RF Technical Services:
SKYLINK provides network engineering services in the areas of radio planning, drive testing and radio network optimization. These services can be used to provide radio site and/or cluster verification, outdoor and indoor coverage assessment, operator benchmarking and other assessment services as required. In addition we perform network analysis to assess traffic balancing, measure and reduce interference, optimize network parameters and manage capacity.

- Project Management
- Handoff Management
- Neighbor List Tuning
- Uplink / Downlink Analysis
- Network Acceptance

Our Drive Test Services Include:
- Performance & Coverage Benchmarking.
- Single Site Drives / Site Shakedowns
- Network Pre-Post Launch Acceptance Drives & analysis
- Drive Testing at Site, Cluster, Market, Region and National Levels
- Feature Activations / Re-homing Activities
- Troubleshooting of Customer Complaints
- Post-processing and Drive Data Analysis
- Testing Due to Parameter Changes
✓ Fiber Solution

• High quality, best and the latest technologies
• fiber to the Home (FTTH)
• broadband Internet and television all the way to the home or business

✓ Microwave Solution

• Innovative Point-to-Point Wireless Access System for Next Generation Network
• Mobile Backhaul Application
• Mission Critical Network Applications
• Intelligent IP Networking Applications.

✓ Antennae Line Equipment

• RF Cables
• RF Connectors
• Antennas
• Splitters
• Installation Related Materials
SKYLINK Services – Logistics Solutions

- All Type of Logistics Solution
- Road Transportation
- Safety Procedures
- Packing Facility
- Loading/Offloading Facilities
- Delivery Team
- Logistics Manager
- Crane / Chain Services for Rooftop Sites
SKYLINK Services – Warehousing

- Warehouse Handling
- Distribution Services
- Warehouse Safety Procedures
