

THE PUPPY PACKET

In order to have happy and healthy puppies it is paramount to stay on top of vaccinations and health issues that can and may arise. It is foremost in our program, that when a puppy leaves to go to their new home that the new owner will be given a current vaccination and deworming listing that the puppy has been through and what and when the next vaccinations are to be given. At Shining Star Aussies, we send home with each new " Wigglebutt Family" a "Puppy Packet" containing a developmental stages and socialization pamphlet which outlines what happens when and how your puppy grows and changes, a copy of the breed standard, your puppy's vaccination record, and a page with helpful links so that you can learn all you need to know about your puppy, it's breed characteristics, genetics of the Australian Shepherd, dog care books, and breed associations and clubs .

This "Puppy Packet" is an exclusive perk that you will receive only with our program. At eight weeks of age all puppies are taken to a board certified veterinary ophthalmologist to have their eyes examined for any genetic defects. The results will be included in your "Puppy Packet" that you will receive when taking home your bundle of joy.
