## CB-MSAT-G2 Call Box Satellite Telephone

The KR Nida CB-MSAT-G2 has been designed to allow the permanent mount of the Network Innovations' MSAT-G2 satellite telephone on a pole or other structure while operating on the Network Innovations' satellite network.

The Network Innovations RF unit, back-up battery, power supply, battery charge & low-voltage circuitry and other components are housed in a separate weather resistant enclosure while connected to a telephone style call box.

The call box can be operated simply by lifting the handset. The Network Innovations MSAT-G2 will automatically dial a preprogrammed number.

This unit is ideal in rural areas where there is no cellular telephone or landline available.
