Welcome to Crypto World

Now a days Every month lots of coins and tokens have introduced and launched, some of the tokens, we know which survive and some disappear. 10% of coins stay in the market and hold but rest are either dumped or scammed, some of the token not even reach for listing on exchange and some which get listed in exchange don't even survive, reason is the people those who have got huge amount of tokens freely in airdrop, they wait for launching of the token in exchange and their only requirement is to sell out and get free in other words you can say their purpose of buying and selling is to dump either knowingly or unknowingly, this is a human nature who always interested in a small investment with big profit but always in a shortcut method resulting, they themselves don't know what they are doing in the market ,each and every single person a buyer or a seller are equally responsible for the bullish and bearish situation of the market and in crypto industry dumping is in rapid growth which is one type of fraud.

There are some HYIP investment schemes are going on in the market where they will show you a very small investment with a high return but beware of such false commitments in which peoples are getting trapped. Every people join now and then result is they completely lose their money. which they will never get back.so ECPN Token don't support such programs and instant profit schemes, it believes in slow and continuous growth. Crypto assets which have been increasingly gained attentions of every countries public and the uses of this asset in different platforms have also raised. the digitalisation of these coins or tokens have made online payment process in a secure and reliable ways but one has to adopt the blockchain process to get benefitted as we know that when bitcoin launched, it was the big revolution for this generation and also to our next generation. It's a great chance for all of us to be part of this changing world of digitalization and it's always good to be a part in its starting phase, like cited before the motto of ECPN Token is also helping people of every countries with a little contribution by the people for the people where our contributors can donate little amount to help the projects run efficiently and hassle free in every country where ECPN Token reach and make its way with its own.

Our mission

1. GoGreen –

we are very much inspired by two slogan “Plant a tree, save a family” & “Adopt a Tree”. Now a days as we know the pollution and global warming are main issue. Because we have already cut down many trees and it continue. if all over world we able to plant a tree for a family then we will be succeeding to reduce some pollutions and temperature from this world. Now world population is more than 7 billion. and we think in future, there will be 3 billion family exist. so, we decide to plant at least 3billions plantation in different continent. For this we invite more to more peoples join us, so we easily able to reach in every corner of the world. In Other way we want at least every family “Adopt a tree” like a new family member.

2. Bio Diesel

Benefits of Jatropha

- Low cost of seeds.
- High oil content.
- Small gestation period.
- Grows on good to poor soils.
- Grows in low to high rainfall.
- Plant size makes seed collection convenient.

In the Philippines, *Jatropha curcas* L. can easily produce 5,000 kg of seeds or 1,500 L of biodiesel per hectare. Given good management, production could be as high as 8 t or 2,500 L of biodiesel per hectare.

After 50 to 100 years, we will use all our crude oil. Crude oil is non productive and its available in nature. Its not increase by our demand. Every day many cars, bikes, factory etc needs tons of tons liters petrol, diesel, gasoline. But will we think, what we do? when it's totally empty. Every auto mobile company start to produce electric bike, car, scoter. And govt. also encourages it. But then also we need Oil. If we will plant jatropha and make biodiesel then it will support us for many works. And we also able to produce as much as we need. We take it as our mission- with this we do two work- go green with biodiesel production. In future more and more farmers and land owners will be join hand with us for produce bio diesel.

Use of ECPN Token

As we all know ECPN Token has some projects and has some specific goals for its usability and market survival needs. Now every project of ECPN Token is depend on some specific usable points which is important to understand for the basic information of the need of ECPN Token in the world crypto market.

We are going to add different uses of ECPN Token so that the rise of demand will make an impact in our trading exchange, so how the demand rise? answer is the demand will only rise if ECPN Token will be used in online payments, projects like recharge and online shopping and many other methods are coming but we want to make ECPN Token a bridge between a traditional business with a blockchain technologies. Blockchain is the only process where there is a time saving with secure payment sending /receiving process, like sending money from one wallet to another is just a some clicks away, then why not peoples be a part of this great time efficient revolution. The only thing is needed is adaptability of digitalization and ECPN Token.

Now a day's online experiences of trading or investment plans are very frustrating and standard of trading's in different exchanges and their rules to comply are also very difficult to understand and follow but in ECPN Token our contributors/investors/traders won't only remember the rules but also, they will return back for more benefits.

we all know the usefulness of cryptocurrencies ,in this digitally growing world where time is money and no body want to waste it and the best thing is cost is low fees for transferring but the speed to send from one country to another is truly faster than any bank wire transfers so ECPN Token has planned to launch some more projects near future where the usefulness of this ECPN Token will get noticed.

