close to sidewalk	6

The same survey also considered whether the highway corridor was safe to enjoy and imparted a sense of security, if Main Street was a pleasant place to be, and whether people could come and go easily. The responses were also ranked from low (0) to high (10), with a higher score being the desired outcome (Table 17).

GENERAL PLAN

Table 17 - Summary of aesthetic considerations from Main Street survey, 2017

Assessment Criteria	Score	Assessment Criteria	Score
SAFE TO ENJOY		SECURE FEELING	
Safe walking space	7	Evidence of decay or neglect	6
Safe for bicycles	1	Visible by others & businesses	4
Safe to cross road	4	Good night lighting	7
Safe to drive through	7	Blind spots & areas to hide	5
PLEASANT STREET		EASY TO COME & GO	
Street noise	7.5	Accessible & convenient parking	7
Trees, plantings, vegetation	7	ADA standards met	3
Readily available shade	3	Sidewalks connect to other areas	4
Places to sit	2.5	Clear directional signs to points of interest	4
Length of core area	4	Businesses are pedestrian oriented	3.5

The final element considered during the 2017 Main Street survey was whether the street was alive with activity and interesting (Table 19). Like the prior survey data, a higher score was desirable.

Table 18 - Activities and interest factors from Main Street survey, 2017

Assessment Criteria	Score
Clear anchor business or attraction	2.5
Areas for public gatherings	9
Effective use of public art	3
Reasons to visit Main & Center streets	4.5
Effective use of historic buildings	3

GENERAL PLAN

COMMUNITY AESTHETICS GOAL:

Monticello is an appealing place to live and do business

Objectives	Expected Result
Coordinate with UDOT to replace old street lights on Main & Center to match those installed most recently	Street lighting on principal highways is uniform and inviting
Create a theme or brand for the City	Citizens are united in how the city appears
Develop & implement a City Center master plan	City has new space for businesses in a pedestrian friendly setting, and large truck traffic may diminish
Develop a picnic area or/and vendor booths at the Welcome Center complex	The area will be used by locals and visitors and will no longer be an empty lot on Main Street.
Develop a Master Streetscape Plan for Main & Center Streets	Coordinated and planned/designed sidewalks, lighting, curb & gutter, and intersection control.

3.9 Historic Preservation

Today there are few known archaeological sites in the City that date to the period before Anglo cowboys and settlers arrived. This lack of prehistoric evidence reflects both the development activities that lead to the modern community as well as the paucity of archaeological inventories within the city boundary. The only recorded prehistoric archaeological site within Monticello is a small concentration of rocks that may be the remains of an Ancestral Puebloan (Anasazi) dwelling. At the time it was documented in 2003, archaeologists believed the site to be eligible for the National Register of Historic Places.

The National Register of Historic Places is America's catalog of districts, sites, buildings, structures, and objects that are considered significant to our history, architecture, archaeology, engineering, and culture. Eligibility for listing on the National Register is determined by federal regulations and the Utah Division of State History. Evaluation of eligibility for the National Register is a key component of federally funded or sanctioned projects regardless of land ownership and is required for some projects funded or sanctioned by the State of Utah.

The Utah Division of State History holds more than 300 records for potentially historic buildings or structures. The records are incomplete, many don't have street addresses or are duplicates, and at least some records may be incorrect. The information was compiled during several inventories conducted by the State, but the City does not have copies of the reports or records. Neither the State of Utah nor the City has identified historically important themes and few efforts

GENERAL PLAN

have been made to address preservation of local history. National Register evaluations have been conducted for only at a few properties within the city, all at the request of the property owners. Nonetheless, some extant homes and commercial buildings in town reflect the city's historic qualities (Table 19).

