

Secured Transport:

Aviocode uses standard transport & encryption protocols to securely & HIPAA compliantly bring data from your platform into the Aviocode platform.

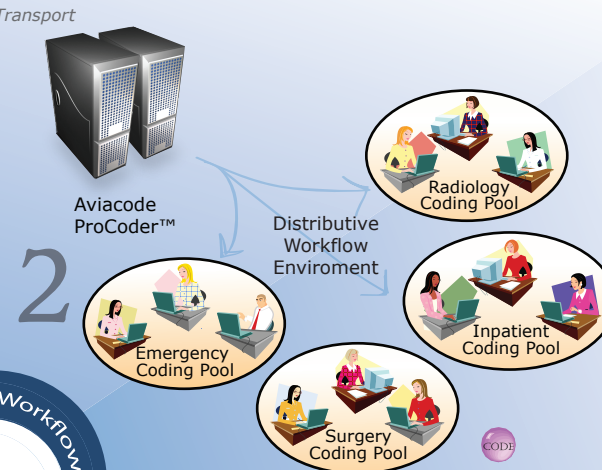

Section One:

- A. Aviocode can receive any electronic, paper or scanned image documentation.
- B. Aviocode will handle the transport of your documentation, patient demographic information, and insurance information needed to completely & compliantly code your patient documentation.

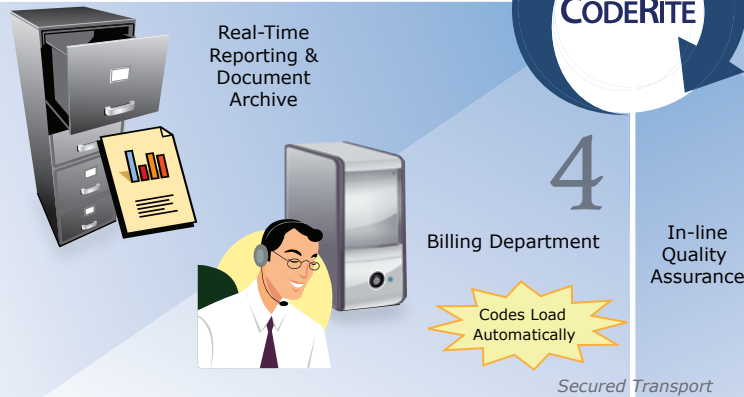

Section Two:

- A. When documentation arrives into the Aviocode Coding Platform it is separated and distributed by medical specialty into different coding pools and customer teams.
- B. Aviocode has expertise with all In-Patient and Out-Patient specialties, as well as Facility & Professional Components.
- C. Aviocode hires only Certified Coders who meet Aviocode's qualifications by passing our In-House and Specialty Specific testing.

Section Four:

- A. Aviocode has developed Interfaces into the leading Health Information and Practice Management Systems, thereby eliminating data entry cost and mistakes.
- B. Dozens of Real-Time Reports reconcile documentation and help manage clinical documentation.
- C. Aviocode's platform includes a web-based document repository for easy access to all clinical documentation in the system.

Section Three:

- Coding Analyzer & Rules Engine:**
- A. Aviocode keeps current with all coding changes by utilizing the leading rules edit engine.
 - B. Aviocode loads your specific coding and payor rules. Coders see these rules and apply them to every document coded.
 - C. Aviocode is the only coding provider that has an In-Line Quality Assurance program that allows us to know of our level of quality before it is released to you.
