Ink Jet Gloss Paper - Material #20

his glossy paper is designed to e compati le ith most des top roll to roll and ide format in et printers his sheet delivers e cellent photo images color graphics and sharp te t It has good ater fastness and et ru characteristics

his material is an all temperature acrylic adhesive suita le for a ide variety of applications ith paper facestoc s providing e ceptional converting characteristics that allo stripping of intricate die patterns as ell as ide e high speed processing

- » roduct l a els
- » olor oded arehouse a els
- » randed hipping a els
- » rivate a eling for istri utors

Ink Jet Matte Paper - Material #459

his special matte coated in et paper is for multicolor in et printing that re uires high resolution rint properties of this paper e tend to photo uality level

esigned for roll to sheet la el stoc in a ide range of applications ery good heat resistance hich ena les trou le free performance in different laser printers ood adhesion to corrugated oard and non polar su strates also at lo temperatures

- » ood ontainer a eling
- » remium roduct a eling
- » helf a eling

Benefits of On Demand Color Printing

- » le iility print hat you need hen you need no lead times
- » o er inventory – one lan la el versus multiple printed la els
- » Increased efficiency – no need to change rolls in the printer
- » Reduction of errors – color coding or pictures for easy product identification
- » Improves manufacturing and shipping process

Ink Jet 3.4 Mil Matte Synthetic (GHS) Material 458

il hite atte in et printa le polypropylene film cellent ater resistance along ith instant dry coating In et printa le ith ater ased in s

dhesive is specifically designed for la eling all types of chemical drum su strates and other rough surfaces hen used ith certain film face stoc s it has passed testing standards

Ink Jet 5 Mil Kimdura (GHS) Material 452

il hite atte in et printa le polypropylene film cellent ater resistance along ith instant dry coating In et printa le ith ater ased in s

dhesive is specifically designed for la eling all types of chemical drum su strates and other rough surfaces hen used ith certain film face stoc s it has passed testing standards

Applications

» approved chemical materials

» a mat la els

» orticultural la els

Ink Jet Gloss Polypropylene Material 453

he is a glossy hite polypropylene film that has a topcoating designed for oth pigmented and dye ater ased in s

clear all temperature acrylic adhesive featuring e cellent adhesion to a variety of surfaces ith film facestoc s It covers a road temperature range and has e cellent converting characteristics on press he high initial tac of to lo surface energy polyolefins ma es it an ideal for lo on applications

Applications

» rime la els

» everage la els

» edicinal product la eling

he ystem as agreed upon at the international level and adopted y the in he is not meant to change the scope and frame or of ut certain modifications have een put in place nder the ha ard classification la els and safety data sheets have een standardi ed to increase uality and consistency of information provided to or ers he provides a single set of harmoni ed criteria for classifying chemicals according to their health physical and environmental ha ards It also specifies ha ard communication elements for la eling and safety data sheets
