FOREWORD

This Dealer Copy of the Parts Book contains common and general information applicable to the JAY•LOR® Models 2725, 2875, and 21000 Truckmount Cutter-Mixer-Feeders. It has been carefully designed to ensure that correct and accurate information is portrayed in every area of a typical unit, enabling efficient and effective service to the end user of JAY•LOR® equipment.

The format of this book consists of a fundamental breakdown of components and assemblies according to the area in which they are located or function on the machine. Each area or section contains illustrative information regarding a part or an assembly, along with information such as part numbers and quantities included. At the end of this book a Price List is found containing Dealer and Suggested List prices for the most common service items. For details and pricing information regarding parts and assemblies depicted in the illustrations but not included in the price lists, please contact JAY•LOR®. Our service personnel will be more than willing to assist you in obtaining information as it pertains to JAY•LOR®'s line of equipment. Information and pricing for non-stock and/or custom items will be quoted on request.

Note:

Parts and assemblies in this book may not be exactly as shown. JAY•LOR® reserves the right to make any changes/revisions/amendments at any time as deemed necessary to ensure that correct information is provided.

Price Lists are prepared for the most common parts and assemblies only, and are subject to change at any time, without notice. JAY•LOR® will do its utmost to provide the latest information regarding our products. To ensure that the most recent information is available, please contact JAY•LOR®. **All prices in effect as of the date specified on the current 'Price List'.**

GENERAL INFORMATION

The JAY•LOR® Truckmount Type Models 2725, 2875, and 21000 are covered in this Parts Book. While these models share many common components and assemblies, there are several notable differences as well. Differences between models have been detailed and noted wherever applicable.

It is important to use extreme caution when performing any type of service to this equipment. General information regarding service procedures and intervals is covered in the Operator's Manual provided with the new product. For more specific product service, please contact JAY•LOR® to obtain Technical Service Bulletins that outline the procedures and requirements for such. Please note that additional copies or replacements for any of this documentation can be ordered through JAY•LOR®.

It is also important to ensure that only JAY•LOR® genuine or approved parts be used where applicable. Mismatched or incorrect components can result in machine damage or malfunction, or possibly personal injury.

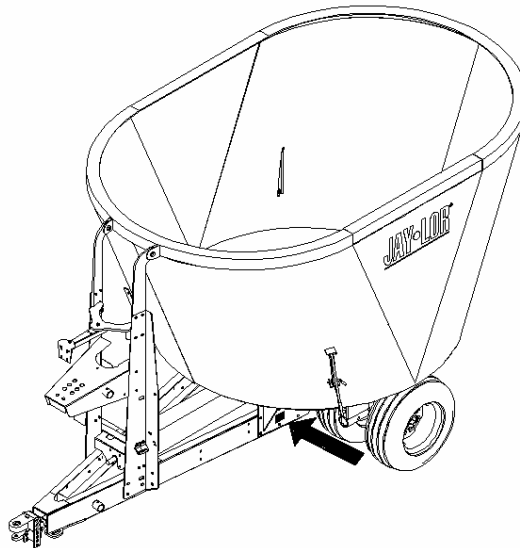

PART NUMBERING SYSTEM

JAY•LOR® uses a 7-digit Part Numbering System for identification of parts and assemblies used in the equipment we manufacture. Please refer to the machine diagram at the end of this section for details on how numbers are applied according to the area of the machine in which they are found.

ORDERING INFORMATION

Ordering components for JAY•LOR® equipment is simple. We ask that you complete a Parts Order Form, a copy of which is attached with this book. If unclear about any of the parts or assemblies found throughout this book, please contact JAY•LOR®.

It is important to include the machine model and serial numbers when ordering parts whenever possible. The serial number plate is located on the frame of the machine as indicated in the diagram below:

In order to ship your order correctly and promptly be sure to state clearly the part numbers and descriptions. Shipping instructions, including any special routing should be given. If you make reference to a previous shipment, please refer to the invoice number and date.

JAY•LOR® will only process Parts Orders that have been received via facsimile or e-mail!

INVOICING TERMS AND CONDITIONS

Pricing:

For parts or assemblies sold and not associated with the sale of a JAY•LOR® mixer, prices as per Price List will be used (Dealer or Suggested List).

For parts or assemblies sold as extra parts or options (i.e. not listed in the JAY•LOR® Sales Book), prices as per Price List will be used (Dealer or Suggested List).

Terms:

Net 30 Days, FOB JAY•LOR® applies to accounts in good standing. Overdue accounts will be charged 2% per month. All goods remain property of JAY•LOR® until paid in full.

WARRANTY

On Goods Ordered:

Our guarantee of products made or sold by us is limited to an agreement to repair or replacement without charge any item found defective in workmanship or material upon receipt. No claims will be allowed for labour or consequent damages.

Any part, assembly, component, etc. that has been installed and/or replaced according to specifications established by JAY•LOR® will be warranted under the JAY•LOR® Limited Warranty (Machine). Please refer to the procedures set out with this documentation for details on warranty coverage.

JAY•LOR® Limited Warranty (Machine):

If parts and/or assemblies are ordered under the terms of JAY•LOR®'s Limited Warranty (as applied to the machine with date of purchase), please follow the procedures set out with this documentation to process a claim.

