Pendulum Support Post - Height Adjustable w/ Rubber Foot Pad

This product stays attached to the barrier arm and swings down with the arm to meet the roadway and serves to support the horizontal position of the arm. Required on barrier arms over 16'.

Receiving Post - Height Adjustable w/ U Cradle

6"X6" Pad Mount, U cradle accepts customer provided long shackle padlock or pin lock. This product is highly recommended for additional security or for windy site locations. Provides a secondary locking point and holds the arm firmly & securely in place.
