

# MM-sure

Our software supports insurers in implementing a fully digital application management along the value-added chain.

MINDS medical is the first company in Germany to detect diseases in medical documentation such as doctor's letters. The diagnoses are extracted from patient files using artificial intelligence and displayed as ICD-10 and OPS codes. In this way, medical risk analysis or claims settlement can be automated.

## The advantages of MM-care

**Contract conclusion in a few minutes**

**Automatic individual tariffing**

**Underwriting within seconds**

**30% cost savings**

**Data protection guaranteed**

## What makes our AI special?

- ✓ self-learning and automatic adaptation
- ✓ seamless integration into the software landscape
- ✓ assistance system
- ✓ digitized processes
- ✓ data-based decisions
- ✓ traceable results

**ICD** is the International Classification of Diseases and Related Problems of the World Health Organization (WHO).

**OPS** stands for Operation and Procedure Keys. OPS is used to encode operational procedures in hospitals.

Info 

## Use Cases MM-sure

	Life insurance	Private health insurance	Supplementary insurances
<b>Preliminary examination at Point-of-Sale</b>	✓	✓	✓
<b>Underwriting</b>	✓	✓	✓
<b>Automatic tariffing</b>	✓	✓	✓
<b>Claims settlement</b>	✓	✓	✓

MM-sure can be used in many different ways within insurance companies - whether in the area of life insurances, private health insurances or supplementary insurances.

The core competence of our software lies within life and private health insurances in the area of medical underwriting. In the case of supplementary insurances, we concentrate on claims settlement.

MM-sure analyses the medical risks of each potential new customer and offers the appropriate tariff according to the submitted doctor's letters, invoices etc. Our software codes customer inquiries automatically on the basis of the data submitted. The diagnoses of the doctor's letters are converted into the corresponding code systems (ICD, OPS, GOZ etc.) and finally compared with the specifically defined health issues - all within seconds.

**With MM-sure, time-consuming administrative processes become faster and more efficient.**
