Indoors or outdoors. Wet or dry. **TITAN** by **Interlam** is ideal for commercial, residential, hospitality, and hospital applications (and more) because of its resistance to heat, moisture, pollutants, and bacteria. **TITAN** panels are a non-porous material ideal for areas where food is prepared. **TITAN** excels where moisture may be present like as a tub or shower surround or as a kitchen backsplash. **Interlam's TITAN** panels will make sure you have texture where you want it. **Interlam** currently offers nine patterns as shown.