Now the choice for the project research and the use of products in ECPN Token is completely depends on our investors/traders/contributors to be together in a ECPN Token platform to reach the new heights with the demand of crypto assets in this growing world of digitalization where the expectation and pressures hails but with the wisdom of our growth each and every product/projects will get noticed .

4) Our projects:

a) Online shopping website and app:

ECPN Token is going to launch its own online shopping app where you can buy/sell products with ECPN Token, as we all know online shopping business is so convenient where you can shop with your convenience by staying at home and the best thing is you can shop their 24/7 with your ease, where you can get every materials and goods with a good comparison amount which we call bargain in our local shops .where you can get products in a cheap deals with better price compatibility, also discount coupons and many more offers and products from all over the world .there you get varieties and choosing options right in front of your screen. Where you can send gifts to your loved ones in the matter of few mints and some clicks, without any crowd with a best price comparison and vast product base online shopping is everyone's favourite. Best part is without harming your privacy .so ECPN Token is starting an online shopping app where you can use your ECPN Token for buying products with some good offers.

b) **Online recharge business:**

There are lots of other options but ECPN Token choose Telecom industry- online recharge business because in every country in the world there are a huge mobile phone user, internet users are there. The way the no. of user increased the global mobile population has also increased the active subscribers and the internet user who are habituated and not to stay a single day without phone or internet connection. People can stay without food but they cannot stay without internet because it connects a person worldwide.so the demand of mobile and internet is growing day by day. This is the way ECPN Token will grow demand and the more users and peoples will involve in payment sending/receiving the value of ECPN Token and its demand will increase.

Now we all know about blockchain which has great transparency, enhanced security, secured and improved traceability, increased speed, reduced costs and the extensive growth of bitcoin is a great proof of the booming crypto industry.

Its ok telecom industry has world-wide users and customers in every single home but crypto world is still growing, Crypto coin is still untouchable by a huge part of our world. What is blockchain? What is crypto token? what is crypto coin? What is the use? how people using? And also, some companies and shopping platforms have started using crypto currencies as their ecommerce payment option. ECPN Token is also going to be a part of Ecommerce business and make people aware of online crypto currency

payment systems. There are several well-known companies those are successful and growing in this business so like this demand of ECPN Token will grow.

ECPN Token Income Generation Programme

- a) Faucets
- b) High-low games
- c) jackpot games
- d) Paying Forums, you can earn free Ecpn tokens by participating in these programs
- e) Micro Works – home based
- f) Freelance Works

By the use of all above points, we increase our members day by day. Its like one member get free some ECPN Token and try our service. Or you say, we give them small unit free to test or check the crypto coin or blockchain.

And if possible, we also provide them some genuine homebased work or part time work for earn some Ecpn Token as their remuneration. With Ecpn Token we generate micro work for our members. So, they will able to earn some handsome money.

We also create Freelance work, where our freelancer are get work from worldwide and able to income from home. Day by day we will grow with Ecpn Token.

Tokens

Total Supply - 3,000,000,000

10% IEO Supply - 300,000,000

(including all bonuses)

5% Airdrop - 150,000,000

(Airdrop & giveaway to Exchanges)

Soft capital - 1050 Btc

(IEO)

Hard Capital - 60,000 Btc

(Launching price or it will be depend on Market price)

60% Token - 1,800,000,000

(Lock for 2 years then daily wise release 0.01%)

RoadMap

- June 2019** **Ecpn Organisation create Ecpn Token (Erc 20) Ethereum token.**
- Phase 1** **Ecpn Token will start IEO in 2 exchange.**
- Phase 2** **Ecpn Token will start listing & trading at least in 2 exchange.**
- Phase 3** **Ecpn Token will list in CoinmarketCap & similar website, and list in another 2-3 exchange for trading.**
- Phase 4** **Ecpn Token “Go green” process will start. And list in another 2-3 exchange for trading.**
- Phase 5** **Ecpn organisation will start micro works, faucet works, freelance works payment as Ecpn Token.**
- Phase 6** **Ecpn Organisation will start Ecpn Token usable programmes.**
- a. Recharge website or apps**
 - b. Online Shopping website & apps**
- Phase 7** **Ecpn Token “Bio Diesel” process will start.**

Donation

Donators are invited directly to pay donations for GO GREEN & SOCIAL WORKS.