- Do not assume that the Warranty Request Form can be used to order parts -

EXCHANGED/RETURNED GOODS

Do not return any goods without first obtaining our permission. Whenever possible, JAY•LOR® will accommodate customers by accepting returns provided that products have not been used or damaged. Please contact JAY•LOR® to obtain a Return Goods Acquisition Number (RGA #).

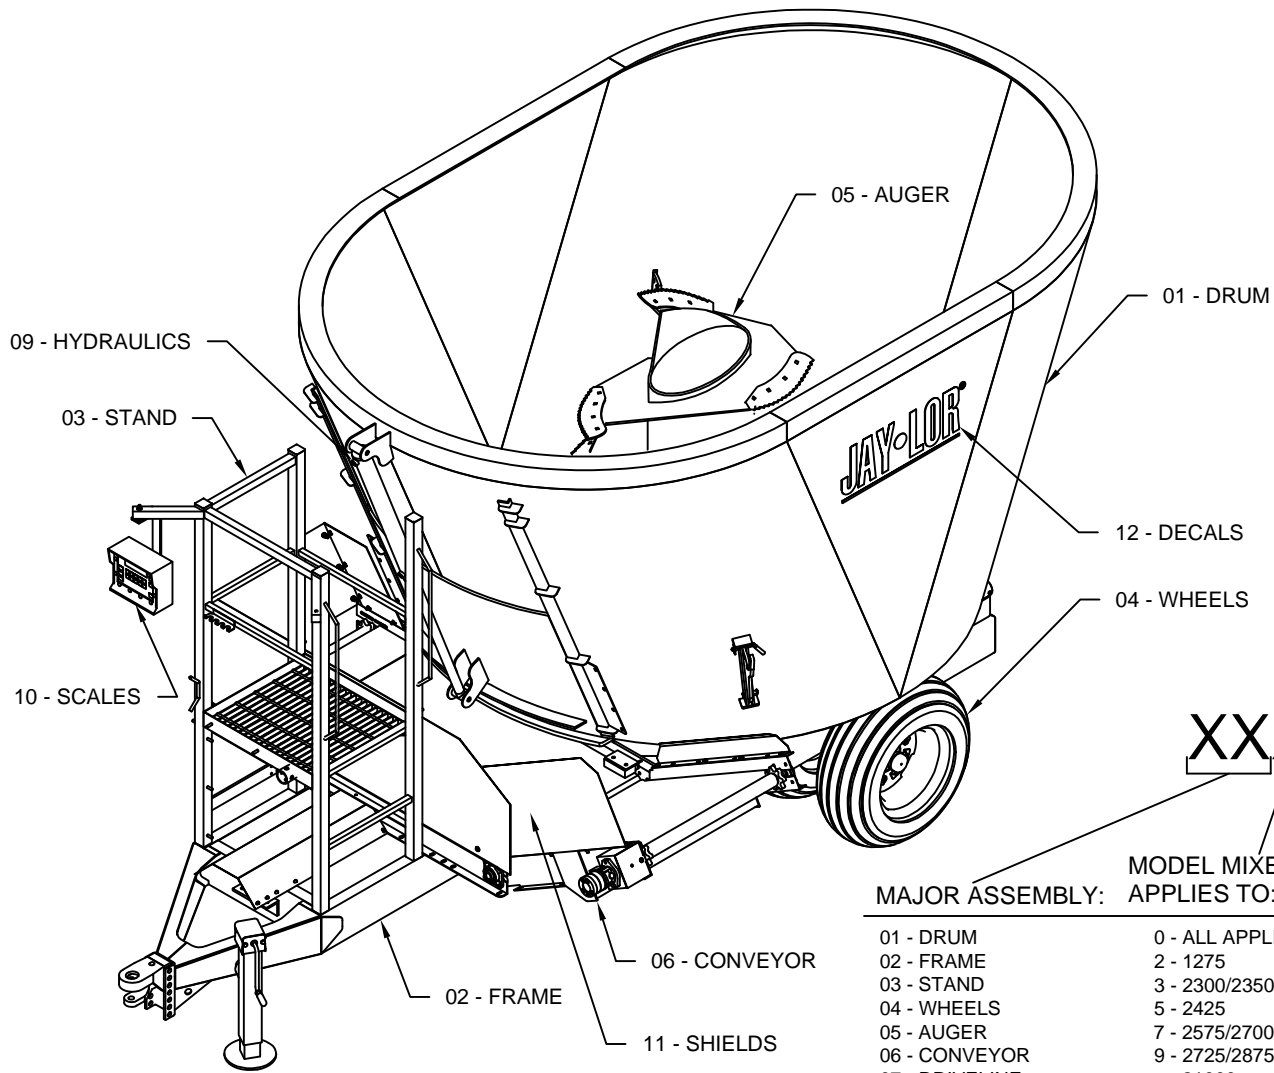

Please note that any extra shipping, brokerage, and handling charges incurred are the responsibility of the customer.

Returned Goods - Unused:

The price paid for goods upon return to JAY•LOR® will be credited the price paid less 20%.

Returned Goods – Used:

The return of used goods is normally not accepted by JAY•LOR®. Individual cases may be approved upon decision by the JAY•LOR® Warranty Administrator.
