

Continuous Pressed Laminate

(Not a High Pressure Laminate)

Use normal high pressure laminate fabricator techniques when using this product and follow the instructions below.

1. Please handle with care, the product is thin.
2. Please remove from box/crate and let acclimate for 5-7 days before using.
3. After opening pallet or box lay laminate flat and put a heavy substrate on top to keep it from warping. Some warping can be extreme.
4. Never fabricate or store product under 60 degrees or above 90 degrees.
5. Leave your A/C or heater on at all times.
6. Never deliver finished product to a non- temperature controlled environment.
7. This product must always be balanced with a brown 0.6mm thick phenolic backer.
High Pressure Laminate, Cabinet Liner, Paint, Melamine, Paper Back or Raw Back do not count as balanced.
8. Substrate must be MDF or Particle Board (nothing else)
9. Never use this product horizontally or in a high traffic area.
10. Never apply to dry wall without using substrate.
