Ink Jet Hi-Gloss Paper

This glossy paper is designed to be compatible with most desktop, roll-to-roll, and wide format ink jet printers. This sheet delivers excellent photo images, color graphics and sharp text. It has good water fastness and wet-rub characteristics.

This material has an all temperature acrylic adhesive suitable for a wide variety of applications with paper face stocks providing exceptional converting characteristics that allow stripping of intricate die patterns as well as wide-web, high-speed processing.

» Prime Labeling
» Food Container Labels
» Premium Product Labels
» Cold Temp/Freezer Applications

Ink Jet Matte Paper

This special matte coated ink jet paper is suitable for multicolor ink jet printing that requires high resolution. Print properties of this paper extend to photo quality level.

Designed for roll-to-sheet label stock in a wide range of applications. Very good heat resistance, which enables trouble-free performance in different laser printers. Good adhesion to corrugated board and non-polar substrates.

» Product ID Labels
» Color Coded Warehouse Labels
» Branded Shipping Labels
» Private Labeling for Distributors

Benefits of On Demand Color Printing

» Flexibility - Print what you need when you need it (no lead times)

» Lower inventory – One blank label versus multiple printed labels

» Increased efficiency – No need to change rolls between print jobs

» Reduction of errors – Color coding or pictures for easy product identification

» Reduction of risk - No worry of outdated pre-printed inventory

Ink Jet 3.4 Mil Matte Synthetic (GHS)

A 3.4 Mil White Matte, ink jet printable polypropylene film. Excellent water resistance along with instant-dry coating. Ink Jet printable with water-based inks.

The adhesive is specifically designed for labeling all types of chemical drum substrates and other rough surfaces. It has passed BS5609 testing standards.

Ink Jet 5 Mil Kimdura (GHS)

A 5 Mil White Matte, ink jet printable polypropylene film. Excellent water resistance along with instant-dry coating. Ink Jet printable with water-based inks.

The adhesive is specifically designed for labeling all types of chemical drum substrates and other rough surfaces. It has passed BS5609 testing standards.

Applications

» GHS/BS5609 Chemical Container Labels

» Hazmat labels

» Horticultural labels

Ink Jet Gloss Polypropylene

A 3.5 mil glossy white polypropylene film that has a top coating designed for both pigmented and dye based inks.

A clear all temperature acrylic adhesive featuring excellent adhesion to a variety of surfaces with film face stocks. It covers a broad temperature range and has excellent converting characteristics on press. The high initial tack to low surface energy substrates makes it ideal for blow on applications.

Applications

» Prime labels
» Beverage labels
» Medicinal product labeling

Did you know?

The GHS System was agreed upon at the international level and adopted by the UN in 2002. The GHS is not meant to change the scope and framework of OSHA HCS, but certain modifications have been put in place. Under the GHS, hazard classification, labels and safety data sheets have been standardized to increase quality and consistency of information provided to workers. The GHS provides a single set of harmonized criteria for classifying chemicals according to their health, physical and environmental hazards. It also specifies hazard communication elements for labeling and safety data sheets.
