

Brief Planned Power Outage's

Thursday, December 13, 2018
Tuesday, December 18, 2018

HEA will be replacing two switch cabinets on the Homer Spit which will require a power outage affecting those members on the Spit and those living in communities across Kachemak Bay. Seldovia and Port Graham will be switched on to their backup generators for these outages. You should only see brief outages when switching on to and back off local generation. The scheduled maintenance will last between 4 – 8 hours on each of these days.

If you have any questions contact Homer Electric at 1-800-478-8551 or 907-235-8551
