EMPLOYMENT:

#### Zentech - Baltimore, MD

#### Program Manager – Unmanned Ariel Vehicle Systems

Maintaining a positive customer relationship and enabling the customer to bring product to market on time. Manage New Product Introductions, Customer Orders and Engineering Changes. Prepare for and participate in program reviews through completion. Managing computer electronic equipment and processes optimized for flexibility of complexity.

#### General Services Administration - Washington, DC

#### Program Manager - Strategic Planning & Business Analytics

Serving as the technical liaison to high-ranking program personnel within Central Office and/or the Regional Offices to convey information and guidance related to planning and performance management. Applying a wide range of qualitative, and/or quantitative methods to assess and improve program effectiveness and/or complex management processes, projects and systems. Reviewing specific goals and objectives; monitoring the sequence and timing of key program events and milestones and evaluating overall program accomplishment. Working with other recognized technical and planning experts within the agency to develop a coordinated approach to planning and performance management.

#### Defense Information Systems Agency – FT. Meade, MD

#### Program Manager – Innovative and Collaborative Solutions

Acting as Program Manager for DISA in FT. Meade, MD. Was responsible for the oversight and management of the Commercial and Military Programs supporting Department of Defense services and Agencies. Reported directly to the Director of Enterprise Applications Branch and was responsible for strategic planning, execution management, responding to short notice tasks, developing comprehensive reports, business cases and implementation of policies and directives throughout DOD. Managed and provided oversight and situational awareness within DISA. Utilized various collaborative architectures to include SharePoint and JIVE. Established and maintained liaison roles with various elements of DISA management, other DOD agencies and components, US Joint Forces HQ in regards to technical advice, assistance and decisions concerning strategic program management matters. Participated in formal program reviews to determine program status and worked directly with the engineering, testing, installation, financial, and other entities to ensure requirements for design and implementation milestones were met. Maintained Information Infrastructure with key military and industry officials to accomplish planning and coordinating all phases of assigned programs and projects. Developed, implemented plans, policies, standards, infrastructures, and architectures that established the framework for the management of IT programs. Included strategic planning, capital planning, policy and standards development, resource management, knowledge management, architecture and infrastructure planning and management, and information security management. Possess a broad comprehensive knowledge of DOD policies, directives, and mandates, as applied to IT systems, services, policies, planning and programs, and industry experience in successful planning, design, implementation operations, and sustainment of complex, integrated information systems, and information technologies. Included experience with Commercial Off-the-Shelf (COTS) technologies, product delivery, and program management experience. Knowledge and experience working in both unclassified and classified environments. Supervised civilian information systems specialists, computer engineers, telecommunications specialists, and military personnel. Directed the work efforts of many professional and technical contractor personnel. Performed other duties as assigned.
