How to install Ultimate Box drivers in Windows 8, 8.1 and 10.

1. Press the Windows key + R to bring up the Run box. Type `shutdown /r /o` and hit Enter.
2. Windows informs you that you are about to be signed off. Click Close (go to step 4).
3. OR (instead of first 2 steps), click on Power, hold down Shift and press Restart.
4. Once your Computer has rebooted you will need to choose the Troubleshoot option.

5. Then head into Advanced options.
6. In the Advanced Options window, choose **Startup Settings**. Sometimes **Startup Settings** link is not available on this screen. Instead it may say **See more options**. Click on that and then on **Startup Settings**.

7. Click the **Restart** button on the Startup Settings screen to reboot your computer again.
8. After restart in Startup Settings windows, press the F7 key on your keyboard to select “Disable driver signature enforcement”.

Start-up Settings

Press a number to choose from the options below:

Use number keys or function keys F1-F9.

1) Enable debugging
2) Enable boot logging
3) Enable low-resolution video
4) Enable Safe Mode
5) Enable Safe Mode with Networking
6) Enable Safe Mode with Command Prompt
7) Disable driver signature enforcement
8) Disable early launch anti-malware protection
9) Disable automatic restart after failure

Press F10 for more options
Press Enter to return to your operating system

9. Your PC will then reboot. Proceed with Ultimate box program installation, Ultimate box Drivers installation or Upgrade. During the installation procedure, Windows will inform you that can’t verify the publisher of this driver software. Just ignore the warning message and choose “Install this driver software anyway” to complete the installation.

Keep in mind that after the next restart, Driver Signature Enforcement will be automatically enabled again to prevent new drivers from being installed, Windows will keep using any unsigned drivers you’ve already installed.
