

RADON CONTROLS INC.

~certified radon gas solutions since 2009~

COVID-19 Statement

At Radon Controls Inc., the very purpose of our business is to bring greater health to homes, schools, daycares, and workplaces. With people spending so much time at home, it is more important than ever that radon be reduced to safer levels.

We take the health of our clients very seriously. We have educated ourselves on the Alberta Government protocols and have acquired all the Personal Protective Equipment necessary to keep our clients and ourselves as safe as possible during this pandemic.

If we are coming to do a site visit:

- Each worker completes and signs a health check each day.
- Workers who feel ill are sent home.
- We will check in with you before we come to ensure you are feeling well.
- Onsite, we will greet you from a safe distance, and then put on a mask and gloves.
- Once we enter your home or workplace, we encourage you to distance yourself appropriately.
- Optionally, we can FaceTime with you as we conduct the site visit if you prefer.
- Touch points will be wiped down with disinfectant, if necessary, before we leave.

If we are installing a system:

- We will conduct a worker health check and will ask you to complete a health check as well prior to commencing work.
- Work will proceed if everyone is feeling well. If you are ill, there is no penalty to reschedule your installation date.
- Workers will wear masks and gloves and maintain required distances.
- All tools and touchpoints are sanitized at the end of each day.
- Frequent use of hand sanitizer is encouraged.

If you would like to read our entire Covid-19 policy, please contact us.
