

KUBERG

**HIGH-PERFORMANCE
ELECTRIC MOTORCYCLES**

ABOUT KUBERG

KUBERG is a cutting edge dirt bike manufacturer from the Czech Republic. As one of the very first electric motorcycle manufacturers, we set out to make electric dirt bikes as good as they can be. We build bikes to rock the foundations of the motorcycle world. Bikes that we pour all of our years of experience into, and engineer to raise the bar of motorcycle capability.

Our bikes are crafted with the hands of enthusiasts to excite our customers and fire their imaginations. Bikes that are built to be the best that they can be, because we love what we do. We push the boundaries and we hand build fantastically fun motorcycles, to take you anywhere, on any terrain.

Michal Kubanek
Founder & CEO

THE KUBERG ADVANTAGE

INNOVATION

Innovation is ingrained in everything we do. We think different and we do different, and it is that attitude that keeps us ahead of the curve. We learn, we listen, we ride, we work hard, and we push the industry forward.

IN-HOUSE R&D

We ride our bikes day in, day out. We tune, we sharpen, we enhance, we upgrade. We listen to our customers and renowned riders. Our in house R&D takes all the benefit of these ideas and this critical feedback, and delivers a constantly improved product, and delivers constantly improving, cutting edge products.

OUR OWN PARTS

All KUBERG bikes are constructed from our own tailor made components, crafted in our factory, or specifically to meet our needs by trusted local suppliers or the world's leading companies. If we can't find parts good enough, we make them good enough, so that every bike we deliver is a top end product, nuts, bolts and all.

HANDMADE IN EUROPE

All of our bikes are hand made in the EU by our team of real mechanics and technicians who are crazy about motorcycles. We do not compromise with the outsourcing of our production, and it is this handcrafted, personal contact that ensures we maintain the highest possible quality.

EXTREME PERFORMANCE

We build serious machines that deliver performance like no other motorcycle, and we use electric because it delivers power, capabilities and freedom far beyond petrol. KUBERG motorcycles are built for the biker who wants to ride hard, fast and free over the toughest terrain out there.

SAFETY FIRST

Fun is a serious business and safety is paramount. We understand this, and so all of our bike's features are fully adjustable to the abilities of the rider, either using the bike's inbuilt controls, or through the new, KUBERG Volt app.

WHY ELECTRIC?

INSTANT POWER AND TORQUE

Only electric motors can deliver instant, linear torque and powerful acceleration, to leave the petrol bikes standing. Kuberg motors deliver this power like no other. Simply twist, and you are long gone.

NO MAINTENANCE

Kuberg electric bikes are virtually zero maintenance. With no oil to change or gas tank to fill, no spark plugs to swap, clutch to replace or filters to change. Simply clean it, oil occasionally and enjoy regularly. All of the fun and none of the hassle.

CLEAN & QUIET

Kuberg bikes are built to take you over any terrain, and because they are emission and noise free, you can ride anywhere, anytime. Enjoy the experience of riding without ruining the surroundings.

NO REFUEL, NO OIL

No fumes, no hot parts, no oil to change, no tank to fill, no cleaning, just the thrill of riding... Simply plug in and go. Real future proof thrills.

MANUFACTURING

All KUBERG bikes are constructed from our own tailor components, hand crafted in our factory by our selected team of technicians. We are the only manufacturer of children's motorcycles who do not compromise with the outsourcing of our production, and no bikes leave unless they are perfect.

KUBERG

YOUNG RIDER

SMALL SCALE, BIG POWER

Young riders. The reason we exist. The reason that the first ever KUBERG was created. To build a fun, quality, performance machine both to teach little hands to ride with ease and to give them enough power to rip it up and give it everything.

START

TINY BIKE, LIMITLESS POSSIBILITIES

The best bike out there for the smallest riders. A great tool to learn and sharpen their riding skills safely, with fully adjustable speed and acceleration, and with the capabilities to allow them to progress quickly.

3 - 5 YEARS 24 KMH 21 kg

1 h RIDING 6 h CHARGING

TRIAL

PEAK PERFORMANCE, RAZOR SHARP SKILLS

Agile. Light. Powerful. Fun. Made to manoeuvre through tough, challenging terrain, the KUBERG TRIAL allows the standing rider to take on nature and the elements, and push both their skills and experience to the max.

5 - 12 YEARS 27 KMH 33 kg

2 h RIDING 6 h CHARGING

CROSS

REALLY RUGGED, TRUE FREEDOM

Hard. Fast. Electrifying. Free. The KUBERG CROSS is the mini motocross bike that delivers serious thrills, performance and speed over any ground in any conditions. This is the proven, rugged, hard wearing, fun machine for young riders looking to rip up the toughest terrain out there.

6 - 12 YEARS 27 KMH 33 kg

2 h RIDING 6 h CHARGING

MAIN FEATURES

POWERFUL MOTOR

Hand selected by our own R&D department, KUBERG's innovative line of motors deliver up to 3,000 watts ** of nearly noiseless power.

SAFETY KILL SWITCH

To ensure your child's safety, a kill switch with a wristband will immediately disengage the motor when pulled out.

3 POWER SETTINGS

Acceleration can be constrained to three different power settings and top speed limited to match your child's skill level.

WI-FI READY

Connect the bike to your smartphone and use the KUBERG Volt app to change and monitor all of your bike's functions and features. Or share your rides and videos with stats included.