Table 19 - Examples of historic buildings highlighting Monticello's past

Property	Date	Address	Historical Notes
F.I. Jones House	1896	117 E 200 S	F.I. and Mary Mackelprang Jones were owners of the original Monticello townsite and responsible for parceling out the town lots. The house is constructed of locally fired brick. Their home was listed on the National Register of Historic Places in 2003.
Nephi Bailey House	1896	180 E 200 S	The first lumber house in Monticello, it was also the first in town to have gas lights in 1909. It has been refurbished and remains a family home.
Brick Schoolhouse	1897	200 S 100 W	Made from locally fired brick, enlarged in 1908, but too small for the local school population by 1916. It later housed a newspaper office before a fire damaged the structure and resulted in its current stucco exterior and new roofline. Converted to an apartment, it is now used by an adjacent business for storage.
Martinez Johnson House	1905	80 E 200 S	Constructed of logs by "Tenas" Johnson, a Danish immigrant, for his family home, and later remodeled and converted by Nephi Bailey into a shop repair shop. Today it is used for storage.
Martinez Johnson Store	1910	92 E 200 S	The large rock building was the second structure built for "Tenas" Johnson's mercantile business. In 1926 the "rock store" as it was called, was remodeled as the State Bank of San Juan. Since 1938 it has housed several businesses, including a tavern, pool hall, and apartments. It is currently used for storage.
San Juan Garage Building	1917	64 S Main	Erected when auto travel was still new, the building was first a repair shop and service station. Later it was a lumber store with gas pumps, before being remodeled in 1962 as an auto parts and hardware store.
Hyland Hotel	1918	116 S 100 W	Initially a family residence for Joseph Henry Wood, it was adapted for use as a hotel in 1924 and at times housed the local doctor's office, before again becoming a family home. It is made from locally fired brick and was listed on the National Register of Historic Places in 1994.
Young's Theater	1918	275 S Main	Constructed by Alfred Young to replace an earlier building, it served as a movie theater. Today it is used for storage.
L.H. Redd III House	1919	64 S 100 W	Constructed by James Decker and occupied by the Lemuel H. and Lovina Mickelson Redd family, this house was one of the first in town to have a full bathroom.
County Courthouse	1927	117 S Main	Made of locally fired brick and sandstone quarried in Montezuma Canyon, it was expanded in the 1950s during the

GENERAL PLAN

			uranium boom. The original jail cell, formerly in the basement, can be seen in Veterans' Memorial Park. The building now houses the county's administrative offices and is eligible for listing on the National Register of Historic Places.
Palmer's Confectionary	1939	140 S Main	Constructed during renovation of Main Street, the brick-walled store sold ice cream, soda, and other items. Today it houses a pharmacy and gift shop.
Little Theater	1939	132 S Main	Part of renovating Main Street, the brick building housed the town's movie theater, later converted into a law office. A credit union and meeting space occupy the theater building today.
Bailey & Wood Market	1939	124 S Main	Constructed during renovation of Main Street, the wood-frame grocery store also had the town's first frozen food lockers. It has housed several businesses in the years since.
Joe Adams House	1940	117 N Main	The English Tudor style was popular at the time this house was built for Joe and Dora Black Adams. Later family members added the garage and changed the entry but retained most of the original design. It is eligible for listing on the National Register of Historic Places
Lawrence Black House	1941	Corner of 300 S & 100 E	The Lawrence and Eva Black family all participated in making the bricks for their new home and lived in the basement until the upper rooms were finished. A stucco finish hides their brickwork.
Fletcher Bronson House	1953	365 Abajo Drive	Fletcher and Eva Butt Bronson had this brick home constructed by a local contractor and paid for it with proceeds from the Happy Jack uranium mine.
Monticello Library	1961	80 N Main	Commissioned by San Juan County as one of two libraries in the county system, the building demonstrates the modernization that swept in with the uranium boom. Ralph Edwards, award-winning Utah architect, designed the building; rocks for the library were quarried from Indian Creek.

In addition to these buildings, there are reproductions and relocated historic structures in Pioneer Park on South Main Street. A self-guiding walking tour of selected historic buildings is available at the Southeastern Utah Welcome Center and is designed to complement the model of Monticello during its early years.

The Frontier Museum, located in the Welcome Center complex contains artifacts and information about historic Monticello and is housed in a small remodeled barn that was once storage for the L.H. Redd Company Store, which operated on the site from 1910 to 1956. The Emerson-Brantingham Big Four antique tractor, one of only a few operable tractors of its type in the world, is also sheltered at the Welcome Center complex. The tractor is not a museum object, and is driven for special events such as parades, tractor pulls, and fund-raising activities.

