# Introduction

*Rtc* is a General Construction entity established in Jeddah KSA in 1979. It has been involved since then in the realization of private projects during its first few years, then grew up to encompass residential , private and industrial projects.

## Company strategy.

Our mission is to execute demanding projects in the most efficient manner. We also seek to form long-term relationships of value and trust with our clients and partners. We are committed to the utilization of the best resources and latest cutting edge techniques to ensure high quality construction and engineering solutions.

## Specialties:

Industrial

- Power substation
- Factories

Residential

- Palaces
- Compounds Villas

Hospitality

- Luxury hotels
- Clinic

Government facilities

- Public Facility

## Services

Our services include the entire Civil - Architectural & Electro – Mechanical process, from design and shop drawings to material procurement and installation, testing and commissioning, as well as facility management and maintenance.

### Pre-construction services

1. Estimation : providing project estimation that is timely and reliable, in addition to project quantity surveying and BOQ preparation.
2. Planning : Developing a complete time schedule.
3. Cost Control : Controlling cost, schedule and owner objectives to mitigate any risks.
4. Quality Control : Monitoring methods, procedures and checks from start to finish with the goal of meeting the established standard.
5. Material selection and technical submittals
6. Procurement and material management
7. Value Engineering.

### Post construction services

1. Commissioning : Ensuring that building system are designed, installed and activated according to owner's operational needs.
2. Final handover : Completing of snag listed items.
3. Maintenance : through providing a one-year maintenance.

### Facilities management services

1. Construction management & supervision
2. Engineering services.
3. Health & safety quality / EHS.
4. Inspection & auditing.

## Construction services / Area of expertise

### Civil

#### HVAC

- Heating
- Ventilation
- Air-Conditioning
- Standard and critical environment.

#### Plumbing

- Residential
- Industrial

### Architectural

#### Electrical Power

- Medium and low voltage distribution
- Uninterruptible power supplies
- Indoor and outdoor lighting.

#### Low Current Systems

- Fire alarm and security system
- Access control, CCTV & intrusion alarm
- Building automation & management
- Public address and TV distribution.

# Value Engineering

## Value Engineering.

- Our extensive expertise allows us to offer value engineering that is both cost effective and energy sufficient.
