J I James Transportation is a young company looking to grow exponentially along with building and cultivating great relationships throughout the industry and community. This will be done, while providing and maintaining a safe environment for employees, along with delivering and creating an exceptional experience to all customers. The Owners of the Company have a combined 32 years of retail management experience, and a full understanding of how timely or untimely shipments affect sales, productivity, selling cost (wages dollars) and bottom line profits and losses. In todays climate we move with a sense of urgency, safely, and efficiently. Exceptional Customer service is our threshold. We thrive to not only meet this as a “norm” but to exceed it. We also wish to provide a savings to our customers with their current provider of logistics
