

3D Vision Makes the Difference!

"When I arrived at vision therapy, escalators freaked me out! I didn't know that my vision could be affecting my ability to feel confident on escalators, highway overpasses and bridges. I didn't know what "Magic Eye" was, nor could I see hidden pictures. The day I saw the dinosaur in the Magic Eye book was phenomenal! I knew I'd unlocked a new world where I could step confidently on any escalator and drive through the most tangled maze.

Thank you Dr. Hong and Karen!
