## CHARACTER RELATIONSHIP ANDY AND CHURCHILL.

Obviously, they liked each other but they did not tell each other. They enjoy coexistence and work more than lovers, but at the same time they were very concerned about each other, beyond the working relationship or friendship.

In the main story, Churchill had long been recruiting assistants, but because the conditions were so weird, no one was going to apply for the following conditions:

1. Health and longevity
2. Not afraid of being bitten
3. Can accept things that have not been seen before
4. Happy to explore
5. Have the virtue of the knight
6. Can support him

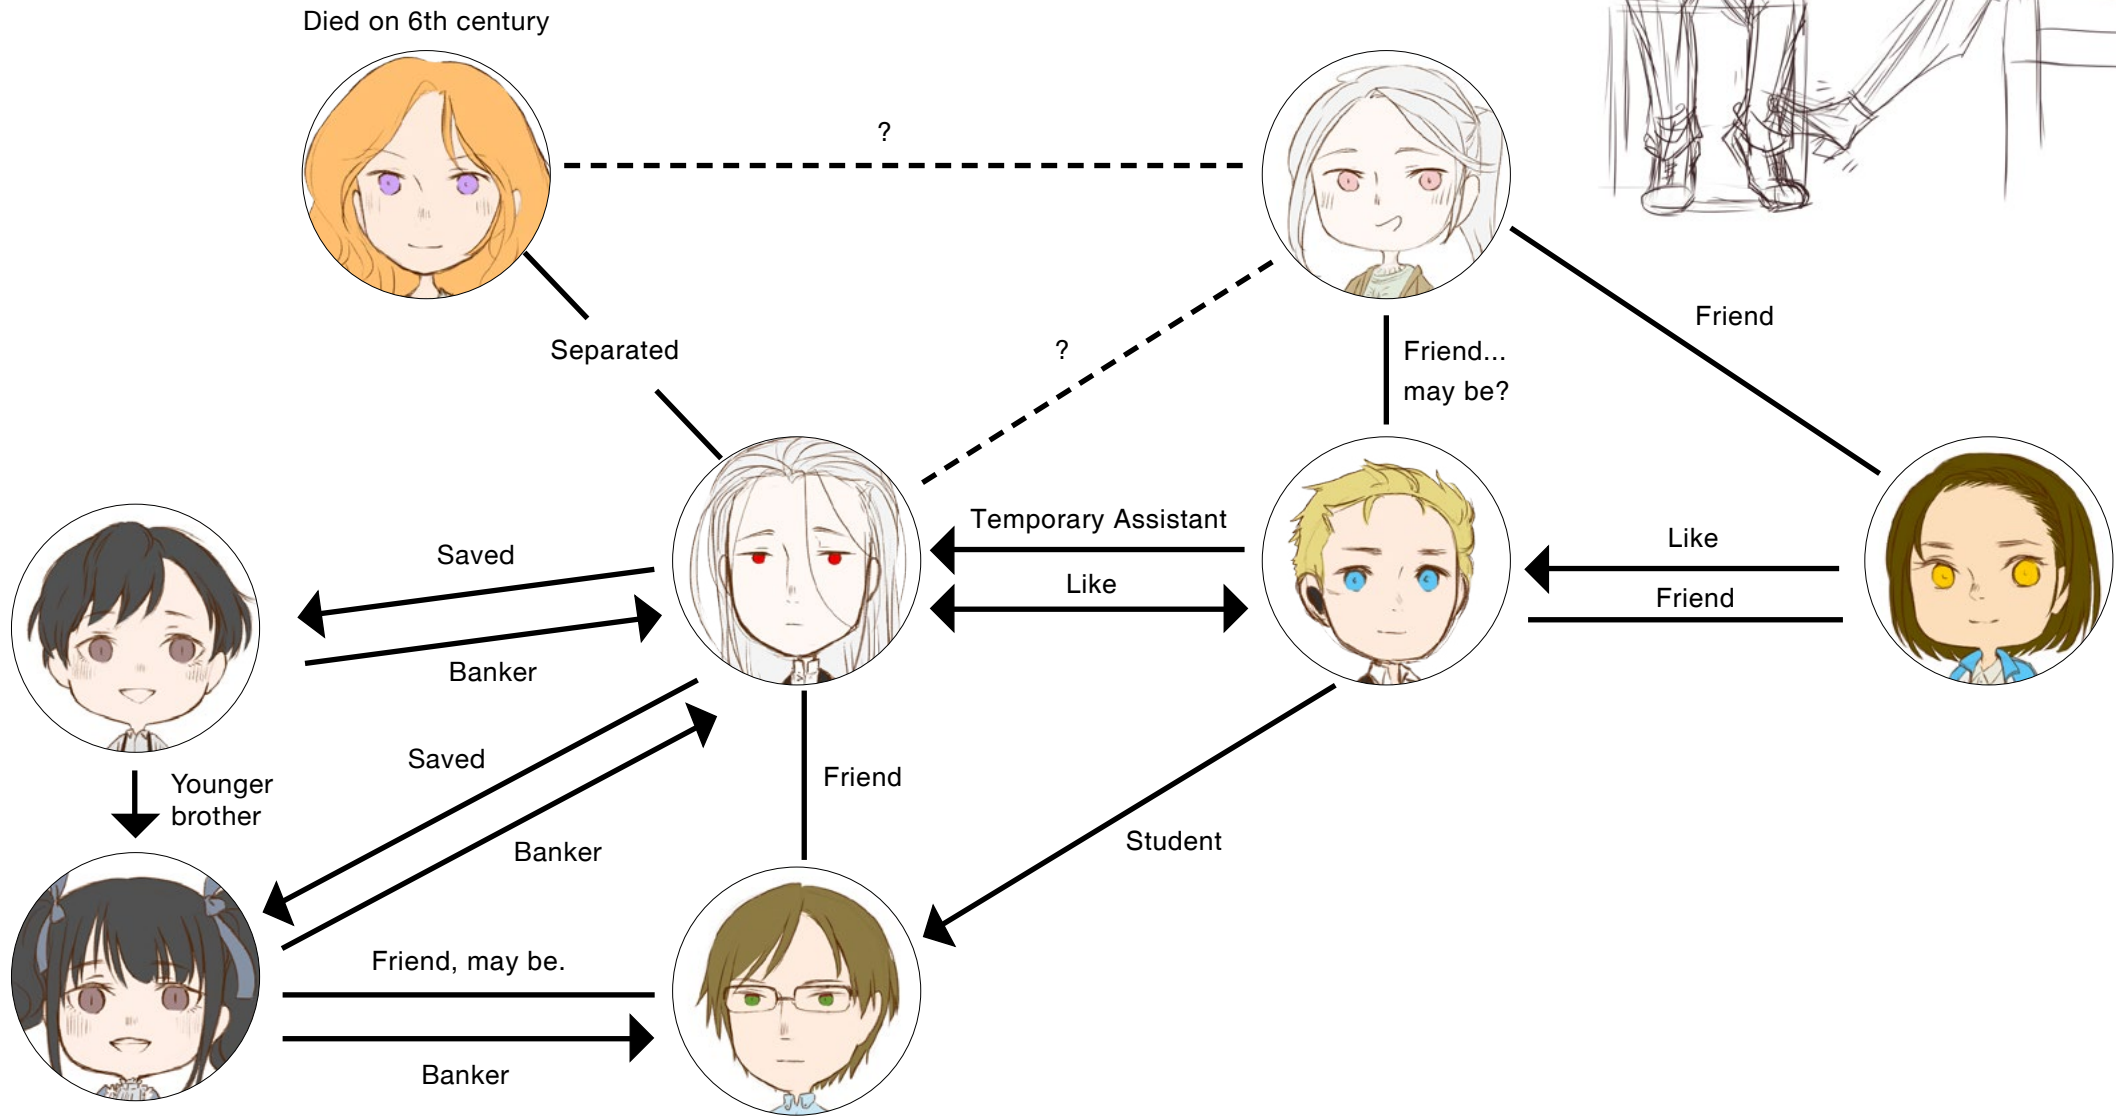

Everyone thought he was more like recruiting a partner and Andy knew about it but he did not mind to be a temporary assistant.

However, at the same time, he was not willing to become his long-term assistant (partner) because he knew Churchill was a vampire (Churchill did not know that Andy knew that he was) and he was a human. Andy thought that they were not possible because Churchill was no courage to make him to be a vampire (**Vampires can turn humans into vampires, but humans will have an 80% chance of dying**). Therefore, Andy would rather be his temporary assistant and kept their current relationship.

Because of this, although Andy had been Churchill's assistant for two years, they had kissed each other and depended on each other during this period, but they had no further relationship, until the crisis approached them...
