

CANCER AWARENESS

FIREFIGHTERS ARE AT RISK!

FIREFIGHTERS HAVE
A HIGHER RISK
of contracting

ALL

types of cancer than the
general U.S. population.

Synthetic building materials
used in modern structures,
including furniture and paint,
RELEASE CARCINOGENS
when burned.

**WE HAVE AN
OPPORTUNITY
TO SAVE LIVES!**

Cancer is a leading threat
ALL to firefighters.

For every 5° increase in temperature,
skin becomes up to
400% MORE ABSORBENT.

The hotter you
are, the more
carcinogens
your skin
absorbs

MORE THAN
60%

Since 2002, the IAFF has attributed more than
60% of its firefighter LODDs
TO CANCER
MORE THAN ANY OTHER CAUSE

FIVE THINGS YOU CAN DO

1

Wear your SCBA from
the fire attack through
overhaul to limit
inhalation of
carcinogens.

2

Clean yourself off
during gross decon to
remove soot as soon
as possible.

3

Keep contaminated
gear out of your
station's living and
sleeping quarters.
Also, don't take
contaminated gear
home.

4

Make sure your gear
is cleaned and
inspected regularly by
a verified ISP.

5

Maintain a personal
exposure log of all
fire calls.

STOP CANCER AT THE DOOR
