

My wife and I hired Premier Property Developers on a recommendation from our architect. Steve Took the bidding process very seriously and provided us with a beautifully itemized construction cost estimate that was a fixed-price as well as a fixed time. We were living in the back areas of the house while the work was going on and we had small children. So safety and cleanliness was most important to us. Steve had a cleaning crew they are each day to make sure the job was clean and there were no nails or sharp objects Insight at the end of the day. He also kept a dumpster on our driveway to make sure there was always a place to put the trash. Most importantly Steve was able to offer suggestions to the engineer regarding the type of foundation that we were installing. As a result the foundation design was simplify and we saved well over \$20,000. We ended up using that money as a contingency fund which was spent by the end of the job. Steve did an amazing job and he really took care of my family and the little ones. We could not be happier with the results.
