FARM MANAGEMENT EQUIPMENTS

FORESTPRO II

Manufactured to last.
Find an inheritant for that machine.

Best core beam construction of the market

Nothing can provide more stiffness facing vertical and horizontal pressures than a 45-degree beam.

Ready for the worst

Independent tandem axle allows driving slowly without inflicting inappropriate movements to the load.

Swivel pull-bar

It's easy to understand why it means a lot anywhere and anytime you are moving this piece of equipment.

Totally versatile

Just imagine how versatile can the FORESTPRO be when it's time for other taskings using grapple, bakhoe or auger.

Heavy duty swivel parts

All swivel parts are conceived with thick walls and high diameter angle parts. Built stronger will last longer.

16" adjustable pull-bar

11" boom

CHT 400 - 5 stronger than regular steel

Upper position protected hydraulic cylinder

Adjustable rear wheelset

5 different options

High load capabilities

Ready for paved or unpaved road

Hydraulic stabilizing arms

Frame built around a 45 degree beam

Full "joystick" hydraulic control

Ready for VTT and tractor

SPECS & INFO

Length	15' 6"
Width	62"
Height	66"
Arm full length	11'
Grapple openings	36"/4"
Total weight	1600 lbs
Maximum on axles	20 000 lbs
Boom max. leverage	900 lbs
Wheel and tire	11L15

OPTIONS

Winch (1/4" cable) (option)	85' - 4000 lbs
Hydraulic unit (option)	7 HP
Bucket(option)	12" or 20"
Worm(option)	6"
