

ONLINE CONFIDENTIALITY

Confidentiality is guaranteed in our online conversations. This is because I provide my sessions via VSee, a leader in HIPAA-compliant telehealth platforms. It is used by NASA, major corporations, and hospitals world-wide.

No information related to your online session is stored by VSee.

I follow the CA Board of Behavioral Sciences legal and ethical requirements to comply with HIPAA standards.

VSee Online Platform and Computer

I have researched VSee's security and privacy protocols, including the security of the transmission of communication. I have ensured that VSee is HIPAA-secure.

My computer that I use for online services has installed antivirus software and firewalls. My computer receives the most recent security updates regularly.