DURABLE CONSTRUCTION

Rugged, powder-coated, double-cradle steel tube frames and reliable components make for unparalleled build quality, rarely seen on kid's motorbikes.

STATE-OF-THE-ART CONTROLLER

Kuberg's proprietary PWM controllers are the brains behind the power, delivering massive acceleration along with precision sensitivity to the throttle for complete control at all times.

Lightning acceleration, instant torque, massive power. A bike to squeeze the most from your racing skills, and push you to new heights. The KUBERG racing series is the result of years of working closely with professional riders, delivering the power, performance and precision that the best demand. The heart and soul of our business, bolted together and packaged.

- 6 - 12 YEARS
- 8 kW
- 33 kg
- 1 h RIDING
- 2,5 h CHARGING

A RACING HEART

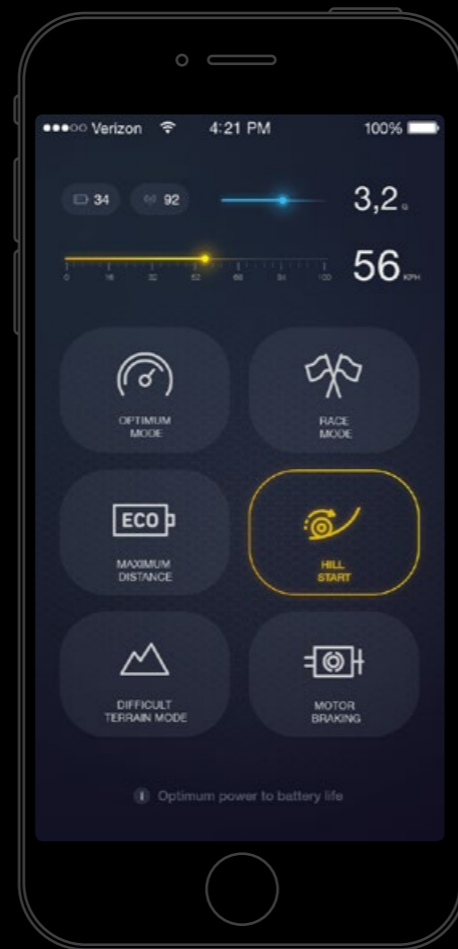

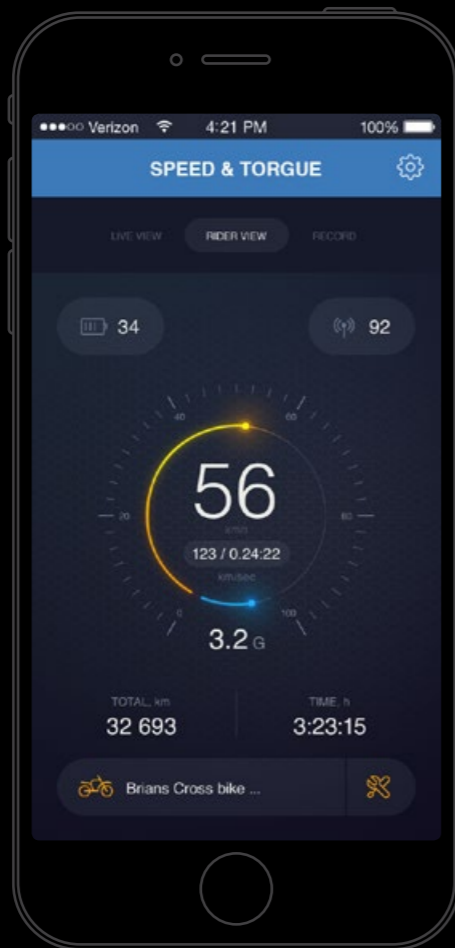

Performance. The reason we do what we do. We do not build toys or plastic gadgets. We build serious machines that deliver performance like no other, and we develop all of our young rider bikes with powerful riders who demand the very best. This is pedigree of every KUBERG mini motorcycle.

KUBERG VOLT APP

Power, performance and huge capability. Refined and controlled like never before.

Tweak, transform and monitor all of your bike's functions with a touch or a swipe. Get the dongle, plug it into your bike, download the app. Whether you are introducing your young rider to motorcycling safely and manageably, or squeezing every last drop of potential from your Freerider, the KUBERG Volt app is an entire motorcycle tool kit in your pocket.

PAIR YOUR PHONE WITH YOUR BIKE

Connect your bike to your phone. Monitor and control all of your bike's features and functions and squeeze the very most from your KUBERG.

UPDATE YOUR BIKE'S FIRMWARE

Update the brains of your KUBERG. Stay ahead of the curve and push the limits of your bike's capabilities and your riding.

SET THE BIKE'S PREFERENCES

Full adjustment at the tips of your fingers. Whether an absolute beginner or a hardened professional, tune your KUBERG to suit you, quickly and simply.

USE YOUR PHONE AS A TACHOMETER

How fast and hard are you pushing your skills? See it all in real time, and log this to monitor your progress.

MONITOR RIDING STATS

How can you gain that extra second? How can you navigate that difficult section easier? All the stats, numbers and data to push you forward.

SET A RIDING PERIMETER

The ultimate control of your young rider's safety. No more stuck throttles and painful experiences. If they leave your chosen riding area, their KUBERG will simply slow to less than walking pace.
