

LONELY PRIDE REVIEWS:

5 stars By Violet

"First love can be very painful. This story took me back to my youth and all the heartaches suffered when betrayal steps in and ruins everything. I love stories set in Australia, and this one happens to be also set in the beautiful state of Tasmania."

5 stars Brett Scott TRS

"I was supposed to take the book on vacation with me, but I made the mistake of starting it and couldn't stop until I finished—but then Tricia McGill is one of my favorite authors. She grabbed me from the beginning...emotional sparks were so real I felt the tension. I encountered an amazing range of emotions reading this book as I recalled my own childhood crushes, my broken hearts, the agony of losing someone I loved, and the joy of knowing real love. I enjoyed the 'sex' scenes that left enough to the imagination that I could personalize them for myself. Tricia McGill has an astounding way with words. Once you read her books, you'll become an avid fan."

Donna Fallen Angels Reviews

"Ms. McGill has written very real characters. You can relate to them and the problems they are dealing with. She has created a world that is believable. I love the scene of Mac telling Sam how he feels and she finally realizes what she felt all those years ago was that she hadn't wanted to grow up. She had wanted everything to stay the same. Ms. McGill tells a story that touches your heart."

Donna L. Zeller KIC reviews

"Tricia McGill's description of Mac's struggles with his feelings makes the reader want to believe that chivalry is not dead after all. This book should be required reading by some of the young men of today."

Melinda Stanners Novelspot

"This is a satisfying tale of misunderstanding, trust and true love, with a subsidiary message on the importance of home, family, and finding where you belong."