GENERAL PLAN

The Monticello Community Foundation was organized in 2003 as a non-profit corporation focused on preserving historic buildings and objects in Monticello. In addition to holding fund-raising events to fund the maintenance and operation of the Big Four tractor, the foundation acquired Young's Theater, had a new roof installed, and made minor repairs to the interior of the vacant building. The foundation allowed its Utah business license and IRS certification to expire in 2010. Thus, the future of Young's Theater is uncertain, although the City has assumed responsibility for the tractor.

HISTORIC PRESERVATION GOAL:

Elements of the past are an important part of the City's future

Objectives	Expected Result
Become a Certified Local Government	City is eligible for funds to be used for a variety of historic preservation actions.
Complete an inventory of historic buildings in Monticello	City assists property owners to find tax incentives and funds for preserving identified buildings
Prepare & implement a collections management plan for the Frontier Museum	City and owners of the objects at the museum make informed decisions about the preservation of artifacts.
Prepare & implement an operations & maintenance plan for the Big Four tractor	Tractor continues to be operable and its historic qualities are maintained
Prepare & submit nomination of the Big Four tractor to the National Register of Historic Places	Tractor is nationally acknowledged and draws visitors to the city. City uses the tractor's status for advertising and grant leverage.
Prepare a self-guided walking tour of town, highlighting places of historical importance	Visitors can see more of the town and enjoy its history

3.10 Energy Conservation

Conservation of energy includes alternative sources for power, strategies to reduce water consumption, provision for non-vehicular travel, and helping the residents of Monticello to understand and use landscaping, building materials, and site design as a means to achieve energy conservation at the personal level.

ENERGY CONSERVATION GOAL:

Provide leadership for city-wide energy conservation

Objectives	Expected Result
Review & revise zoning ordinances to allow small wind turbines within the City	Residents and business will use wind energy and reduce their consumption of electricity from the grid
Implement an award program to recognize residents, business people, and institutions that are leaders in energy conservation	Conservation measures are appreciated and recognized
Add solar panels to City buildings	Reduce consumption of electricity from the grid and provide an example for energy conservation
Review & revise building permit requirements to encourage energy efficient remodeling and rehabilitation of existing residences and businesses	Energy conservation is part of all remodels and building rehabilitations
Develop & implement an energy conservation plan for City-owned building and vehicle fleet	City leads the community in energy conservation, reduces electrical costs and gas and diesel consumption.
Update the City web site to include energy conservation strategies for home owners	Residents have a current and reliable source for how they can reduce their own energy consumption
Review & revise subdivision & PUD ordinances to encourage energy efficient design	Energy conservation is part of all new residential construction

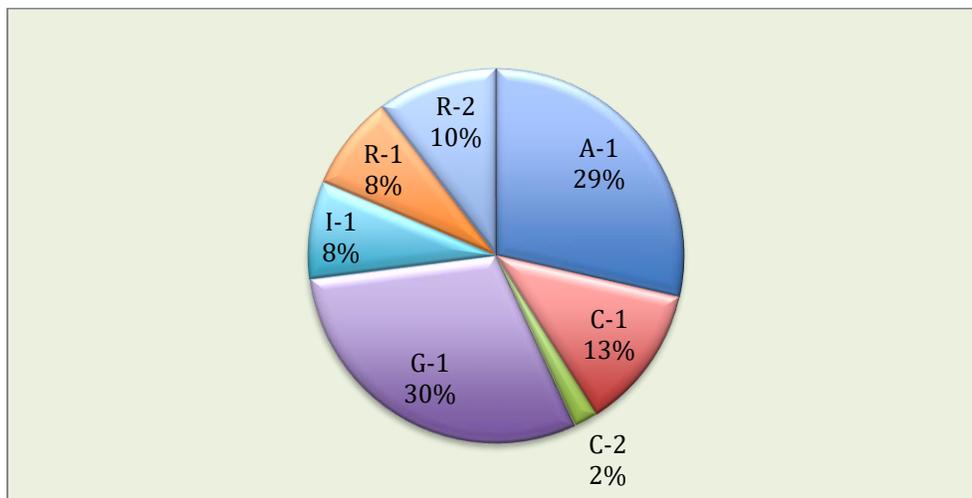

3.11 Land Use and Zoning

Monticello's current zoning ordinances provide for seven different land use classifications and two overlay zones. The intent of each land use zone (Table 20) and approximate land areas with the City's corporate boundary (Figure 10) are summarized below.

