Two Piece tubs can use regular Roman Faucets;

White or Bisque color

Tubs feature built- in overflow chambers , and our special slotted drain & PVC Hub.

All plumbing is hidden inside the tub skirt , along with water pumps and air blowers for Jetted and Air Jetted tubs. Water suplies for faucets are under the tub skirt. Most Roman Tub Faucets will mount on the tubs. Optional wall or floor mounted faucets.

Two peice all acrylic tubs;

Tub And Drain Only **NO Faucet !**

| Moen Weymouth twin lever | \$4,200 | \$5,800 N/A | with TS50200 Rough |

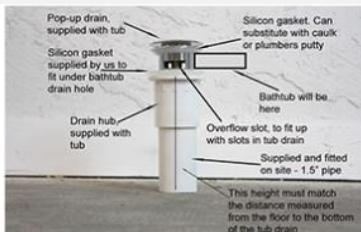

Many Builders use their standard roman tub faucets from Delta or Moen. IE; Brantford & Eva . Etc.

Air jets Number varies with size one jet every 4 " Multiple speeds Auto Purge

Water Jets Number varies per tub based of freestanding base space for jets and pump.

LED Light Variable colors, strobe, etc. \$400 \$400 400

Sit tub exactly in position over Drain , adjust Feet

Step 1

Measure height from floor to this point under the bathtub drain hole. This will determine the height from the floor to the top flange of the hub supplied

www.ICSqualitybaths.com

Step 2

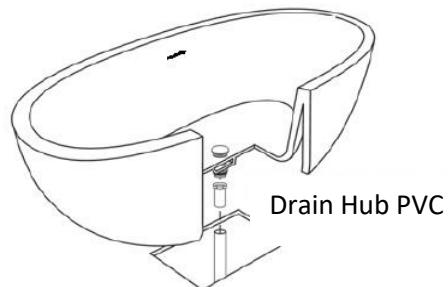

Cut pipe from floor and connect hub. Required height is from Step 1. Apply some caulk to the top flange of the hub to hold the silicon gasket in place. Lift tub over drain.

Step 3

Seal the top of the drain basket as noted above. Unscrew pop-up and use a basket wrench to tighten the drain basket into the hub. Allow to dry and then re-attach the pop-up, fill with water and test for leaks

Equipment Inside Tubs

www.ICSqualitybaths.com

Real air jets do not hold water to casue mold.
