## PE-51 Dilution Ratios

PE-51 is a concentrated solution to be diluted using the nozzle & regular hose water. You can also use PE-51 without diluting for more positive results such as for indoor applications.

✓ One 32 ounce bottle of concentrate will mix 16 gallons of (RTU) Ready To Use product of a ratio of 64:1 which is approximate 2 oz per gallon.

✓ Compared to competitor product which needs to be mixed 4 to 6 ounces of product per gallon.

## Product Coverage

- ✓ 32 oz bottle of concentrate = 900 to 1500 sq feet
- ✓ 1 gallon of concentrate = 3600 to 6000 sq feet
- ✓ 5 gallon of concentrate = 18,000 to 30,000 sq feet
- ✓ 55 gallon of concentrate = 198,000 to 330,000 sq ft

These coverage areas are calculated at a 2 oz per gallon of dilution ratio.

For Indoor or Outdoor use.

PE-51 will not harm surrounding plants or vegetation.