Table 20 - Current land use allocations in Monticello, 2017

Zone	Intent of zone	Acreage
A-1 Residential-Agricultural	Residential areas are integrated with agricultural production and livestock for family food and personal pleasure	611.9
C-1 Commercial	Retail and services for the city and surrounding areas in a business district in the heart of the city	266.9
C-2 Light commercial	Offices and services for the city and surrounding areas, and a buffer between C-1 and R-2 zones	44.3
G-1 Government	Unavailable for private development	640.5
I-1 Industrial	Operation of industry where impacts to residential areas are minimized	180.6
R-1 Single family residential	Single-family detached dwellings with attractive landscaping in an environment that favors family life	176.0
R-2 Multi-family residential	Single-family and multiple-family dwellings coexist, and Planned Unit Developments are allowed	221.98

Figure 10 - Land allocation by zone, 2017

Monticello's zoning ordinances favor single-family dwellings in the R-1 Residential Zone and allow both single and multi-family units in the R-2 Residential Zone. Residential uses are also permitted

GENERAL PLAN

in the C-1 and C-2 commercial zones and A-1 Agriculture Zone, although housing units must conform to residential zone standards.

There are two overlay zones within the city that have some special considerations in addition to those in the underlying land use zone. The OL-1 Zone includes locations that are believed to have residual radiation contamination left over after the cleanup of the uranium mill and tailings. Requirements for the OL-1 Zone were provided by the US Department of Energy. The OL-2 Zone includes the flood areas defined by the Federal Emergency Management Agency and the drainage corridors identified by the City and needed for storm water control. The overlay zones have stipulations that may affect building in these areas.

As identified in several goals noted in preceding sections of this plan, the City will reconsider its zoning ordinances. Hence the goals for this section of the plan include restatements of zoning objectives found elsewhere in the plan.

GENERAL PLAN

LAND USE & ZONING GOAL:

Assure that land use allocations (zones) support all General Plan objectives

Objectives - Housing	Expected Result
Analyze A-1, R-1 and R-2 zones, revise as needed to assure adequate room for housing growth (from 3.5)	Conflicts between business and residential uses are minimal and areas are properly zoned for residential expansion
Consider a zone for low and moderate income housing (from 3.4)	City provides a cost effective opportunity with smaller lots for smaller homes
Expand areas zoned as R-1 and R-2 (from 3.4)	Developers have more land area for single-family and multi-unit housing
Review & revise as needed, City codes to facilitate construction of moderate income housing (from 3.4)	City codes are not barriers to development of moderate income and affordable housing, and sufficient area is available for new construction
Revise animal keeping ordinances and residential zoning to be consistent with the City's rural setting (from 3.5)	Under specified circumstances some farm animals are allowed within the city
Objectives - Economy & Business	Expected Result
Analyze existing A-1, C-1, C-2, and I-1 zones, revise as needed to foster business growth (from 3.6)	Commercial, industrial, and residential uses are separated and have room for growth
Implement an ordinance to protect the city's dark sky (from 3.6)	Lighting within the city does not adversely impact the dark sky, and dark skies become a promotional feature for city businesses
Review & revise subdivision & PUD ordinances to encourage energy efficient design (from 3.10)	Energy conservation is part of all new residential construction
Revise as needed the City sign ordinance to maximize a business owner's options for making the business easily seen (from 3.6)	City sign ordinance supports the way-finding system and visitors and residents can quickly find the businesses they seek
Objectives - Energy Conservation	Expected Result
Revise City code to allow alternative hard surfaces for driveways and off-street parking (from 3.8)	Land owners and City have less costly options, and storm water runoff may decrease
Revise zoning ordinances to allow small wind turbines within the City (from 3.10)	Residents and business will use wind energy and reduce their consumption of electricity from the grid
Objectives - Zoning Administration	Expected Result
Consider revising ordinances for accessory buildings and portable storage units	Ordinance is clear, consistent, and easier to administer
Revise future streets map to conform with zoning changes necessitated by implementation of this plan	Future street corridors are appropriate to zones and clearly defined
Revise the City zoning map to conform with zoning changes necessitated by implementation of this plan	City and citizens have access to a map that is current and accurate with zones clearly identified
